Consumption Maintains Industries.

The importance of the textile industry consists not merely in the fact that it provides clothing or material out of which clothing may be made for men, women and children, but also in the fact that it enables a great body of working people to earn their living—people who might otherwise have to go not only unclothed, but unfed.

A like comment may be made in regard to any other industry. It is, therefore, very fortunate that most of the products of labor perish in the using, for if consumption did not in the main keep step with production there would be a constantly diminishing, instead of a constantly increasing, demand for labor in the world.

Dr. Beattie Crozier, in a recent elaborate work on the "Science of Wealth," insists that economics is a dynamical, not a statical science, that it deals not so much with things as with processes. The old economists regarded wealth as a dead stick, the total length of which was diminished by just so much as it was consumed at either end, whereas in point of fact consumption plays an indispensable part in the creation and maintenance of the industries that are the sources of wealth.

"For who," he asks, "will go on producing unless some one goes on consuming, and consuming precisely to the extent of the production? If what is produced were not to be consumed, it would go bad or turn moldy and sour. * * Or if, on the other hand, it were permanent, like the pyramids (and the world, having once had enough of it, were satisfied, and require no more), it would cease to be produced."

Of the mass of products which constitute consumable wealth by far the greater part can not be hoarded. If man has more than he requires for his own use, he can employ his surplus by distributing it as wages, getting in return not money, but labor. If, instead of employing it in that way, he converts it at once into money, which he saves, he does not thereby save wealth, in the proper sense of the word, but only certain claims on wealth—food and clothing, for example—and usually on wealth not yet produced. Wealth employed as wages takes the form of circulating capital; but when it is exchanged for tools, implements, machinery, or the means of production generally, it becomes what political economists call fixed capital, and may be regarded as a form of wealth which is really saved and practically permanent, and so permanently yields a harvest of other wealth to its possessors. And here, Dr. Crozier contends, we have the fundamental origin of all manufacturing profits, and of all the world's accumulated and growing wealth.

But it is not only fixed capital, but the industry in which that capital is employed, that constitutes permanent and unconsumable wealth, and it is by the introduction of new industries only that the hardships consequent upon overproduction in any given industry can be effectually relieved.—New Orleans Picayune.

The Island of Mitylene.
Consul E. L. Harris of Smyrna reports as follows relative to Mitylene,

the largest and most prosperous island of the Turkish archipelago:

The island, which lies off the coast of Asia Minor, has a population of 145,000, three-fifths of whom are Greeks. Its chief wealth is derived from the olive tree, the leading industry being the manufacture of olive oil and other products derived from it. The average olive crop amounts to 30,000 tons, valued at \$3,520,000. There are 80 oil presses, and 40 soap factories in Mitylene. Almonds are also largely exported.

The Gulf of Kalloni is renowned for its sardines. The mountains contain mines of marble, antimony and some coal, but are little worked. The warm baths of the island are celebrated throughout the Levant for their medicinal and healing qualities. It being claimed that they are especially good for stomach troubles, skin diseases, gout and rheumatism. The island has a good harbor, and in 1906 some 1400 steamers touched at that port.

The practice of usury in Mitylene has started a wholesale emigration to the United States. I have been reliably informed that out of 18,000 male taxpayers 600 between the ages of 18 and 25 have left for America. From the village of Hagiasas, in the center of the island, one-tenth of the whole population has left.

The movement is assuming such an alarming aspect that the Turkish government is now using its utmost endeavors to prevent this exodus. With few exceptions only men emigrate, which proves conclusively that it is the intention of these people to eventually return to the island after they have earned sufficient money in the United States to enable them to do so.

Don't Grumble

When your joints ache and you suffer from Rheumatism. Buy a bottle of Ballard's Snow Liniment and get instant relief. A positive cure for Rheumatism, Burns, Cuts, Contracted Muscles, Sore Chest, etc., Mr. I. T. Boggy, a prominent merchant at Wilford Point, Texas, says that he finds Ballard's Snow Liniment the best all round Liniment he ever used. Sold by D. J. Fry.

No Such Luck.

"Have you a friend with an automobile?"
"No. I wish I had."
"But I saw a beautiful car standing in front of your house yesterday."
"Oh, that was the plumber."—St. Louis Post-Dispatch.

The old Pennsylvania Dutch Dunderkard recommends "Hickory Bark Cough Remedy." Guaranteed to cure your cough, and guaranteed to be pure. Made from the bark of the shell bark or white hickory tree. For sale by dealers everywhere.

Didn't Always Refuse.

"I've tried to discourage Mr. Nervie from calling on you," snapped the stern parent, "but the young scamp refuses to be sat upon."
"Why, father, you do him an injustice," indignantly replied the dear girl.—Kansas City Times.

IS YOUR SLEEP REFRESHING

Or do you get up feeling just about as tired as when you went to bed? Nine times out of ten you can blame it on the stomach and bowels, but then there is one sure remedy for all such ailments, and that is

HOSTETTER'S STOMACH BITTERS

It will strengthen the stomach, open up clogged bowels, induce refreshing sleep and cure Dyspepsia, Indigestion, Poor Appetite, Constipation or Female Ills.

The Inscriptions of Sinai.

For some years past travelers in Sinai have noticed a number of curious inscriptions on the rocks in the wadis or valleys of the peninsula.

