THE JOURNAL STANDS FOR PROGRESS, DEVELOPMENT, GOOD GOVERNMENT, AND NO DEGRADED LABOR.

THEY NEVER RETURN.

Umbrellas strayed from clubland's halls
Come back, though not in silk;
The man who goeth out to balls
Returneth with the milk.

My senses strayed when Cella smiled,
Because her eyes were black;
But now, no more by love beguiled,
I've got them safely back.

All things return; in twilight gray
Day dies to dawn anew;
The beef that's sent below today
Will make tomorrow's stew;

They stood in "Russia" side by side,
They filled one rosewood shelf;
They're now belonging, far and wide,
To any but myself.

—Booklovers' Verse.

TROUBLE IN MOROCCO.

The fundamental difficulty in Morocco is this: There is a large and naturally rich territory occupied by half-civilized and fanatical Moors and governed by a weak and silly "emperor," who is a descendant of the prophet.

The emperor does not count for much and there are other descendants more vigorous and enterprising, but otherwise no better, who want his job.

The emperor is modernized to the extent that he wants to buy all the expensive comforts and toys which modern science places within reach of emperors with money, and he taxes his subjects furiously in order to do it.

Some of his habits and purchases are said to contravene Moslem law, and this is made much of by his adversaries to inflame the minds of the people.

His trade, however, is marvelously profitable to automobile manufacturers and other purveyors of costly merchandise, and while he is not in the least to be depended on for anything foreign interests seem inclined to support, the existing government, knowing perfectly well, however, that the emperor is at any time liable to change his purposes and revert to the traditions of Moslem.

BUT WITH ALL THIS NINE-TENTHS OF THE PEOPLE OF MOROCCO ABHOR "CHRISTIAN DOGS" WITH UTTER DETESTATION AND DO NOT WANT ONE TOLERATED WITHIN THE LIMITS OF THE EMPIRE EXCEPT AS A SLAVE.

Europeans, however, of all nations are determined that Morocco shall buy goods of them and permit Christian traders to live among them.

Europe, in fact, is in precisely the state of mind in regard to Morocco that the people of this country were in with respect to Japan in the fifties.

If all Christians would leave Morocco there would be no further trouble.

They will not leave.

On the contrary, more insist upon going there.

It is in the interest of "civilization."

France and Spain have been designated joint agents to execute the mandate of Europe in respect to Morocco and are sending war ships and troops to do it.

Meanwhile the fanatical populace is becoming inflamed.

WHEN EXALTED BY RELIGIOUS FURY THE MOHAMMEDAN WELCOMES DEATH IN A FIGHT WITH THE INFIDEL AS AFFORDING AN IMMEDIATE ENTRANCE TO PARADISE.

IF THE PRETENDER TO THE THRONE SHOULD PROCLAIM A HOLY WAR THERE IS NO QUESTION WHATSOEVER OF THE RESPONSE WHICH WOULD COME.

The present emperor, unless protected from outside, would certainly be sent promptly to another world and every European who could be found in Morocco would be massacred.

To prevent such a condition France and Spain are hurrying troops to Morocco, and especially France.

The war ships will command the ports, but the great interior can be subdued and held, if once fully aroused, only by a strong army.

And if such an army gets there we may be certain that it will stay there, and that in time Morocco will become what Egypt now is, but with France instead of Great Britain in control.

The German Wine Trade.

The British consul at Cologne, in his report on the wine trade of Germany shows that many of the questions which have recently caused such a crisis in southern France are also active in the fatherland. The growers there are agitating for greater legislative protection from the competition of adulterated and sugared wines, and are also pressing for concessions in the matter of taxes and official control.

So far as the last crop is concerned there is likely to be anything but a superfluity in the market, for insect pests made havoc with the grape harvest, and now "wine growers are everywhere crying for government assistance and support."

The total production for last year is put at 1,800,000 hectoliters (hectoliter 26.417 gallons), as against 3,856,000 hectoliters in 1905; the crop is the poorest since 1898, when the yield was 1,497,000 hectoliters.

The destruction of the crop naturally greatly enhanced the value of wines in hand, and a few of the big growers who had stocks have done an exceedingly profitable business. The small grower, however, who for

financial reasons has to sell his crop as soon as it is ready, has not only not benefited by this recent great advance in values, but is left destitute as a result of the season's disasters.

There is likely to be a serious dearth of ordinary wines in Germany in the coming spring. This must badly affect the export trade, which normally is of the value of over \$5,000,000.

Why Fret and Worry

When your child has a severe cold. You need not fear pneumonia or other pulmonary diseases. Keep supplied with Ballard's Horehound Syrup—a positive cure for Colds, Coughs, Whooping Cough and Bronchitis. Mrs. Hall of Sioux Falls, S. D., writes, "I have used your wonderful Ballard's Horehound Syrup, on my children for five years. Its results have been wonderful." Sold by D. J. Fry.

