

POWERFUL DREDGERS OF LIVERPOOL, ENGLAND

It is claimed by leading English experts that the dredging since 1890 of the River Mersey and its approaches has been one of the most continuously successful undertakings of that character in the history of marine engineering. As the port of Liverpool is used by vessels of the deepest draft, it is very important that the entrance channels at the bar and the approaches to the docks and the landing stage where the ocean liners embark and disembark their passengers should be maintained at all stages of the tide. The Mersey docks and harbor board, for the purpose of overcoming the sand accumulation, in 1890 instituted suction dredging, which has been so satisfactory that the board has since then largely increased the size and powers of their dredgers, and recently has given an order for the construction of a dredger which will be the largest and most powerful ever built. The contract provides for a vessel which can lift 10,000 tons of sand in 50 minutes, and attain a speed, if necessary, of ten knots. The dimensions of the dredger will be as follows: Length, 478 feet over all; 69 feet beam, and 30 feet 7 inches in molded depth.

The dredger is now nearing completion, and when finished will have a hopper capacity of 180,000 cubic feet, which is to be filled from a maximum depth of 70 feet in 50 minutes, and as the total load displacement will be about 18,000 tons, exceptional strength will be a prominent feature of the hull and jointing of the dredger, and the shell plates will be three-quarters of an inch thick, 28 feet long, each weighting two and three-quarters tons, and the butts will be quadruple riveted. The dredger will have four centrifugal pumps, each of which will be driven by an independent engine, and when driven they will together lift the great quantity of sand mentioned. The propelling machinery will be of 3500 indicated horse-power, and will consist of two sets of inverted vertical direct-acting triple expansion engines, with cylinders 22 1/2, 37 and 61, and a stroke of 45 inches.

The engines for the propulsion of the dredger under way and for the pumping when at work will be supplied with steam from four single-

ended boilers of the multitubular type, sixteen feet internal diameter and eleven feet nine inches longitudinally. The boiler power is arranged forward of the hoppers and immediately behind the latter two pumping rooms are located, and still further back there are four single-ended boilers and the twin sets of screw-propelling machinery. There will be 21 water tight compartments, so that ample provision will be made for the safety of the vessel in case of an accident.

Each of the four pumps will have separate suction tubes fitted to the side of the vessel, and they will be provided with under-water apparatus controlled by the sluice valves inside the dredger. The tubes will be 42 inches in diameter, the suction being of the double inlet type. The sluice valves on the ship's sides will be operated by hydraulic power. Side frames will be fitted for each suction pipe. Swivel bands will be fixed to the suction pipes, so they may have free horizontal or circumferential motion during the swinging of the vessel. The delivery pipes will act into two landers, which will run the full length of the hoppers and will have inlets at each hopper.

There will be a marked advance upon the other types of sand-pump dredgers belonging to the dock estate in regard to the disposal of surface water. In the present type the surface water overflows from the hoppers over the docks and then over the sides of the vessel. In the new dredger this "deck swamping" will be obviated, as the overflow on rising above a certain height will find its way over two weir plates and then be provided with an outlet through two trunks immediately above the load line. The discharge valves are to be of cylindrical type, each having a list of four feet, and they may be raised or lowered by a direct-acting hydraulic ram, the hydraulic engine being fitted in the pumproom. The deck of the dredger will have four powerful steam winches for lifting the suction tubes, and four more winches for warping purposes, besides a powerful steam winch for the anchors. The winches will each be driven by a vertical two-crank engine.—Consular Report.

Deafness Cannot be Cured.
by local applications, as they cannot reach the diseased portions of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars free. F. J. CHENEY & CO., Toledo, O.

Sold by druggists, 75c.
Take Hall's Family Pills for constipation.

The Ultimate Destination.
(From the New Haven Union.)
Those 320 pairs of Hungarian pheasants that have been distributed among the eight counties will be duly appreciated by the 960 pairs of Connecticut henhawks that know a good thing when they see it.

