Teddy bear and "Teddy Webb,"

the comedian, made a team that it would be hard to beat. Webb is too well-known on the coast to require any eulogy here. It is sufficient to say that he played the part of Strawberry Strander, a Broadway favorite, in his own inimitable way.

Besides Teddy Webb, however, there were practically six other leading parts, and it would be hard to say that any one particular part was played better than another, for they were all excellent. Harry Girard, the composer of the music for the opera, Edward Martindale, Teddy Webb and Miss Agnes Cath Brown took the leading solo parts. "My Totem Pole," sung by Edward Martindale, made a great hit. Miss Brown, who took the leading soprano solo, has a very sweet and powerful voice, and she rendered her parts in a most charming manner, especially the song "Mother Did." The Teddy bear part, played by William Fables, was a treat to all present. Mrs. Sheldon's, "Anna Adair," principal song was "Good, Better, Best." Harold Vizard and Amy Leicester did their comedy parts very well.

The chorus did fine work, and the girls know how to wear their elegant costumes to the best advantage.

"The College Widow."

When you go to see George Ade's extremely diverting comedy, "The College Widow," which will be given by Henry Savage's players at the Grand theatre Tuesday, November 26, there is one point among many others, which it may interest you to study. Of course, you will be thrilled by the football match between the rival colleges, one of the most exciting and realistic ever put upon the stage; you will follow with deep attention the charming love affair between Billy Bolton, the half-back, and Jane Witherspoon, the college widow, and you will enjoy many a hearty laugh over the pranks of the students. But, watch, especially, how the characters stand out from the canvas, each a real and living personality. Take two instances. The speeches of "Silent" Murphy are extraordinarily few in number, perhaps not more than six in all. Then, Flora Wiggles, the boarding house waitress. She really has very little to do with the plot, no great "scene" or anything of the sort, but how we would miss her and her amusing eccentricities, if she were suddenly eliminated from the piece. As you think over the eccentricities of at least the two, you almost forget that you have only seen them beyond the footlights, and it seems as if they were people you had really met and know well.

SALEM H. S. TEAM IS OFF FOR THE FRAY

Annual Game With Eugene Will Be Played Tomorrow—Close Contest Expected.

The Salem high school football team left this morning for Eugene, where it will play in the big annual game tomorrow against Eugene high school. There has been much enthusiasm over this game, both in Salem and Eugene, and it promises to be a close contest. Chauncey Bishop will accompany his team from here and remain until after the game, putting the boys in the best possible condition. Two of Salem's strongest players will not be in the lineup tomorrow on account of sickness. They are Captain Farmer and Tackle Savage. This will somewhat weaken the team, but the boys expect to show Eugene up anyway. Jones, who has been out of the game for the past week, will step back into his old place at fullback for this game.

School dismissed this morning at 10 o'clock, and about 200 students were at the depot to give the students a glorious send-off with yells and cheering.

Salem line-up: Eyre, Watson, Hofer, Keene, Bellinger, Niles, Smith, Holman, Jones, Krebs, Richardson, Subb, Kay, Roberts, Lafkey, Benson.

Hold Rally This Morning.

The students congregated in the assembly room this morning at 10 o'clock and held a "jollification" preliminary to the game, and if "col lege spirit" counts the local team should have four touchdowns and a goal cinched already. Between the outbursts of applause and the "Ra-Ras" a parody on the oration of Patrick Henry was delivered by Miss Lola Cook, after which Howard Zimmerman rendered the address of Mark Anthony in burlesque of the Eugene gridiron braves. Probably one of the most amusing features of the jolly-up was the eleven "Eugene's" ghosts, which appeared as Albert Eagan, in poetry, gave a verse for each of the Salem high school team. As the stanza was given the ghost representing the respective opponent would come forth and with groans express to the students his condition after the pig-skin rush is over.

Game Postponed.

Seattle, Wash., Nov. 22.—Out of consideration of the fact that the Idaho-Washington game will be played on the State University campus Thanksgiving afternoon, and also from the fact that Athletic park field is really so short to carry on a successful and well-ordered struggle, the football game between the Berkeley, San Francisco and the Seattle high school teams has been postponed from the morning of Thanksgiving day, as had been announced, and will play on the varsity campus Saturday afternoon following Thanksgiving day.

Gans and Nelson Disagree.

Minneapolis, Minn., Nov. 22.—Joe Gans and Battling Nelson met this morning to arrange a fight for the lightweight championship of the world. The negotiations were declared off, but it is believed that another meeting to discuss the terms will be had.

ADDING TO THE APPEARANCE AND USEFULNESS OF PAINT

Curled and warped shingles on roofs of suburban and country houses are a common but not a pleasing sight in all parts of the country where buildings are covered with wood. Shingles warp and curl because after a wetting—and they get many—the upper side dries first. In a few years the roof leaks, decays, and must come off. Many years ago farmers made what they called their "ever lasting" roofs of white pine, cedar, and black walnut shingles, free from sap, rived with a frow, and shaved with a drawing knife. Such shingles can not now be had, for the fine straight grained timber necessary for their manufacture is scarce and very expensive.

