

Is your baby thin, weak, fretful?

Make him a Scott's Emulsion baby.

Scott's Emulsion is Cod Liver Oil and Hypophosphites prepared so that it is easily digested by little folks.

Consequently the baby that is fed on Scott's Emulsion is a sturdy, rosy-checked little fellow full of health and vigor.

ALL DRUGGISTS; 50c. AND \$1.00.

THE KING GEORGE.

In the Deadly Wake of the Famous Old West Indian.

If you ever happen to be so fortunate as to take a trip down the west coast of Africa you'll be sure to hear of the famous old West Indian, King George. This yarn is backed up by the records of the British admiralty, so of course it is true. She was wrecked in the year 1789 during a hurricane that devastated the coast of Cuba and the West Indies generally. Every man, woman and child aboard of her was lost, and the ship herself was stripped to her top hamper, masts and spars and went drifting, a helpless wreck, "bawd to all disaster."

She was first reported by a ship of the same company some hundred miles north of the point where the storm is supposed to have struck her. Men were sent aboard her from her sister Indian and reported that she was sinking rapidly. After that she was never completely lost to sight for the best part of five years, when she vanished in a storm off the Grand Canaries. In that time she had drifted upward of 10,000 miles and had been the direct cause of at least four wrecks and the indirect cause of three more.

Her travels were strange enough, especially at that time, when the locations of the ocean currents were but vaguely guessed at by the most speculative of mariners. She journeyed northward and eastward from the Gulf of Mexico to the British Isles, and then, making a long curve, to the west coast of Africa. During all that time she was constantly reported by passing ships, many of which sent men aboard of her. At last the British government dispatched a man-of-war after her, with orders to blow her up. Instead the frigate ran on a reef and was wrecked. Another, the Daphne, was then sent out, but she encountered a slaving dhow and was sunk in the ensuing fight.

By this time the whole English speaking seafaring world was agog over the mystery. When a third warship was dispatched and in her turn ran high and dry on the beach superstition had its way, and the King George was allowed to proceed on her ghostly path in peace. She was reported a few times after that by passing merchantmen, then disappeared for good and all in a tornado that destroyed much besides the derelict. But her name is still a thing to conjure with in some parts of the world.—New York Herald.

What Is a Watt?

In the electrical world one hears and reads a great deal about "watts." The current is measured by watts; the machinery is rated by watts; lamps burn by watts. To the ordinary layman all this talk of "watts" is as mystifying as the death of the late Akhool of Swat.

The man to whom we owe the idea of the horsepower was a Scottish inventor, James Watt, and when the electric unit involving the idea of working capacity came to be formulated the name of Watt was chosen to indicate this unit, just as that of Volta has given us the term volt and Faraday the farad.

Watt considered that taking the average, a London dray horse was capable of doing the work of lifting 33,000 pounds through out foot of distance in one minute of time, against gravity. The introduction of this time limit, the minute, gave the unit of power or the rate of performing work. This or its equivalent has ever since been called a horsepower.

The electrical unit called the watt is capable of being represented in terms of the horsepower, and in that form it is perhaps more intelligible to those who are familiar with mechanical rather than with electrical expressions. The electrical watt is the product of volts multiplied by amperes, where the volt is the unit of electrical pressure and the ampere is the unit measuring the density or volume of an electrical current.

Careful experiments have demonstrated that 746 watts per second, are equal to 550 foot-pounds per second, or to state the equation in its usual form, 746 watts equal one horsepower. The form in which electrical power is generally sold is computed on the basis of kilowatt-hours. The prefix kilo comes from the Greek Chiliol, one thousand. A kilowatt written also k.w., is therefore 1000 watts. The kilowatt hour is the performance or work at such a rate that 1000 watts per second shall be delivered continuously for one hour.

The kilowatt-hour has a special interest for the man who has his office or house lighted by electric lamps, because the kilowatt-hour is the unit upon which the power and light companies base their charges.—Electric News Service.

