SPECIAL DELIVERY

For convenience of subscribers branch delivery offices are established at the following places at 35 cents per month, \$1.00 for three months: Asylum Store, F. G. De Vos & Son, Asylum Avenue Junction, Carlin's, Seventeenth street, A. W. Lane, Garden Road Street, Daue's Store, Alex. Daue, South Commercial street, Electric Store, C. M. Eppley, East State street, Fairgrounds Store, Harrison Doe, Fairgrounds Road, Howell's Corner, Twelfth and Cross streets, O. K. Grocery, A. A. Englebart, Twelfth street, Wheeler's Store, W. D. Wheeler, Highland avenue, Yew Park Store, F. G. Bowersox, Twelfth and Leslie, Lane Grocery, Seventeenth street, J. L. Moore & Son, corner Capitol and Union streets, West Salem Store, West Salem, Zian's Confectionery, 478 State street, Dr. Stone's, 241 North Commercial street, Huffman's Store, North Sixth street, German Bakery, corner Twelfth and Chemeketa.

square pallade of zinc plates enclosing about three-quarters of an acre. Behind it the French gardener and the women who lease the land have wrought what looks like a sheer miracle to any one unacquainted with the system.

The ground is all covered with inverted bell glasses of the kind known in Europe as clochers. Under each bell at the time this writer visited the farm were five lettuce. Lettuce were growing around the bells and other vegetables sown broadcast were coming up everywhere. In each of a number of frames four feet square were 30 lettuce, a mass of carrots and cauliflower.

The entire secret of the growth of these products before the regular season is in the cropping and the soil. Every inch of the soil bears at least three crops a year, each of them antcipating the season and therefore producing fancy prices.

This remarkable method of making every inch of land count is described in detail by the writer and the article is illustrated with very interesting photographs.—H. D. Jones in Technical World Magazine.

SNOW TO COOL THE DELEGATES TO CONVENTION

(Special to the Journal.)

Denver, June 30.—Preparations for the Democratic national convention entertainment include one of the most remarkable spectacular displays of snow that has ever been seen in the summer months in any section of the United States. Sixty miles from Denver there are snow fields that contain an immense amount of pearly precipitation that has survived the heat of summer. The altitude at which it is found is nearly 12,000 feet above the sea and the snow is found there all summer. It is proposed to bring down 50 carloads of this snow to the Democratic national convention and mingle a breath of winter with the heat and humidity of summer.

There is a railway running from Denver to the snowfields and a special train leaving the mountains with a string of refrigerator cars loaded with snow would arrive at the convention city with scarcely any loss from melting. Indeed the character of the snow is such that it is much harder to melt than what is found in lower altitudes. The particles are almost as hard as sand and pure white, resisting the rays of the sun much better than the glistening flakes that are found in the ordinary snowstorms of winter. The absence of humidity in the rarefied Denver air provides against excessive melting, and the snow will last easily for 36 hours.

When the Elks held their convention in Denver the delegates were amazed at the presence of snow mingled with flowers which were hung at the paraders when the long procession moved through the streets. The Eagles had a similar experience, as did also the members of the Grand Army, and the success of these occasions has inspired the members of the Chamber of Commerce and the Convention league to make an extraordinary display of snow at the Democratic convention.

The management of this spectacular display expects to use fully 50 cars of snow, which will provide entertainment for the delegates for all the time occupied by the convention. The stock of snow will be replenished each day and the remarkable spectacle continued until the visitors are led to believe that the distant white caps of the Continental Divide which can be seen from the streets of Denver, are really much nearer to the city than they appear. The snow spectacle will probably be the most unusual sight ever witnessed by any similar gathering in the country and will be enjoyed as much for its cooling suggestion as for the novelty of the incident.

An Automatic Money Sorter.

Consul Joseph L. Brittain reports from Prague that a recent issue of an Austrian journal gives an account of an automatic money sorter, which is thus described:

The inventor claims that it will assort metal coins which have been thrown together regardless of their denominations, placing each denomination in a separate basket. The various coins are thrown indiscriminately into a funnel at the top of the machine, and from the funnel they slide downward, alighting on a spiral track. This track has a protecting edge or raised border containing slits corresponding to the various sizes of the coins. As the coins of various denominations glide downward on to the track, through some peculiar mechanism of the machine they pass through the slits corresponding to their various sizes, entering their respective baskets at the bottom of the machine. It is said that several firms handling large amounts of coin daily have tried the machine with satisfactory results.

