**Wash Belts 35c**

Very swell white wash belts, embroidered, with pearl buckles and enamel eyelets. 35c each.

is used in manufacturing acetone, acetic acid, wood vinegar, acetic ether, and other commercial acetates.

In pine distillation the most valuable products are turpentine, tar and charcoal. The turpentine is extracted from the wood by "destructive distillation," an entirely different process from that which secures the gum turpentine obtained by bleeding the growing pine. The main source of the country's naval stores supply is the latter product. Destructive distillation utilizes chips, slabs, stumps and rejected pieces of wood, which otherwise would go into the waste heap. Every gallon of turpentine and tar so obtained is a gain. Turpentine as usually practiced by bleeding living trees is very destructive to the forests, though the new cup and gutter method inflicts relatively little injury. Turning to profit that which formerly went to waste is one of the valuable results of the study of wood utilization which is being carried on by the forest service.

In 1905 the returns from the 82 plants which reported showed that they used 659,770 cords of hardwood and 18,963 cords of pine, while in 1906 the quantity used by 119 plants was 1,144,896 cords of hardwood and 50,234 cords of pine. The great apparent increase is the result of the fuller returns, and does not necessarily indicate any marked increase in production.

**Newspaper Man to Wed.**

Cards have been received announcing the marriage at Baker City, July 31, of Miss Gertrude Tice to Charles Edward Hogue, formerly of this city, and at present on the Portland Journal. The bride is the daughter of the late Charles Hogue, a teamster of Baker City.

**Bad Burn Quickly Healed.**

"I am so delighted with what Chamberlain's Salve has done for me that I feel bound to write and tell you so," says Mrs. Robert Mytton, 457 John St., Hamilton, Ontario. "My little daughter had a bad burn on her knee. I applied Chamberlain's Salve and it healed beautifully." This salve allays the pain of a burn almost instantly. It is for sale by Dr. Stone's Drug Store.

**Smoke Glasses**

Protect your eyes from the glaring sun. We have them in all sizes and prices.

**REMEMBER**

We do all our own lense grinding. You get the benefit in promptness, careful workmanship, and the price is no small matter to overlook. We can save you money. In case you meet with an accident we can replace the lenses the same day they are left with us.

**JUST A DAY OFF.**

Pleasant Little Outing by the Blue Willamette.

It is according to the eternal fitness of things that one's eyes and thoughts turn to the good old fishing pole at this time of the year, and that is no doubt why Chas. Steen Hughes and Christian Endeavor Knowland, two mighty men of The Journal force, crawled out of bed yesterday morning as the approaching day sent its first lances of light over the blue and darkling ridges of the Cascades, and betook themselves to the headwaters of the slough, far from the haunts of man, that is to say some half mile from the brewery. They had four dozen spoon hooks, a basketful of minnows, their pockets full of worms and their minds full of visions of innumerable bass and strings of dainty-mouthed catfish. They fished faithfully with minnows for bait, but their efforts were vain; they tried the spoon hooks, but the fish had never heard of Ben Butler, and refused the lure; they dug worms out of their pockets, and even spit on the bait before offering it as an extra dainty and toothsome morsel to the fish, but it was no use. They sizzled in the sun and swore in the shade until night let down her soft curtains of velvety darkness and shut out the golden light in the west that told the continent goodbye. Then they went home. Knowland said that about 14 minutes after 5 o'clock he thought he almost had a

**Just Received**

**Ladies' Long Silk Gloves**  
**Ladies' Long Lisle Gloves**

IN BLACK AND WHITE

**New Laces, New Embroidery, b-bons, Lace Curtains**

**Men's Harvest Gloves**

**DISTILLATION IN THE UNITED STATES**

for weight of wood, pine and hardwood produce equal weights of charcoal, but pine, being lighter, the quantity of charcoal per cord is smaller.

The hardwoods used for distillation are chiefly maple, beech and birch, and the plants using them are almost entirely in Pennsylvania, New York and Michigan.