FIRST SERIOUS SIGNS

Of Kidney Trouble Are Generally in the Back Says Authority

Take care of backache. A great many cases of kidney complaint are reported about here, also bladder trouble and rheumatism.

An authority once stated that pain in the back, loins or region of the kidneys is the danger signal nature hangs out to notify the sufferer that there is something wrong with the kidneys, which should receive immediate attention. Only vegetable treatment should be administered and absolutely no strongly alcoholic patent medicines, which are harmful to the meal and at bedtime.

The following prescription, while simple, harmless and inexpensive, is known and recognized as a sovereign remedy for kidney complaint. The ingredients can be obtained at any good prescription pharmacy and anyone can mix them: Compound Kargon, one ounce; Fluid Extract Dandelion, one-half ounce; Compound Syrup Sarsaparilla, three ounces. Shake well in a bottle and take in teaspoonful doses after each meal and at bedtime.

This preparation is said to restore the natural function of the kidneys, so they will sift and strain the poisonous waste matter, uric acid, etc., from the blood, purifying it and relieving rheumatism. Backache will be relieved, the urine will be neutralized and cleared and no longer a cause of irritation, thereby overcoming such symptoms as weak bladder, painful, frequent and other urinary difficulties.

This is worth trying and may prove just what many people here need.

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free. F. J. Cheney & Co., Toledo, O.

Sold by druggists, 75c. Take Hall's Family Pills for constipation.

Beauty at Zenith at Forty.

There is a beauty quite apart from youth—the beauty of the mature woman. Some there are that maintain that beauty does not reach its zenith under the age of 35 or 40.

The Real Value

If you have headache or neuralgia you want relief; want it quick. Dr. Miles' Anti-Pain Pills stop the pain in just a few minutes. But their real value lies in the fact that they leave no bad after effects. They do not create nausea or derange the stomach. Nothing can therefore take the place of Anti-Pain Pills for the relief of headache or other pain.

"Dr. Miles' Anti-Pain Pills do all that is claimed for them in curing headache and neuralgia. I was in Farmington and I had a fearful headache; the gentleman of the house said, 'Take one of my wife's Pain Pills,' and I did, and in less than one-half hour I felt as well as ever. I asked the name of those and he said Dr. Miles' Anti-Pain Pills. I purchased a box, and told my family I had found a great remedy—something to cure headache. My three daughters also used them. A thousand thanks for such a remedy."

MRS. JAMES BLACKBURN, 88 Summer St., Rochester, N. Y. Dr. Miles' Anti-Pain Pills are sold by your druggist, who will guarantee that the first package will benefit. If it fails, he will return your money. 25 doses, 25 cents. Never sold in bulk. Miles Medical Co., Elkhart, Ind.

In a measure this is borne out by the events of the antique past which may likewise be paralleled with instances of our own day. Helen of Troy appeared on the scene at the age of 40. Cleopatra was past 30 when she met Antony. Aspasia, married to Pericles when she was 36, was a figure brilliant in her world for 30 years after. When Diane de Poitiers was past 35 she won the heart of Henry II, and he put half her age. Anne of Austria was 38 when described as the most beautiful woman of Europe. Mme. Mar was heralded as the greatest of beauties at 45, and Mme. Recamier was at her best between the ages of 35 and 50. Mme. de Maintenon was 43 when united to Louis, and Catherine of Russia 33 when she took seat on the throne which she occupied for 35 years. All these women were world famed for their beauty and gave the lie direct to that toothless old saw which buzzes the power of sweet sixteen. The dew of youth and a complexion of roses it must be admitted sometimes combines in a face that is unmovable, irresponsive, utterly lacking in that expression which goes to the making of a perfectly molded visage.—The Bohemian for November.

DAIRY NOTES.