The Most Common Cause of Suffering.
Rheumatism causes more pain and suffering than any other disease, for the reason that it is the most common of all ills, and it is certainly gratifying to sufferers to know that Chamberlain's Liniment will afford relief, and make rest and sleep possible. In many cases the relief from pain, which is at first temporary, has become permanent, while in old people subject to chronic rheumatism, often brought on by dampness or changes in the weather, a permanent cure cannot be expected; the relief from pain which this liniment affords is alone worth many times its cost. 25 and 50 cent sizes for sale by Dr. Stone's drug store.

Too Little Johnson.
(From the New Haven Union.)
It must be admitted even by his best friends that there was too little Johnson, if anything, at the Illinois convention.

When your food seems to nauseate take Kodol. Take Kodol now and until you know you are right again. There isn't any doubt about what it will do and you will find the truth of this statement verified after you have used Kodol for a few weeks. It is sold here by all druggists.

Mr. John Riba, of Vining, Ia., says "I have been selling DeWitt's Kidney and Bladder Pills for about a year and they give better satisfaction than any pill I ever sold." Sold by all dealers.

Biliousness and Constipation.
For years I was troubled with biliousness and constipation, which made life miserable for me. My appetite failed me. I lost my usual force and vitality. Pepsin preparations and cathartics only made matters worse. I do not know where I should have been today had I not tried Chamberlain's Stomach and Liver Tablets. The tablets relieve the ill feeling at once, strengthen the digestive functions, purify the stomach, liver and blood, helping the system to do its work naturally.—Mrs. Rosa Potts, Birmingham, Ala. These tablets are for sale by Dr. Stone's drug store.

For a burn or scald apply Chamberlain's Salve. It will allay the pain almost instantly and quickly heal the injured parts. For sale by Dr. Stone's drugstore.

The World's Best Climate.
Is not entirely free from disease, on the high elevations fevers prevail, while on the lower levels malaria is encountered to a greater or less extent, according to altitude. To overcome climate affections, lassitude, malaria, jaundice, biliousness, fever and ague, and general debility, the most effective remedy is Electric Bitters, the great alterative and blood purifier; the antidote for every form of bodily weakness, nervousness, and insomnia. Sold under guarantee at J. C. Perry's drug store. Price 50c.

The police have been doing business down at Portland and it looks now as if they were securing evidence which will convict Martin. It was decidedly shady for a while.

It Reached the Spot.
Mr. E. Humphrey, who owns a large general store at Omega, O., and is president of the Adams County Telephone Co., as well as of the Home Telephone Co., of Pike county, O., says of Dr. King's New Discovery: "It saved my life once. At first I thought it did. It seemed to reach the spot—the very seat of my cough—when everything else failed." Dr. King's New Discovery not only reaches the cough spot; it heats the sore spots and the weak spots in throat, lungs and chest. Sold under guarantee at J. C. Perry's drug store. 50c. and \$1.00 Trial bottle free.

There seems to be a reign of thugs down at Portland. It looks bad on paper.

Mr. John Riba, of Vining, Ia., says "I have been selling DeWitt's Kidney and Bladder Pills for about a year and they give better satisfaction than any pill I ever sold." Sold by all dealers.

BANNER IN LIEU OF PAY

Bakersfield, Cal., May 15.—Out of a school district squabble involving the board of trustees of Mojave and Miss Katherine Goghlan, late mistress of the public school there, has grown the arrest of the young woman on a charge of stealing the school's stars and stripes.

Miss Goghlan admits that the flag is in her possession; that she took it to give it a much needed mending. But the trustees have caused her arrest. The differences between them arose originally over the teacher's request for none instead of eight months' salary.

