UIT GROWERS ORGANIZE

Union county fruit growers have organized in a company, which is to have a capital stock of \$50,000, of which \$1000 has been actually subscribed, for the purpose of protecting fruit interests here and up the coast.

The subscribers hereto, in order to reduce the expense of finding a market, and to secure the best obtainable for our fruits, agree to the fruit specified in connection with our signatures, on the following conditions: When the signature number ten or more variety of fruits pooled a list shall be called and those who shall elect from among them an executive committee to be elected a chairman, secretary and treasurer. They shall through their secretary secure for the fruit pooled and at proper time a meeting of all the members of the executive committee shall be called to consider the various propositions the secretary may present. The action of a majority of the members of such committee shall be binding upon each member of the pool. The payment of fruit delivered by us shall be to us individually or to us as the officers of the executive committee according to the best arrangements the executive committee shall be able to make. The expenses of marketing each pool shall be deducted from the last payment made to the members of such pool and according to the amount of fruit sold by each. One executive committee shall represent and be the all the pools. Each pool formed shall add a member to its number to the executive committee. If a less number than powers on any particular pool this paper and their combined efforts of sufficient amount, and if the executive committee sees fit to do so, the pool shall be handled as though there were ten members in such pool, except in representation of the board.

son, A. W. Mize and L. M. Gilbert. Later the committee selected Andrew Vercler temporary chairman and J. R. Shepard temporary secretary.

President Roosevelt Says. That outdoor exercise is needed by the American people. That's all rheumatism follow that advice? The answer is simple—use Ballard's Snow Liniment, and the rheumatism will go, leaving you as spry as a cat. Gives quick and permanent relief from rheumatism, neuralgia, lame back and all pains. Sold by all dealers.

Chinese Iron for American Market. In calling attention to the tendency in the Chinese empire toward the production of commodities heretofore imported and to getting a foothold therefor in foreign markets, Consul-General Charles Denby of Shanghai, deals at some length with the present and prospective exports of Chinese pig iron to the United States.

An occasional shipment of pig iron from China to the United States marks the beginning of a commercial movement which is worthy of attention. An American company operating a number of trans-pacific steamships under the British flag has the agency of the Chinese furnaces for the supply of the Pacific Coast. Occasional small quantities of pig iron are delivered at San Francisco by these vessels, as well as by the Pacific Mail steamships.

The only shipment to the Atlantic coast of which I have been able to obtain definite knowledge is a cargo of 1500 tons shipped on July 5, 1907, from Hankow direct to Brooklyn. The price laid down in Brooklyn is said to have been \$17.50 gold per ton, including the freight, \$4.75 per ton from Hankow to destination.

This event is indicative of such far-reaching potentialities that it merits the attention of the iron industries of the United States. The carrying of such a commodity as pig iron 600 miles down the Yangtze river, from Hanyang to the sea, and then 14,000 miles farther, via Suez, and laying it down at New York in competition with American products is in fact a striking instance of modern trade development. This of course, is only possible through the fact that ocean-going ships can reach Hanyang with eighteen feet draft at almost all seasons of the year, permitting the carriage of cargoes of about 2000 tons without trans-shipment, and to the fact that iron is found in great quantities in China, and produced under favorable conditions as to coal and labor.

The most promising ore fields in China are situated in the vicinity of Hankow, lying in the provinces of Hunan, Hupeh and Kiangsi. Those of Shansi and Hunan, covered by concessions to the Peking syndicate, while regarded as of almost indefinite richness, have not yet been commercially exploited on a large scale. It is worthy of note that the Hunan and Kiangsi fields were explored by American survey party which in 1898-99 made the preliminary examination for the line of railway from Hankow to Canton, which an American syndicate had contracted to construct. The coke from the coal mines of Pinghsing, in Kiangsi, near the border of Hunan, and the ore from the adjacent iron mines are used for the manufacture of steel at the Chinese furnaces at Hanyang.

across the river from Hankow, at which are rolled the steel rails which supply the railways of China. The furnaces are under strong Chinese official management and their capacity has lately been largely increased with a view to obtaining a foothold in the markets of the United States.

Training an Esquimau Dog. The Esquimau begins to train his dog for sledge work before it is a month old. One of the most interesting features of Esquimau villages are the puppies led to the pole of a tent. They pull on the rope with all their puppy strength in the effort to break away and join in the frolics of their elders.

Not until a dog bred for mail service is one year old is it put in training for the trail. It begins by running ten miles with the team, then it is dropped out. Next day it runs the same distance. Gradually the distance is increased until it reaches its fifteenth month of life, when it becomes part of the regular service. The lift of a mail dog is from three to four years. No greater punishment can be inflicted than to lay a dog off from service. When amply they are often threatened with a lay-off, and with almost human intelligence they seem to understand the disgrace it implies in the eyes of their fellow-workers on the trail. All fight to be leaders. A constant spur to an unambitious dog is the "outsider," who will quickly take away the leadership not only in the mail service, but in teams maintained chiefly for the pleasure of the sport. The intelligence of the malamute is remarkable, its scent wonderful, its instinct, as a rule, unerring.