Pet the cows. Give them a little sugar with salt at first, then a lump of sugar now and then. Sugar will make a wild heifer gentle. Try it.

If you buy a new cow, give her sugar, and she will not try to break away.

Do not let any extra rush in farm work interfere with the regular milking hour.

If not milked in a reasonable time If not milked in a reasonable time the cow refuses to give down her milk.

The habit of holding up the milk can easily be formed by harsh treatment.

If the cow is made to feel comfortable and happy, she will pour the milk out to the last drop.

Don't put a calf in a pen by itself; animals suffer from loneliness.

Keep the calves growing. If stunted the first year there is a loss that never can be regained. Any animal that is worth raising is worth raising well.

Breaking the heifer to her dairy duties should begin almost with her birth, by accustoming her to obedience, confidence and kindly handling.

If the cover is left off the milk can, a piece of cloth or mosquito netting should be used to keep out the insects.

When salting butter add one tablespoonful of granulated sugar to 10 pounds of butter and notice the improved flavor.

If we sell our butter to private customers we should try to salt to the taste of each. This may be some trouble, but, after all we depend upon taste of our customers for our sales. If we miss the mark as to taste, we miss the sales.

Get butter to the consumers as quickly as possible after it is made. The fine, delicate aroma of freshly made butter is quickly lost.

Fill a silo this year. Try it once and you will never neglect it.—Farm Journal.

Be Charitable

to your horse as well as to yourself. You need not suffer from pains of any sort—your horses need not suffer. Try a bottle of Ballard's Snow Liniment. It cures all pains. J. M. Roberts, Bakersfield, Mo., writes: "I have used your liniment for ten years and find it to be the best I have ever used for man or beast." Sold by D. J. Fry.

A THOUSAND DAMES ON THE BALTOIC CAME AMERICAN MEN TO CLAIM. CAPTIVATING PEOPLE AND GAINING THEIR GOOD WILL AND CONFIDENCE IS OUR PERFECTION BAKING POWDER. IT IS CONSIDERED BY THE SEVEREST OF CRITICS TO BE THE FINEST BAKING POWDER EVER OFFERED THE PUBLIC FOR THEIR MONEY. IT IS WELL NIGH IMPOSSIBLE TO EVADE THESE FACTS ONCE YOU GET EPLEY'S PERFECTION BAKING POWDER AND GIVE IT A FAIR TRIAL YOU WILL COME TO THE CONCLUSION THAT OUR CLAIMS FOR SUPERIORITY ARE WELL FOUNDED. IT IS A HOME PRODUCT. FOR SALE THROUGHOUT THE VALLEY. MANUFACTURED BY C. M. EPLEY, SALEM, OREGON.

When You Feel "All Run Down" BEECHAM'S PILLS to restore health and strength to the overworked body and brain. The stomach relishes its food, the mind regains its poise, liver and bowels act properly, the sleep is refreshing after a few doses of the half-century old remedy. Beecham's Pills improve the general health and quickly Uppbuild Body and Brain

Call for Bids. Notice is hereby given that the undersigned will receive sealed bids for the improvement of Broadway from a point 518 feet south of the center line of Belmont street in a city to the center line of Norway street in said city, except a strip 4 feet wide in the center of said Broadway street, according to plans and specifications heretofore adopted by the common council of the city of Salem, Oregon, and now on file in the office of the recorder of said city. Said bids will be received by the undersigned at the city hall up to 5 o'clock p. m. of Wednesday, November 6, 1907. A certified check for 10 per cent of the amount of the bid must accompany each bid. The right is reserved to reject any or all bids. Dated at Salem, Oregon, this 11th day of October, 1907. W. A. MOORES, Recorder of the City of Salem, Oregon. 10-24-07.