John W. Gates started his home town of St. Charles, Illinois, yesterday by kissing his old mother, paying \$10 to a barber for a shave, buying a \$25,000 farm for a friend, scattering quarters and dimes among the boys and taking a local boy to go to Europe with him—all in the space of five hours.

Every building but two in Pukawana, South Dakota, was destroyed by tornado yesterday. The damage will amount to \$100,000.

No failure is so pathetic as that which occurs within reach of the goal.

This woman says that after months of suffering Lydia E. Pinkham's Vegetable Compound made her as well as ever.

Maudie E. Fergie, of Leesburg, Va., writes to Mrs. Pinkham:

"I want other suffering women to know what Lydia E. Pinkham's Vegetable Compound has done for me. For months I suffered from feminine ill so that I thought I could not live. I wrote you, and after taking Lydia E. Pinkham's Vegetable Compound, and using the treatment you prescribed I felt like a new woman. I am now strong, and well as ever, and thank you for the good you have done me."

FACTS FOR SICK WOMEN.

For thirty years Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, has been the standard remedy for female ills and has positively cured thousands of women who have been troubled with displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, that bearing-down feeling, flatulency, indigestion, dizziness or nervous prostration. Why don't you try it?

Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health. Address, Lynn, Mass.

-SMILES-

Build the Salem, Dallas and Falls City railroad.

Those Ewatt school boosters are of the right sort to make things go.

Salem's Fourth of July as usual will surpass anything in the state.

A piece of folly—setting all those telegraph poles inside the cement walks. The wires should go under ground on Commercial street.

Fine hay weather.

It is the height of audacity for the Oregonian to even discuss the question of constitutional salary of state officials. It ridiculed the flat salary law. It told Furnish to spit on that plank in the platform, and it cost the Republican party the governorship. Then the Oregonian stood in with the machine to defeat the flat salary law going into effect for four years, and that cost the taxpayers at least \$400,000. The Oregonian is not casting stones at Governor Chamberlain who did all in his power to have the flat salary law go into effect.

A. I. Vorys of Columbus, Ohio, would be a very fit man for national chairman of the Republican party.

There is a boom on for Chamberlain for vice president. He is worse needed right here in Oregon as long as the people can keep him here.

COFFEE

Your grocer must sell poor coffee; we can't all be comfortable; but he needn't sell it to you.

Your grocer returns your money if you don't like Schilling's Best, we pay him.

Have you met the "Hot-enough-for you?" Bend yet?

Blessed is the town that bloweth its own horn.

Here's where the "I scream" man gets in his deadly work.

Don't imagine that you are indispensable—there are others.

After Once Tasting

Vinol

No one wants an old-fashioned cod liver oil preparation or emulsion, because Vinol is a much better body-builder and strength creator for old people, weak children, and for coughs, colds, bronchitis, etc. If it does no good we will return your money. G. W. PUTNAM CO.

New Corporations. Articles of Incorporation were filed in the office of the secretary of state June 30, 1908, as follows: The Wise Dental Company; principal office, Portland; capital stock, \$75,000; Incorporators, W. A. Wise, M. A. Wise and H. A. Sturdevant. The Hornsey Land and Orchard Company; principal office, Hood River; capital stock, \$1,000; Incorporators, Ralph C. Grimm, Geo. C. Perdue and Fred L. Mills.

Commencing June 22nd and until further notice, the following train service will be in effect on the line of the C. & E. R. R. between Albany and Yaquina, daily except Sunday:

Table showing train schedules for Albany and Yaquina.

On Sundays the service will be as follows: Lv. Albany 7:35 a.m.; ar. Yaquina 11:40 a.m.; Lv. Yaquina 6:00 p.m.; ar. Albany 11:30 p.m. WM. McMURRAY, Gen. Pass. Agent.

