THE FIGHTING CAPACITY OF AMERICAN SHIPS

Army and Navy Life says that unfair and short-sighted criticisms have been made of our battleships, and have needlessly caused great alarm. It adds: This much is certain: We have never departed from that successful old American policy of having our war ships more heavily gunned than ships of the same class of all other foreign navies. This is absolutely so with the ships of Admiral Evans' fleet. Ship for ship, no foreign ships of the same dates should be well satisfied with their battleships. War ship building is a progressive science, and our naval constructors have never marked time. We have every confidence that the many superiorities which characterize our present war ships will be perpetuated in their successes.

A NEW MINERAL AND SOME OF ITS USES

Consul F. W. Goding writes from Newcastle that in the Tinaroo district of Queensland has been discovered the valuable mineral rutile, hitherto of no commercial value. It is a titanium dioxide, containing from 70 to 93 per cent of titanic acid, chiefly depending on the quantity of iron present. Pure rutile contains 98 per cent of titanic acid and 2 per cent of iron, when the mineral is a crystalline substance resembling sealing wax. The examples found in Queensland contain 70 per cent and resemble wolfram, having a lustrous fracture and being uneven in the grain. The specific gravity of rutile is 4.2; it cannot be scratched with a knife, but can be marked with a quartz crystal. The mineral occurs with wolfram and tin, running in veins through quartz and quartzite from a mere streak to large bunches, and is worth four times the price of wolfram at the present time.

The advent of flying machines driven by petrol motors at a very high velocity has proved that bearing and axles of ordinary metals submitted to at least 3000 revolutions per minute wear so rapidly and heat so quickly that the necessity has

varies in different localities, and which can best be settled by the government of the self-governing community interested."—Springfield Republican.

are their equals in gun power. And there is another thing that is certain: Compared with ships of the same dates, no foreign ships have anything like the thickness of armor that protects the guns and the crews in the turrets. And yet another thing: The boilers and machinery of our war ships have always thicker armor protection than contemporary foreign ships have. The great cry is made that the tops of our armor belts are too near the water line, and that our guns are not high enough placed above the water. This is true, but to accomplish these ends we would have to give up our superiority in armament; and it should be remembered that in each of our ships we still have good protection above the main belt.

The designs of our war ships have always been better than those of foreign ships. Our turrets are much better protected, and as a consequence our great guns will fight longer. The machinery is better protected, which results that the motive power is much less liable to damage in battle than that of foreign ships. On the whole, Americans

arison for some metal to stand the strain and velocity without wearing or heating, and this has been found in the metal (titanium), of which rutile is the purest ore. Samples of rutile which were tested in Sydney gave very satisfactory results.

COFFEE

Poor coffee has to be sold in bulk, it isn't worth packing.

Objects to Building.

The Southern Pacific company, in its answer to the petition filed with the railroad commission requesting that they be compelled to build a connecting track with the United Railroads from Jefferson street to Front in Portland, claims that the United Railroads is but a transfer road, originating no freight along its line and that it would be unjust to compel them to build a connecting road.

\$100 Reward \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

CHRISTIAN ENDEAVORER'S

Eugene, Or., Feb. 21.—(Special.)—The eighteenth convention of the Oregon Christian Endeavor union began its sessions here last night with a meeting filled with good addresses. Nearly one hundred delegates registered the first day of the convention, and many more are expected tonight.

The Eugene merchants have decorated the stores and show windows in fine shape, and the Endeavors of the city have decorated with bunting and electric lights.

At the meeting last evening the address of welcome was delivered by President P. L. Campbell of the University of Oregon, who was responded to by Rev. A. A. Winter of Portland. The address of the evening was delivered by Rev. Luther R. Dyott, pastor of the First Congregation church of Portland, who spoke on the convention theme, "Always Abounding." It was a splendid address, ringing with the call to higher service.

The secretary's report was as follows:

My Dear Fellow Endeavorers:

My report to you must in the necessity of the case be brief. At the convention held in Corvallis two years ago, Rev. D. A. Thompson was elected to the office of president, but in a few weeks had to resign on account of ill health. The executive committee then selected Rev. L. M. Boozer, my worthy predecessor, who served the Endeavors of the state in that capacity until last July when, on account of his removal to our neighbor state of Idaho, he, too, resigned. The interim between that time and the present has been filled by the present incumbent.

During the seven months that have now elapsed, our efforts have been directed principally to three things, (1) To get into touch with the various district officers and their work; (2) To secure a correct and official register of all the societies in the state, and (3) to make arrangements for this convention.

After urging a reorganization of the district unions, he makes the following recommendations:

Our states ought to share in the joys and privileges that will come to Endeavorers when the headquarters building for the United Society is erected in Boston. To bring this to completion the "Builders' Union" was organized during the international convention at Seattle last summer and a superintendent has been appointed for it. Oregon has been asked to raise one thousand shares at \$5 each for its share, and I would be glad to see this convention appoint some one to be our superintendent for this work.

Then, too, our state ought to swing into line in the "Increase and Betterment" campaign. "The fields are white to harvest"—new societies ought to be organized, old ones ought to be rejuvenated, and each and every district line of Christian Endeavor activity ought to be re-enforced and pushed to a larger and better service for "our Lord and Master." In the words of another, "We can do it if we will."

We believe that the department of Junior Christian Endeavor in our state organization ought to be enlarged to include the intermediate societies also.

The executive committee believes it to be a good plan that in the choice of vice presidents, one should be chosen from each of the denominations affiliating in the state union.

Many lines of activity are pressing in on every hand crying to be given their share of attention. How we long to answer, and, perhaps, ere long we can. "That future is as bright as the promises of God." Its ways are bright with promise, its possibilities are great. Souls are hungry for the fellowship of Christian men and women. The world is calling for you and me. "Let us then be up and doing"—going forth during the next biennium to the grandest era Christian Endeavor has even seen in our state.

Respectfully submitted,
C. T. HURD.

Today the delegates have been in conference all the forenoon, and have heard from the work in China through Rev. Mr. Walker, a returned missionary. This afternoon the delegates are visiting the campus of the University of Oregon, and from four to six will meet in an informal reception.

For Rheumatic Sufferers.

The quick relief from pain afforded by applying Chamberlain's Pain Balm makes it a favorite with sufferers from rheumatism, sciatica, lame back, lumbago, and deep seated and muscular pains. For sale at Dr. Stone's drug store.

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

GENUINE CASTORIA ALWAYS Bears the Signature of

Chas. H. Fletcher.