Call for Bids. Notice is hereby given that the undersigned will receive sealed bids at his office at the city hall in Salem, Oregon, up to 7 o'clock p. m., of Monday, November 4, 1907, for the improvement of a strip of land seven feet wide in the center of State street in the city of Salem, Oregon, from the west line of Church street to the west line of Twelfth street in said city according to plans and specifications for the doing of said work now on file in the office of the recorder of Salem, Oregon. A certified check of 10 per cent of the amount of the bid must accompany any and all bids. Done at Salem, Oregon, this 11th day of October, 1907. W. A. MOORES, Recorder of the City of Salem, Oregon. 10-25-07.

CASTORIA For Infants and Children. The Kind You Have Always Bought Bears the Signature of Char. H. Fletcher

Dr. Stone's Drug Store. The only cash drug store in Oregon. It owes no one, and no one owes it; carries large stock; its shelves are loaded with drugs, medicines, notions, toilet articles, wines and liquors of all kinds for medicinal purposes. Dr. Stone is a regular graduate in medicine. He has had many years of experience in the practice. Consultations are free. Prescriptions are free, and only regular prices for medicine. Dr. Stone can be found at his drug store, Salem, Or., from 8 in the morning until 9 at night.

CHICHESTER'S PILLS THE GREAT URINARY BRAND. Lacked last year's success. Sold by druggists everywhere.

Why Wheat is Growing Dearer. Now what is the cause of this all-around increase? Well, it is to be found in the fact that while the number of people is increasing in the world at a very rapid rate, and while the use of wheat flour for bread is growing in popular estimation, the quantity of wheat grown is the world has not increased in the same ratio. In other words, while there were vast areas of virgin land in America upon which wheat was grown at a price that could not compare with the cost of production in a cultivated country, prices were bound to remain low. At that time the American farmer was prepared to take practically any price for his surplus wheat. To grow anything like a good crop of wheat now in the most favorably situated lands in America it is found necessary to what the farming community call "do the land better." This means that it is no longer possible to simply plow the land year after year, but that where wheat is still grown it is necessary to put the land under a succession of crops in order to maintain its fertility. It stands to reason, therefore, that now so much of this competition is withdrawn the price has automatically risen. The bulk of our wheat, as is pretty generally known, comes from the United States, but if my readers will only consider for one moment the enormous increase in the population of that country during the last ten or twenty years they will at once see that the quantity of wheat and flour required to feed the increased millions is prodigious, with the result that they now have very much less available for exportation than was the case a few years ago. This aspect of the question was most lucidly touched upon in a report of the department of commerce in Washington upon the food supply of the United States. The conclusions arrived at were that after the lapse of about three

years the whole of what is now the surplus production of the United States wheat fields would be required to feed their home population. That this will come about in the short space of three years one can hardly believe, but there is no question about the fact that everything points to such a conclusion. It may be ten years before the United States will cease to have any wheat available for exportation, but it is certain that we are rapidly approaching such a time. Taking the above salient facts into consideration, it will be seen that the price of wheat is bound to increase during the next few years, and will probably rise to 35c, to 40c per quarter. The extra cost of living will no doubt bear hardly upon many, but I cannot help thinking that it will be to the national benefit that wheat-growing should again prosper in this country. During the past 20 years great attention has been paid to the growth and development of live stock, but it would seem that it is once again the turn of the arable farmer. This is a national advantage, inasmuch as tilling the land needs two or three times the quantity of labor as compared with the same area under grass. It would solve to a great extent the question of the depopulation of the villages, and would maintain the physique of the British nation, which admittedly owes its strength and stamina to the countryman and not to the townsman.—London Chronicle.

Cures Winter Cough.

J. E. Gover, 101 N. Main St., Ottawa, Kan., writes: "Every fall it has been my wife's trouble to catch a severe cold, and therefore to cough all winter long. Last fall I got her a bottle of Horehound Syrup. She used it and has been able to sleep soundly all night long. Whenever the cough troubles her, two or three doses stops the cough, and she is able to be up and well." 25c, 50c and \$1.00. Sold by D. J. Fry.
