 BRING ON THAT LARGEST
 OF ALL CHERRY TREES

This paper had a story of a cherry tree seven feet in circumference and now comes a man with a tree that knocks the other alleged biggest cherry tree silly. C. W. Scott who has 100 acres of the old Estes place three miles east of the city as the crow flies, that measures nine feet around the smallest part of the trunk, and 11 feet at the largest. It is the Bill Taft of all cherry trees in this part of Oregon—unless a bigger tree shows up—and any committee is welcome to come out and use the tape line. It bears one-half Blug and one-half Royal Anne. We would like to hear some more big cherry tree stories and also how large a yield was taken this year off a single tree.