Such is Life.

Ethel (sentimentally)—How like life are the waves of the sea? Percy—Yes. They come to the shore in great style and go away broke.—Exchange.

CITIES WITHOUT SMOKE

Smoke Shows Imperfect Combustion and Consequently, Loss

American cities of the first class have been engaged in a campaign against the smoke nuisance for the past five years with a result that is little short of marvelous.

They have achieved their point to a degree that makes the smokeless city of the near future an assured fact. Smoke is an unnecessary curse of national prosperity. Formerly it was considered a badge of great prosperity to have forests of tall chimneys belching forth clouds of sulphurous smoke. The factory which did not thus proclaim its activity was looked upon as a losing investment. Orders were slack and business lagging.

A strange revolution has been silently worked through the activity of those engaged in suppressing the smoke nuisance. They have demonstrated their earnestness in pushing the campaign, and science has come to their aid.

The steam engineer has recognized the hopelessness of his case and has proceeded to devise methods to suppress the smoke without limiting the capacity of the plants. The result is that smoke is now considered poor economy. It indicates imperfect combustion and a waste of fuel which should be avoided. The smokeless factory town is the most prosperous community.

For decades our factories and manufacturing plants have been pouring up their chimneys in the form of smoke and unburnt coal dust about 85 per cent of their fuel. This extravagant consumption of coal told heavily on the cost of manufacturing.

The soft bituminous coals filled the air with clouds of sulphurous smoke, which ruined clothes, furniture and valuable stock, and clogged the delicate lungs and nasal and throat passages of all who breathed it. Physicians in recent years are agreed that the weakening effect of breathing an excess of soot has been very great in the past, and that the spread of pneumonia and tuberculosis has been partly due to this nuisance. In some cities the smoke fog has been so dense that the average health has been affected through the clouding of the heavens and the consequent shutting out of the bright sunshine.

Many factories engaged in making delicate laces, curtains, linens, silks and other costly fabrics have been forced to find isolated locations away from smoke-producing plants. The disagreeableness of having smoke and soot distributed in the living-rooms of the home is so great that in many cities windows had to be tightly closed during the greater part of the day. Altogether the smoke nuisance has cost millions of dollars and produced much ill health and irritable nerves.

But, great as this indirect loss to property is, the direct loss through the waste of fuel heat carried up the chimney with the belching smoke is even greater. Engineering economies today declare that the loss is useless. It is simply a problem of burning smoke properly. The efficiency of steam plants has been increased from 10 to 20 per cent through the proper burning of coal. The number of devices invented for preventing smoke loss is so great today that it is more of a problem with manufacturers to make a choice out of many than to find any at all. These mechanical stokers, which give auto-

matic and uniform action, so that sudden changes in the draft cannot send up great clouds of smoke; in improved furnaces with down drafts of air which carry the distilled gases of the fuel down through the coal when it an incandescent condition, and not up through the chimney; in improved air flues, bridge walls and grate bars, new kinds of coking arches and deadplates where the coal is warmed and partly coked before being spread over the grate furnace.

Smoke-preventing devices are being used by the large plants voluntarily. The campaign against the smoke nuisance does not affect them. From an economical point of view they are doing away with belching chimneys. They know too well that great clouds of drifting smoke indicate poor economy of operation through imperfect combustion. The smokeless stack is an indication of careful firing and perfect combustion.—George Ethelbert Walsh in Harper's Weekly.

"Scrip" and Its Use.

A subscriber recently inquired as to the variety of land scrip issued by the government that is still in use, and as to where and on what lands it can be used. There may be some others, but the list below covers the scrips still available, though there may be some small exceptions:

Northern Pacific ltu scrip takes any surveyed timber or agricultural land in states that the N. P. railway passes through.

Santa Fe scrip takes surveyed non mineral government land in any state.

Soldiers' Add'l scrip uncertified takes any surveyed non-mineral land in U. S. and in Alaska can be located on unsurveyed land.

Soldiers' Add'l recertified, used principally for townsites. Final receipt issued at once.

Valentine or Sioux Half Breed takes either surveyed or unsurveyed land.

McKee or Girard scrip takes any public lands of U. S.

Porterfield takes land inside the corporate limits of a town.

After Ten Years.

Mr. G. L. Stephenson, of Petersburg, Ont., says: "For over ten years I suffered constantly with Piles first itching, then bleeding; pain almost unbearable; life a burden. Tried everything in vain till I used Dr. Leonard's Hem-Roid. "I had taken but a few doses when I began to notice an improvement I decided to keep on, and now after using three boxes I am glad to say I am completely cured. My general health has also greatly improved. It gives me great pleasure to recommend Hem-Roid to all sufferers with Piles, and I feel convinced that what it has done for me it will surely do for them."