CHICAGO GERMAN COLONY NUMBERS 500,000

A German colony of over 500,000 inhabitants rivaling in size all the three largest cities in the "Waterland" now forms a part of Chicago. According to figures recently compiled this community has been growing so rapidly during the past few years that there are now more persons of German birth or parentage in Chicago than in any city in Germany itself, with the exception of Berlin, Hamburg and Munich. The only other city which approaches these figures is Leipzig, with a population of nearly half a million. The German-Americans in Chicago are of course scattered throughout the city, but the center of the community has been found in a special district on the North side. This German speaking province lies in the region bounded by Division and Clark streets and the river, and here the curious visitor may any day hear the language and see the customs of old "Deutschland" not to mention smelling the odors of every favorite German dish from sauer-braut to wienersurst. As if they bustling, roaring city were a thousand miles away instead of all about them, the citizens of this community live their lives of peace and content and seldom, if ever, do they venture far from their place of satisfaction. One old white-capped man, with his typical mustache that has not left the sanctitude of the colony but once, and that was when the lure of the World's Columbian Exposition drew him across the city to the fair grounds in 1893. The houses in this American-German Utopia are picturesque and above all comfortable, homelike and foreign. The houses are frame, set in narrow lots with tiny gardens containing old fashioned flowers and big easy chairs with an occasional hassock to assure of more solid comfort. The girls on Menominee street are not "girls" but "Maedchen" and after the day's work is over they sit and gaze down the street, while the old grandfather changes with his thoughts, the street from Menominee in Chicago to "Unter den Linden" in Berlin, and quietly puffs away the hours with the same obliviousness to surroundings as is evidenced by the sleek-coated, much petted cat which purrs in soft German accents on the porch by his side.

Putting a Nation's Legs.

Although the Japanese still labor under the stigma of being more imitators, they are conducting an experiment on a national scale which has no example in modern nations and which for ambition to other nations is likely to match. The Japanese see that they are smaller than Occidental people, and consider themselves disadvantaged by the fact. They propose, accordingly, to add a cubit or two to their stature. It is by no means agreed among physiologists that there is even a fair chance of success in this undertaking. Some maintain that their smallness is a racial trait—an inherent condition not to be changed at a word. The Japanese themselves prefer to consider that their size is the result of habit or diet, and will proceed on that theory. The sedentary classes of Japanese spend their lives squatting on their heels. It is noted that the shortness of the Japanese lies in their legs rather than in their trunk, and they conceive that chairs for their parlors, counters for their stores, and in general a wider use and freedom for their legs will give length to these members. True, their craftsmen, farmers and laborers are not noticeably taller than the rest, but these have lived the lives of overworked cattle so many centuries as not to be considered fair examples.

Irritation of the throat and hoarseness are relieved immediately by two or three little swallows of Kemp's Balsam, the best cough cure. Grip patients should make a note of this.

Farming by the Square Inch.

This is the story of a remarkable solution of the secret of success in farming on a small scale, chiefly for the benefit of those who cannot afford to buy large tracts of land and would not be able to work them if they could. To pique the curiosity of the reader let it be first explained, in all seriousness, that if a farm cultivated in this way is leased it should be understood that when the tenant moves he is at liberty to take the soil with him.

The soil used in this method of farming must be of unusual richness. The story begins with the efforts of two women to gain a livelihood from mother nature. They leased five acres of land in Berkshire, England. Later they found that five acres was too much land and that they could find full work for themselves and for students who flocked to them to learn how it was done, with profit to all, on a piece of ground less than half the size of that first taken.

The teachers of the women were a French gardener and his family, who, with an acre of land in France, sold \$2500 worth of produce in a year. The scene at the farm is thus described by one who visited it: In a bare plowed field stands a

Every Mother Knows This Remedy

Jayne's Carminative Balsam has for four generations been recognized everywhere as the standard remedy for Dysentery, Diarrhea, Cholera Morbus, Cholera infantum, Cramps, Colic, and all Summer Complaints.

DR. D. JAYNE'S CARMINATIVE BALSAM

is just as safe as it is effective. It stops pain immediately, and almost invariably brings about a speedy recovery. Its remarkable efficiency has made it a household necessity wherever there are children.

Sold by all druggists—per bottle, 25 cents.

Jayne's Tonic Vermifuge—a gentle and effective tonic for both adults and children. Splendid for overcoming the exhaustion consequent upon a severe attack of dysentery. A safe Worm Cure.

DEPOSITORS in the savings department of the Capital National Bank are requested to present their pass books for the purpose of having credited the semi-annual interest due July 1. JOSEPH ALBERTS, Cashier
