OREGONIAN IS FOURTH IN SHOOT

AT CAMP PERRY, O.

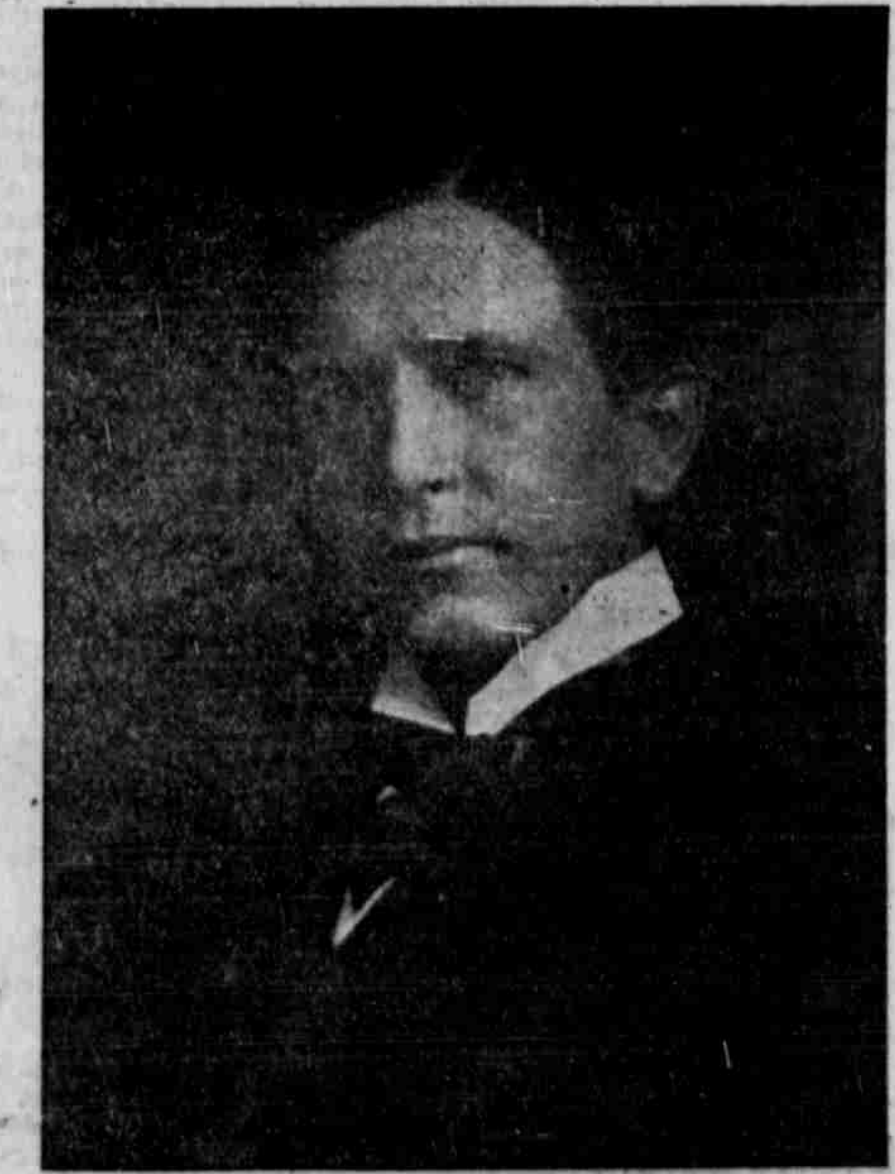

(United Press Lined Wire.)
Camp Perry, O., Aug. 21.—With a score of 299 in a field of 277 other contestants, B. E. Shields of Oregon, has won fourth prize in the President's contest, the closing event in the National Rifle association's tournament. Sergeant A. Brest, of the United States infantry, won first prize, Captain F. W. Allen of Massachusetts, was second and third place was given to Lieutenant S. A. Harrie. Brest's score was 304.

PERSONALITY OF LEE WILLARD

Scarcely had Mr. Lee Willard, actor, arrived in town this morning when he was sought out by a Journal reporter and induced to talk about things in general and about himself in particular. Whatever else they may expect in the production of "A Poor Relation" tonight, local theater goers are assured of one thing, and that is that they will see in Mr. Willard a polished, intellectual gentleman with a well-developed appreciation of the artistic, and one who will do his best to sustain the worth and dignity of his profession.

Mr. Willard has the good fortune to be possessed of a striking physical appearance and a charming, wholesome personality. He has a great deal of modest reserve, and is frank and outspoken to a surprising degree.