Some dogs are better trail followers than others, as some are better leaders. In a blizzard the best of them lose the trail, but invariably find it. When on the trail they never eat but once a day, then at the end of a journey. After feeding like weary children they fall asleep and are never quarrelsome. It takes on an average twenty pounds of food a day for a team of eleven dogs on a hard route.—Lida Rose McCabe in St. Nicholas.

COFFEE and tea; Schilling's Best, is sold by about 9000 grocers west of the Rocky Mountains.

Your grocer returns your money if you don't like it; we pay him.

A SKETCH OF SKINNER'S BUTTE From the Standpoint of a Student of Geology — Known as a Lacolith.

(J. E. Moore in Eugene Register.) This section of the country was formed by natural forces which absolutely preclude the idea of caves of any great extent. It is well known that caves are formed by underground streams in limestone countries, the water taking into solution the soluble carbonates or sulphates of lime and thus leaving large cavities in the earth, from which the water is afterwards shut off. This particular part of the coast country is almost entirely of igneous origin and rocks are of that character, with the exception of the sedimentary sandstone in the lower altitudes of the Willamette valley formed from the deposits of the brackish waters of an arm of the sea, which then covered this locality. The forces that must have been at work in the forming of the Cascade range and contiguous uplifts, staggers the imagination and the student of natural dynamics is almost overwhelmed the more he delves into the subject. The overflow of lava covering the region reaching far to the eastward from the summit of the range and also flowing down the western slope, is something simply remarkable. It is a geological demonstration to which the cataclysmists point with assurance in their controversy with the evolutionists. This lava flow, then, in a large measure the overlying rock of this whole section will be noticed by the drift, boulders and pebbles in the wash of the streams. During the period of its being forced from the interior of the earth, the whole crust was more or less heaved and broken by the tremendous energy exerted, (probably by the subsidence of the bed of the Pacific ocean) and there were many lateral fissures and cracks made at some distance from the line of the greatest pressure, the summit of the Cascades. Through these cracks and fissures there was forced through more or less molten fused matter and these formed the various buttes to be found scattered about over the valley.

There are many of them besides our Skinner's butte. Just across the river is the Gillespie butte. Further down the valley, many of them may be seen scattered about at irregular intervals, but all are the same general formation. The formation is known to geologists as a lacolith, and is made by the intrusion of fused matter up through

We Sell Vinol

on the positive guarantee that if it does not give satisfaction we will return the entire amount of money paid us for it. We mean this—and ask all those who are sick and need strength to try it with this understanding. G. W. PUTNAM CO.

sedimentary rocks, forming the humps, or buttes and from which the softer covering is more or less eroded. The surface cooling quickly forms a sort of blanket of amorphous igneous matter covering the done-like structure. The inner core cooling more slowly crystallizes into hexagonal prisms and contracts, leaving interstices between the columns, or lenticular formation, and also pulls away in places from the blanket above, leaving distinct hollows, or small cavities which give forth the sound which our people have noted, and reasoned that there was a cave inside the butte; and upon which we built up our "April Fool" story. It would be a waste of time and energy to put a drill into the butte for exploring purposes. There is no cave there of any considerable extent, but it will be found that the whole structure is the same as may be seen where there are now taking out the rock for crushing for our street paving. Large six-sided basaltic columns or prisms are standing on end, or nearly so, and fitting against each other in regular formation.

There are many of these peculiar lacoliths in many parts of the world, but the most notable example, perhaps, is the "Devil's Tower" near Sundance, Wyoming, which is a great wonder, visited by scientists all over the world. Like a monster stump covering 20 or 30 acres at the base, it rises to a sheer perpendicular height of over 700 feet and looks like a great pile of logs set on end, fitted together and bound by some peculiar force. It can be seen at a distance of 50 or 60 miles in any direction on the undulating surface where it stands; but is northwest of the Black Hills, South Dakota, and during their uplift, it was formed in much the same manner as our Skinner's butte and others in this locality, but as that is a much older country, geologically speaking, than this, there has been more erosion and it stands out more prominently.

There can be no question about the formation of Skinner's butte, for it is plainly nothing more nor less than a lacolith.

Kennedy's Laxative Cough Syrup acts promptly yet gently on the dol, through which the cold is forced out of the system, and at the same time it allays inflammation. Sold by all druggists.

Notice to Improve a Portion of Broadway Street.

Notice is hereby given that at the regular meeting of the common council held April 6, 1908, a resolution was adopted to improve Broadway street with full intersections, from the north line of North Mill creek to the north line of Madison street in the following manner:

By establishing a permanent grade on said street along the proposed line of improvement where not already established.

By placing the street railway track of the Oregon Electric Railway company where it extends along the proposed line of improvement in the center thereof.