Charcoal is used very largely in blast furnaces in making pig iron, and some distillation plants are operated chiefly for the charcoal, although the alcohol and acetate are also of much value. The alcohol is used in the manufacture of varnish, for denaturing grain alcohol, for fuel, and in other ways. The acetate

wood distillation has become an industry of much importance in this country. This is a good thing, since it makes large use of waste from sawmills and from lumbering operations which would otherwise be lost. The bureau of the census has collected statistics from 119 plants for 1905 figures were obtained from eighty-two. Both hardwood and pine are used, but in separate quantities. The most important products from hardwood distillation are alcohol and acetate, while from pine the chief products are turpentine, tar and charcoal. Weight

**"American Proof Hemp" Taking the Lead**

It runs 50 feet longer to the pound than Sisal or Standard, therefore a bale of 50 pounds will bind fully 1000 more bundles than a bale of 50 pounds of the best Standard any farmer ever used. If this new twine will satisfy the farmers, as seems certain, it can be raised here and made in Oregon, and the money can be kept at home. We also have the Standard and Clover Leaf.

**SOME STORE NEWS**

Three Mitchell wagons were sold Saturday. They talk for themselves.  
A 10-horse power gasoline engine has been furnished to the asylum for the insane. It is a Stover, and a fine one. It will do the work without ever striking.  
Pretty busy selling buggies, mowers, rakes and binders. We carry a number of second-hand buggies. Can give you most any kind of a bargain in these.

**Now About the New Champion Binder...**

We say "New" Champion advisedly. It is a new machine. There are a number of new features that were never on a binder till the year 1907. It represents binder building of the first class up to the hour. It is as good as the best binders in the world of the best binders in the world can do up to the present time. You will not find any other binder that will do the work of the New Champion. You cannot afford to pass up the New Champion if you are looking for a binder. This is said with reference to your own interest. Come in and see the New Champion, and remember that this is the farmers' headquarters for Salem. They all feel at home here.

**Mitchell, Lewis & Staver Co.**  
211 to 237 State St. Salem Branch, F. F. Cary, Manager.

bite, but it never materialized. All that Hughes caught was a cold, and Knowland caught—well, what does a young married man catch when he stays away from home all day Sunday, comes home too late for church, and without even a fish? That's what Knowland caught. This morning, as The Journal reporter came down to the office, he saw Hughes standing in front of Lawrence's store, gazing abstractedly into an open kit of mackarel, while he mechanically felt in his pocket for bait. Then he stooped down and poked the fish with his fingers, which he then surreptitiously stuck in his mouth. A surprised look spread over his face, and then a great light dawned on him. He hurried into the composing room, took Knowland behind the door, and whispered to him: "Say, Charley, I got onto the way so many fish are caught; they put salt on their tails."

**Gone to the Coast.**  
Carl Gabrielson and Lawrence

Hofer started Saturday overland for the Yaquina Bay country, driving over the Coast range, camping and fishing along the way. They are going to live on bacon, trout and wild blackberries.

**Fine Weather Continues.**

Perfect weather for hay and hops, beer and brick continues. Other crops are also doing fine, and old Oregon is doing her level best to make all happy and prosperous. Poorly cultivated hop yards will not yield much more than half a crop, but where the cultivation was right the yield will be immense.

**A Memorable Day.**

One of the days we remember with pleasure, as well as with profit to our health on which we became acquainted with Dr. King's New Life Pills, the painless purifiers that cure headache and biliousness, and keep the bowels right. 25c at J.C. Perry's drug store.

**Everything for the Fisherman AND Hunter**

IT'S NEARING THE TIME WHEN YOU WILL NEED AN OUTFIT  
LET US SHOW YOU OUR LINES—THEY ARE COMPLETE.

Is your dog feeling well this hot weather. If not, try a bottle of Clayton's Dog Remedies.

Clayton's Dog Remedies have no equal. Try them.