Formerly good wood was plentiful and shingles cheap. It costs more to replace a leaky roof now, and earnest search has been made for ways to check the warping and decay of shingles, and make the roof last longer.

The forest service has studied the shingle problem along with that of the preservation of farm timber. It is found that shingles treated with creosote by a special process which the service has invented, warp but little and decay slowly because water is kept out of the tissues of the wood. One such roof will outlast two or three a ft in the natural state to curl, spring leaks, and fall to

EMPEROR MENELIK OF ABYSSINIA.

Dusky monarch who has fallen in line with reform and issued a decree providing for a constitution and for a cabinet for his empire.

pieces. The creosote used is nothing more than dead oil of coal tar, but it keeps water from entering the pores of the wood and renders it immune to decay for a long time. A roof of that kind costs a little more at first, but it is cheaper in the long run. Woods which are usually classed as inferior, such as loblolly pine, beech, sycamore, and others which are quick-decaying, readily take the preservative treatment and are given a largely increased value.

The preserving apparatus is neither expensive nor hard to operate. One such outfit will serve several farmers. The main items are an iron tank (an old engine boiler will do) with preservative fluid in it and a fire under it, and another tank of cold preservative. The shingles or other woods to be treated are immersed for a sufficient time in the hot creosote, and then in the cold. Full details of the operation are given to applicants for information by the forest service at Washington.

Shingles are one of the most important lumber products in this country. Last year nearly twelve billions were made. Even this enormous number was a heavy falling off from the total of the year before. It is a significant fact that the chief source of shingle supply is now the forests of the far northwest, from which shingles are brought even to New York. The eastern sources of supply are not able to meet the eastern demand. It is therefore fortunate that shingles are so easily given a preservative treatment by which their life is lengthened.

Many handsome residences in all parts of the country have their sides and gables covered with shingles. This architectural use often calls for staining or painting in harmonious colors. Such coloring is less frequently seen on roofs, where it does not last long, because rain washes it off.

The forest service has been experimenting in this field, also, and has found that stains may be carried into the shingles, along with the

Cooper Mays Internal Parasites Cause Much Suffering Everywhere

The following remarkable statement was recently made by L. T. Cooper. It concerns the preparation which has been so widely discussed throughout the country during the past year, and has sold in such enormous quantities in leading cities:

"It is now a well-known fact that wherever I have introduced my New Discovery medicine, hundreds of people have brought internal parasites, or tapeworms, to me. In many cases these people did not know the nature of the parasite, and were consequently extremely nervous until I explained the matter to them. In some cities so many have had this experience that the public generally became alarmed.

"I take this opportunity of explaining what these creatures are, and what I have learned about them in the past.

"Tapeworms are much more common than would be supposed. I venture to say that ten per cent of all chronic stomach trouble, or what is known as a 'rundown' condition, is caused by them. An individual may suffer for years with one of these

great parasites and not be aware of it.

"Contrary to general belief, the appetite is not greatly increased—it only becomes irregular. There is a general feeling of faintness, however, and a gnawing sensation in the pit of the stomach.

"People afflicted with one of these parasites are nervous and depressed. Their chief sensation is one of languor, and they tire very easily. Lack of energy and ambition affect the body, and the mind becomes dull and sluggish. The memory becomes not so good, and the eyesight is generally poorer.

"The New Discovery, in freeing stomach and bowels of all impurities, seems to be fatal to these great worms, and almost immediately expels them from the system. I wish to assure anyone who has the experience just related with my preparation, that there is no cause for alarm in the matter, and that it will as a rule mean a speedy restoration to good health."

The Cooper medicines are a boon to stomach sufferers. We sell them.—J. C. Perry.

preservatives by the new process. The coloring matter is mixed with the creosote reaches every fibre which the creosote touches, and lasts as long as the creosote lasts—and that is a long time. Such a stain does not easily weather out, whether on walls, gables, or roof. It is expected to prove much superior to the old way of staining or painting the surface only.

Lucky Find.

A Highland woman was once getting up a children's day entertainment to consist of dialogues, etc., and had another woman help find the dialogues, according to the Viddette. The helper broke into her house one day with high glee. "I have found one that is just a dandy," she said. "It is called 'Romeo and Juliet,' and is written by a man named Shakespeare."—Kansas City Journal.

Bring Me Your Old Gold Jewelry

And exchange for new up-to-date pieces. We will allow you its full value. Our goods are marked in plain figures, and an honest trade will be made. This is a good time to select choice pieces for the coming holidays also. You pay a small deposit, and we will lay it away for you.