By grading the roadway of said Broadway street between said points full width from curb to curb with full intersections to the proper subgrade.

The subgrade shall be one foot below the established grade and upon said subgrade shall be placed one foot of clean creek or river gravel, provided however, the space along the center of said street to be occupied by the said Oregon Electric Railway company shall be graveled in such a manner that the top of the rails of said company will be on a level with the established grade of said Broadway street.

The cost of placing said track in the center of said street and improving between the rails and one and one-half feet outside of the rails of the Oregon Electric Railway company, to be assessed on the franchise and property of said company.

The cost of said improvement, save and except the space between the rails and one and one-half feet outside of the rails of the Oregon Electric Railway company to be assessed on the abutting and adjacent property, as provided in the charter of said city.

Remonstrance against the above improvement may be filed within 20 days after the date of the first publication of this notice.

By order of common council. W. A. MOORES, Recorder. Date of first publication of this notice the 8th day of April, 1908. 4-8-101.

THE CLASSIFIED

FOR SALE Worlds of Bloom—Calla lilies, roses, violets, cinerarias, hyacinths, daffodils, etc., and everything in season. Mrs. Hugh Jory, 1952 Court street, Salem. 3-24-tf

I Want a Place—Of 25 acres or less; improved or partly so, close to Salem markets. This is for an immediate cash purchaser. Have also another customer who will give good value in stallions or brood mares for similar tract. I am unable to supply the demand for all kinds of property. Paul M. Sims, 222 North Commercial. 3-25-1mo.

Fine Property for Sale—In good market town on Southern Pacific, good schools and churches. One acre planted to all kinds of fruit, two-story, 8-room house (on solid foundation) with porches, closets and pantry, also two-story blacksmith and wagon shop and large barn. Will be sold reasonable, as owner is unable to work at blacksmithing. John Holm, Aumsville, Oregon. 31-2-1m\*

For Sale—First-class carpet paper at this office; 25c for a big roll.

Wood For Sale—Just received 2 cars of fine dry wood. Phone Main 74 or call at Salem Truck & Dray Co. office, 60 Cate St. 4-6-2wks.

For Sale—House and two lots in Fairmount Park. For further particulars enquire Mrs. M. S. Jones, end of South Cox line. 4-7-1 wk\*

For Sale—Second hand windmill, tank and pipes complete. Call 1503 E. State street. 4-11-1w\*

For Sale—Five-room house, barn 16 x 24, 2 lots, 4 cherry trees, 2 English walnut; variety of berries. Price \$1250. Salem Land Co., 484 Court St., phone 400. 4-10-31\*

For Sale—Five-room cottage, small barn, large lot, both well and city water. East front. Price, \$750; \$250 cash, balance on time. Salem Land Co., 484 Court St., phone 400. 4-10-31\*

For Sale—My modern 10-room home at the southeast corner of Oak and Winter streets. For particulars write me or call on Jos. H. Albert at Capital National Bank. F. A. Wiggins, Toppenish, Wash. 4-10-Weds-Sats.

For Sale—Fresh cow. Phone Farmers 14x5 4-10-31\*

For Sale—Polk county fruit land, near Monmouth, \$25 per acre; also farms, dairy and stock ranches. We have fruit dryer, cannery and creamery. Come and see. J. H. Moran. 4-10-31\*

A Good Investment—A 7-room modern residence within 2 blocks of streetcar; 4 blocks to business center; easy terms if desired. Price \$2400. This is worth investigating. Insure your greater income than having your money in the bank or investing in U. S. gold bonds.

Here's Another Snap—5 acres close to Salem, about 1/4 mile to streetcar. A large 8-room house, barn, 45x45; about 40 fruit trees of different varieties; also small fruit building; can't be duplicated short of \$3000. If taken at once, price \$2500, one-half cash, balance time to suit. Call investigate and be convinced.

This Is Your Money's Worth—122 acres of rich valley land, 60 acres in cultivation, 30 acres fine piling timber, balance pasture; running water; good house, barn and out buildings. Only one-half mile from R. R. depot. Price \$60 per acre. See us about this. SALEM INVESTMENT CO. 432 State St. 4-10-tf.

FOR RENT For Rent—Suite of rooms with board. Mrs. Ed Lamb, 371 N. High street 4-8-1wk

For Rent—Two handsomely furnished rooms with bath and light and all conveniences. Call at 477 Center St., phone 1040. 4-7-1w

SASH AND DOOR FACTORIES Frank M. Brown—Manufacturer of sash, doors, mouldings. All kinds of house finish and hard wood work. Front street, between State and Court. Make all complaints at the office.

LIVERY AND FEED STABLES Livery and Feed Stables—Old Post office Stables, at 254 Ferry street, between Commercial and Front streets. Telephone 185. Some of the finest livery in the city can be found here. Dick Westcott proprietor. 10-1-1yr