The earliest traveler to note and copy these graffiti was the Indian explorer Foster, who passed through the country on his way to the Far East in the early part of the eighteenth century. This traveler unhesitatingly ascribed them to the Israelites, who, according to his theory, inscribed them during their 40 years' wanderings.

Others again attributed them to pious pilgrims to Sinai, while some were of opinion that they were the work of shepherds. Against this last theory it was urged that few, if any, of the modern Bedouin or shepherds of the district can either read or write; how much less therefore those of the first and second centuries, to which date the inscriptions of Sinai belong. All these theories have been finally disposed of by the recent researches of Professor Euting, who has made a systematic examination of the whole district in which they are found, and has carefully studied and published the texts.

The real authors of these inscriptions turn out to have been Nabathean traders, who from time to time passed through the Sinaitic peninsula with their caravans to the markets of Egypt and Palestine, and who thus left behind them the records of their visits. The chief importance of the Sinaitic inscriptions lies in the fact that they represent the Nabathean on the one hand, and the one hand, and Neski Arabic on the other.

A Simple Cure for Piles.

Pile sufferers know that ointments and other local treatments sometimes relieve but never cure. They don't remove the cause.

There is a little tablet that is taken internally that removes the cause of Piles and cures no matter how long standing.

Ask for Dr. Leonhardt's Hem-Roid (a thousand dollar guarantee goes with every bottle.)

Hem-Roid is the discovery of Dr. Leonhardt, of Lincoln, Neb., one of the most distinguished and successful physicians in the western states. \$1.00 at druggists, or Dr. Leonhardt Co., Niagara Falls, N. Y., Proprietors. Sold by Dr. S. C. Stone, Salem.

One of the Happenings.

In a written examination on astronomy one of the questions was, "What happens when there is an eclipse of the moon?"

A student with rather a good knack of getting out of difficulty wrote:

"A great many people come out to look at it."—Trib-Bits.

Remedy for Diarrhoea—Never Known to Fail.

"I want to say a few words for Chamberlain's Colic, Cholera and Diarrhoea Remedy. I have used this preparation in my family for the past five years and have recommended it to a number of people in York county and have never known it to fail to effect a cure in any instance. I feel that I can not say too much for the best remedy of the kind in the world."—S. Jemison, Spring Grove, York county, Pa. This remedy is for sale at Dr. Stone's drug store.

Special Eastern Excursion rates.

Salem, Oregon.

The Magical City of Gary.

It is authoritatively announced that the United States Steel Corporation will invest additionally \$45,000,000 in the city of Gary. To those who do not know that Gary is a creation of that great steel corporation, designed as a home for an immense steel-producing plant, the foregoing sentence is not intelligible. This city, which is a consequence of these works, is built on a large tract of land on the shore of Lake Michigan, in Indiana, across the lake from the city of Chicago. In the works men by the tens of thousands are to be employed.

The city is intended to accommodate a population of 300,000. Without its building there would not be sufficient accommodations for the men employed in the works and for their families. So, with the wave of a wand, the magic of which is abundant capital, a great city is brought into being. Work was begun two years ago. Today what was then an arid sand plain bears a large city. Broadway, the chief thoroughfare, has been constructed in its length of three miles. For two miles it now has pavements and sidewalks of concrete, and for that distance is lined by blocks of business buildings ready for the dealers. By October 1st a sufficient number of houses will be completed in the residence districts to shelter 50,000 people. The sewerage, gas, electric and water systems are ready for use. And now at this stage of development, the corporation finds that it must appropriate \$45,000,000 more than its first investment of \$75,000,000, to be used in widening the scope of its steel plant.

There are other communities of a population of 300,000 and larger, indeed; but all of them are of natural growth and development. Never before in the history of city building has a city even approaching this population sprung into existence, as it were, overnight as has Gary. When it begins its municipal life it will do so on equal terms in all its equipments with those which have taken a hundred years in which to grow. It is, indeed, the marvel of the day.

It seems to be customary to call this a model city. In the term is suggested that new and advanced theories of sociology will be applied.

There have been such cities builded, and Pullman is a notable instance. Success has not attended them. There is no intention on the part of the steel corporation to make the city of Gary a model city in that sense. It will have a charter as other cities have. A municipal government will be established as in other cities. It will have its own self-government, and it must work out its own destiny, as other cities have—as Steelton, in Pennsylvania, the home of the Pennsylvania Steel Works, which it resembles except in size, has done. A few years ago the mayor of Steelton was a roller man in the works. A majority of the directors of the various banks were employees of the mills. The property of the city was, in the main, possessed by the employees. And they were all independent of the steel works. These conditions yet obtain. The expectancy of the great steel corporation is that similar conditions will obtain in Gary. That corporation wanted great works at that point. Its tens of thousands that would be employed must be housed, with their families. Hence the city of Gary. The corporation gives to it a fair start, and will sell its residential and commercial property willingly to those who will buy. It does not intend to assume paternalism.

It is a large-minded enterprise, which is not to be conducted in antagonism to American principles or to the American philosophy of development. It was a marvelous conception, and has been carried to fruition with marvelous celerity.—Brooklyn Eagle.

Don't Be Blue

And lose all interest when help is within reach. Herbine will make that liver perform its duties properly. J. B. Vaughn Elba, Ala., writes: "Being a constant sufferer from constipation and a disordered liver, I have found Herbine to be the best medicine, for these troubles, on the market. I have used it constantly I believe it to be the best medicine of its kind, and I wish all sufferers from these troubles to know the good Herbine has done me." Sold by D. J. Fry.