Price \$1.00. Dr. Leonard Co., Niagara Falls, N. Y., Proprietors. Sold by Dr. S. C. Stone, Salem.

Chinese Imperial Telegraphs.

In view of the present tendency of the Chinese to assume the management and control of the railroads and other important business enterprises, a resume of the annual report of the imperial telegraph administration, prepared by F. D. Cloud, student interpreter at the Shanghai consulate general, contains some interesting items:

Originally this system of telegraphs was a private concern organized by wealthy Chinese officials and gentry, but some eight or nine years ago the general government took control of the company, allowing certain merchants to retain their shares, increased the capital and secured a monopoly of the business throughout the empire. Under government management the system is approaching a tolerable degree of completeness and usefulness. Of late years, also, it has been paying good dividends, amounting to 10 per cent in 1906, and this, too, in the face of rather large extensions of the system.

The total receipts of the system for the year were \$1,597,176 United States gold, made up of the following items:

From commercial business, \$879,994; official business, \$98,058; from general business, \$619,124. The total expenditure for the same period were \$951,639, as follows: For the maintenance of the superintendent general's office, \$34,252; maintenance of general office, \$37,198; running expenses of the various stations, \$429,888; expenses in connection with official business, \$20,910; all other expenses, \$429,391.

According to the showing the gross profits for the year were \$645,537, and that, too, from a working capital of \$1,232,000. And after paying the government royalty of \$129,807 the administration was still able to pay the private shareholders a dividend of 10 per cent; all of which goes to show that the telegraph, like the railway, has come to be regarded by the Chinese as a public necessity, and likewise the telegraph, like

Sleep And Rest

Every movement of the body consumes energy. So does mental effort. Energy is supplied by the nerves. It follows that physical or mental exhaustion simply means an over-draft on the nerves. Nature restores energy through rest and sleep. You cannot sleep with tired nerves. Dr. Miles' Nervine soothes the irritation and restores nervous energy.

"Although I have lived nearly 78 years, I have stood up against testimentals for publication, but the unexcelled excellence of Dr. Miles' Restorative Nervine, as a medicine for inherent insomnia, intensified by long residence in a high altitude compelled me to recognize its superiority over every other medicine I have ever used for nervousness and sleeplessness. I feel sure that the Nervine is free from injurious opiates found in most medicines for insomnia, and can conscientiously recommend it to the aged and nervous." MRS. W. H. FURSMAN, Colorado Springs, Colo.

Dr. Miles' Nervine is sold by your druggist, who will guarantee that the first bottle will benefit. If it fails, he will refund your money.

Miles Medical Co., Elkhart, Ind

the railway, has a great future in China.

The telephone also, while still in an undeveloped state, is destined to play an important part in the development of the new China. Whenever the telephone has been used by the Chinese it has made a lasting place for itself, and at the present writing there are many systems in various parts of the empire being talked of and organized, many of which are certain to be installed, and since the Chinese do not manufacture telephonic or telegraphic supplies there should, in the near future, be an extensive market in China for this line of goods.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address: F. J. Cheney & Co., Toledo, Ohio.

Sold by all druggists, 75c. Take Hall's Family Pills for constipation.

His Proof.

A southern negro was brought into the courtroom, accused of stealing a neighbor's chickens.

"Mister George Washington Shintopp, did you steal those chickens?" asked the judge pointedly.

"No, sah, jedge; Ah is toe 'spectable fo' dat."

"But it is stated on good authority that a bundle of feathers was found in your back yard the day before Christmas."

"Dat 'sinnerashun, jedge, des proves mah innocence, coz how could de fadders be found in mah bacy yard de day befo' Christmas, when mah wife didn't pluck dose chickens untill de day after Christmas?"—Exchange.

Remedy for Diarrhoea—Never Known to Fail.

"I want to say a few words for Chamberlain's Colic, Cholera and Diarrhoea Remedy. I have used this preparation in my family for the past five years and have recommended it to a number of people in York county and have never known it to fail to effect a cure in any instance. I feel that I can not say too much for the best remedy of the kind in the world."—S. Jemison, Spring Grove, York county, Pa. This remedy is for sale at Dr. Stone's drug store.

Joaquin Miller and Jeff Myers have visited the Josephine caves, and have taken unto themselves the privilege of naming the different sections. It is needless to add that the name of Jefferson Myers was pasted onto one, and Joaquin Miller on another. Thus even in the bowels of the earth "the villain still pursues us."
