## TO WATER GRANDE RONDE

### Great Irrigation Scheme Planned in Eastern Oregon

The water shed of the Grand Ronde valley are to be harnessed and the waters formerly tearing down the mountain sides and winding their way to the ocean will hereafter be distributed over semi-arid lands of the Grande Ronde valley; if not by co-operative organization then by the Grande Ronde Water company, a private organization.

One of the most gigantic irrigation schemes ever formulated in eastern Oregon, not excepting the Echo government project, is now well launched and it is optional with the land owners if this project shall be carried to completion or by many brains and tiny sums from many or whether the \$750,000 involved shall be financed by a private corporation.

History of the Project. Some time ago such land owners as the late Wm. Hunter, Walter M. Pierce, George Stoddard and others, saw the utter folly of allowing the water to go to waste and accordingly sent Engineer Berry up the river to measure the Meadow Brook possibility. This the engineer did and his recommendation this company was formed. To ascertain without a particle of doubt what the possibilities and limitations are, Colonel Young, the brainiest engineer on the coast was employed to compile figures and return data. This he did and elsewhere in this issue it is printed in full; a compilation of conservative and far-reaching figures.

There is information in it which every citizen should read. Since this movement has been semi-perfect, the Grande Ronde Boosters' association was organized, and the company has agreed that the rights can be converted into a co-operative company with every land owner as a stockholder, his perpetual rights to be obtained by paying a certain small amount each year until a sum not to exceed \$30 an acre irrigated, has been paid. After such time the rights are perpetual.

This without question is a proposition of propositions that the Grande Ronde valley has ever faced. According to the plans as fully described in the signed article by Walter M. Pierce, there is an abundance of water to be had.

Where in this project is greater than the Echo government reclamation project, lies in the fact that 2000 acres are to be reclaimed against Echo's 20,000 and the cost is less than half that expended

over there. Rather than tax each acre of irrigated land to something over \$50, this project can be carried through for \$25 an acre if 30,000 acres are to be reclaimed or at \$30 an acre if only 20,000 are reclaimed. The price of meat to all consumers.

The price of cattle to all breeders. The project is entirely too gigantic to be comprehensively handled in a limited space but one thing is certain one of the greatest irrigation projects of the age in this half of the state is to be consummated. The signed statement gives the figures complete and conditions whereby the boost club can take hold of the proposition and get together these land owners who have need for irrigation and form a company to float the necessary bonds; carry the project to completion by the expenditure of not to exceed \$750,000 and in ten years' time have perpetual water rights, water in abundance and no possible opportunity for the now much-evident water right litigation.—La Grande Observer.

**\$100 Reward, \$100.** The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address F. J. Cheney & Co., Toledo, O.

Sold by druggists, 75c. Take Hall's Family Pills for constipation.

**The Limit of Life.** The most eminent medical scientists are unanimous in the conclusion that the generally accepted limitation of human life is many years below the attainment possible with the advanced knowledge of which the race is now possessed. The critical period, that determines its duration, seems to be between 50 and 60; the proper care of the body during this decade cannot be too strongly urged; carelessness then being fatal to longevity. Nature's best helper after 50 is Electric Bitters, the scientific tonic medicine that revitalizes every organ of the body. Guaranteed by J. C. Perry, druggist. 50c.

**The Chronic Grouch.** "Ah!" exclaimed the optimist, "Isn't the sunshine lovely and bright this morning?" "Huh!" grunted the pessimist, "It is casting shadows somewhere."—Philadelphia Press.

## X-RAYS

That Spokane club wants 10,000 marriageable girls. Must be going to start a Mormon colony, for there isn't that many young unmarried women in excess of the unmarried women in the whole state. Maybe, though, the Spokane girls are not so attractive as some others.

Hood River is putting on airs over an apple that tastes like a banana. Who the dickens wants that kind of an apple anyway. If a man wants banana flavor, why not buy bananas.

Bishop Thoburn, in discussing the influx of Orientals, said: "I could place 5000 of them at once in this state if I could secure them. Now, if I can do this some one else is going to do it in the future." The good bishop overlooks the fact that when "someone else" tries that little plan someone else will have a little more trouble on his hands than he cares to handle. There are plenty of men who would import labor from hell, if they could get it cheap—but there are others.

### HERMISTON IS GROWING.

Many New Buildings Are Projected for This Fall.

According to reports from Hermiston there will be another big building boom on in the town this fall. Besides the new Baptist church and school, now in the course of construction, also a number of cottages on the east side, there will be 15 new residences put up on the west side of the town, and some new business houses.

It is predicted that before another year has passed that there will be double the population here that there is now, and there will be many new buildings here.

The homes to be erected this fall are to be mostly by people who expect to locate here and who have already purchased land in this vicinity, while some expect to get lands under the East Umatilla project.

## Seldom Wear Out

Dr. Miles' Anti-Pain Pills relieve pain—not only once, but as many times as it is necessary to take them. Many persons who suffer from chronic ailments find in them a source of great relief from the suffering which they would otherwise be compelled to endure. Their soothing influence upon the nerves strengthen rather than weaken them. For this reason they seldom lose their effectiveness.

"I am 62 years old and have suffered for 42 years from nervous troubles, rheumatism and neuralgia, palpitation of the heart, shortness of breath, sleeplessness, and pain around the heart. The Dr. Miles' Anti-Pain Pills have been a blessing to me. I don't know what I should do without them, and they are the only remedy I have ever used that either did not wear out in less time than I have been using them, or else the injurious results were such that I would be obliged to cease their use."