Use and Misuse of Coal.
At a recent meeting of the American Society of Mechanical Engineers, Professor W. F. M. Goss discussed the use and misuse of coal. Thus, in speaking about the methods of mining, he pointed out that the thin upper veins are neglected in order to first take out the better paying material from the thicker veins below. Dr. Goss also pointed out that coal that has slate seams or is high in sulphur is left below, and how much otherwise valuable fuel is destroyed by heavy and injudicious blasting. One particular point made by Dr. Goss will appeal to laymen; that is, the enormous quantity of coal used in modern locomotive service. In 1850 our production of coal was between 50,000,000 and 60,000,000 tons, while in 1906 it amounted to something more than 400,000,000 tons. Of this vast sum nearly 120,000,000 tons are burned in locomotives; in other words, the total annual consumption of coal by locomotives more than equals the entire output of twenty-five years ago. In Europe every possible effort is made to effect economies by the use of compounding or of superheaters, standing out in strong contrast with the practices of this country, where these means of saving are almost wholly disregarded, and emphasizing the distinction so often drawn that Americans are prodigal of material and saving of labor, while the foreign engineer reverses this, clearly indicating where the source of greatest saving exists on the two continents respectively. It is estimated that by the use of superheaters and of a more rational system of burning the coal, a total saving of from 25 to 30 per cent could be effected. This, with coal at \$1.50 per ton, would mean an annual saving to the railroads of about \$45,000,000. The figures are startling," says the Railroad Gazette, "and it is useless to raise the cry, more or less sneering, that we have plenty of coal. That there is a limit no one can deny, although exhaustion does not stare us in the face this year or next, or in the next decade. But no matter how rich we may be, reckless extravagance is not the course of wisdom."

Bad Attack of Dysentery Cured.
"An honored citizen of this town was suffering from a severe attack of dysentery. He told a friend if he could obtain a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy, he felt confident of being cured, he having used this remedy in the West. He was told that I kept it in stock and lost no time in obtaining it, and was promptly cured," says M. J. Leach, druggist, of Wolcott, Vt. For sale by Dr. Stone's drug store.

An Observation.
The man who has the softest snap (It's always nothing rash) is he who's almost always sure To have the most hard cash.

Whooping Cough.
"In February our daughter had the whooping cough. Mr. Lane, of Hartland, recommended Chamberlain's Cough Remedy and said it gave his customers the best of satisfaction. We found it as he said, and can recommend it to anyone having children troubled with whooping cough," says Mrs. A. Goss, of Durand, Mich. For sale by Dr. Stone's drug store.

A Happy Father.
Is soon turned to a sad one if he has to walk the floor every night with a crying baby. McGee's Baby Elixir will make the child well, soothe its nerves, induce healthy, normal slumber. Best for disordered bowels and sour stomach—all teething babies need it. Pleasant to take, sure, and safe, contains no harmful drugs. Price 25 and 50 cents per bottle. Sold by all dealers.

The Knock-out Blow.

The blow which knocked out Corbett was a revelation to the prize fighters. From the earliest days of the ring the knock-out blow was aimed for the jaw, the temple or the jugular vein. Stomach punches were thrown in to worry and weary the fighter, but if a scientific man had told one of the old fighters that the most vulnerable spot was the region of the stomach, he'd have laughed at him for an ignoramus. Dr. Pierce is bringing home to the public a parallel fact; that the stomach is the most vulnerable organ out of the prize ring as well as in it. We protect our heads, throats, feet and lungs, but the stomach we are utterly indifferent to, until disease finds the solar plexus and knocks us out. Make your stomach sound and strong by the use of Dr. Pierce's Golden Medical Discovery and you protect yourself in your most vulnerable spot. "Golden Medical Discovery" cures "weak stomach," indigestion, or dyspepsia, torpid liver, bad, thin and impure blood and other diseases of the organs of digestion and nutrition.

The "Golden Medical Discovery" has a specific curative effect upon all mucous surfaces and hence cures catarrh, no matter where located or what stage it may have reached. In Nasal Catarrh it is well to cleanse the passages with Dr. Sage's Catarrh Remedy fluid while using the "Discovery" as a constitutional remedy. Why the "Golden Medical Discovery" cures catarrhal diseases, as of the stomach, bowels, bladder and other pelvic organs will be plain to you if you will read a booklet of extracts from the writings of eminent medical authorities, endorsing its ingredients and explaining their curative properties. It is mailed free on request. Address Dr. E. V. Pierce, Buffalo, N. Y. This booklet gives all the ingredients entering into Dr. Pierce's medicines from which it will be seen that they contain not a drop of alcohol, opium, triple-refined glycerine being used instead. Dr. Pierce's great thousand-page illustrated Common Sense Medical Adviser will be sent free, paper-bound, for 21 cent stamps, or cloth-bound for 51 cent stamps. Address Dr. Pierce as above.

HOTELS AND RESTAURANTS.

The White House Restaurant
For a Regular
25c Dinner at 20c
They can't be beat.