When the actor made up his mind to go on the stage he just naturally went on, and began at the lowest round of the theatrical ladder. "I began as a super in the mob scene in Richard Mansfield's "Scarlet Letter," said Mr. Willard. "That was ten

Mr. Willard who appears at the Grand tonight in "A Poor Relation."

years ago. Since then I have played most everything from small bits in a stock company to leading man in Daniel Frohman's touring company in "The Christian."

This was three years ago, and was Mr. Willard's last engagement as a leading man. Since then he has been at the head of his own company.

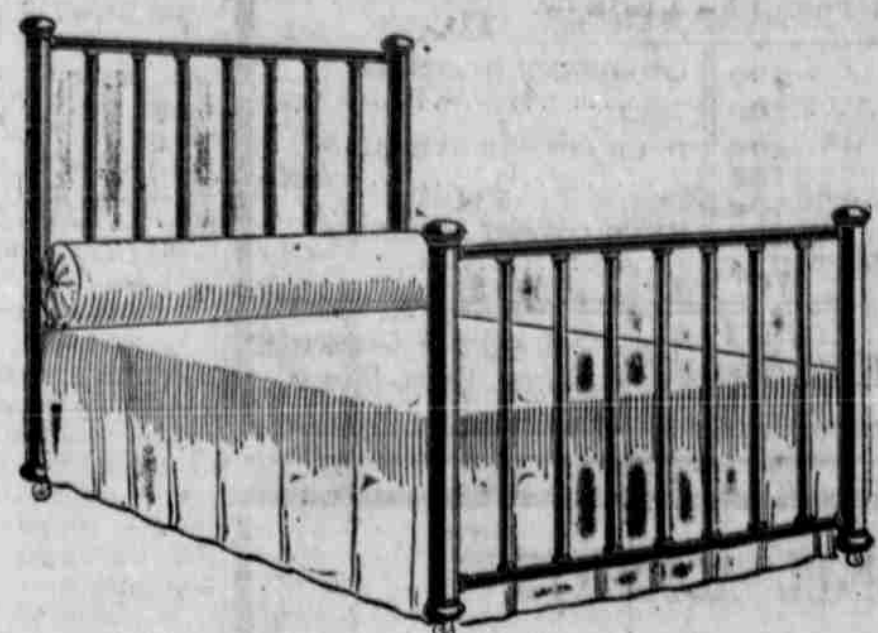

Mr. Willard thinks he is better in character roles than in any thing else, and Mr. Willard certainly ought to know. In this case theater goers ought to be able to get a large measure of enjoyment from "A Poor Relation," in which the actor appears in the character role of the country squire.

MEYERS' HEARING SET FOR SEPTEMBER 10
Judge Bushey today set September 10, as the date for the appearance of Jos. Meyers to show cause why he should not have a guardian appointed.

POSITIVE PRICE REDUCTIONS

WHEN YOU BUY HOUSEFURNISHINGS WILL YOU LET US HAVE THE OPPORTUNITY OF SHOWING YOU HOW WELL WE CAN SUPPLY YOUR WANTS AND HOW SURELY WE CAN SAVE YOU MONEY. WATCH OUR ADS. WE ARE THE PRICE MAKERS. THE STORE THAT DOES NOT ADVERTISE HAS NO PROMISES TO LIVE UP TO, BUT THE BUSINESS THAT GIVES ITS NEWS TO THE PEOPLE IMMEDIATELY SETS FOR ITSELF A STANDARD WHICH IS CONSTANTLY PROGRESSING. OUR ADVERTISEMENTS ARE PLAIN PROMISES GIVEN THE PUBLIC TO SUPPLY MERCHANDISE OF CERTAIN QUALITY AT CERTAIN PRICES. IN FULFILLING THESE PROMISES WE ARE CONSTANTLY GIVING BETTER VALUES AND BETTER STORE SERVICE.

This Superb Brass Bed \$26.00

Regular \$36, Special Removal Sale Price \$26

WE WANT YOU TO KNOW THAT YOU DO NOT HAVE TO PAY FANCY PRICES FOR BRASS BEDS. JUST THINK OF A HANDSOME BRASS BED EXACTLY LIKE CUT, HAS HEAVY TWO-INCH POSTS AND VASES TO MATCH, SEVEN EXTRA HEAVY FILLING RODS AND FINISHED SATIN.

Buren & Hamilton

HOUSE FURNISHERS

HOUSEWORK MAY BE DONE WITHOUT EFFORT.

Modern Labor-Saving Devices Make Home Keeping Easy.

It is folly to ignore the existence of labor-saving machines for housewives, says the New Idea Woman's Magazine for September. Once in a while a woman is found who "prefers" to do things in the old way. This often means an ignorance of new methods and sometimes sheer perversity.

First, there is the carpet-sweeper for easy sweeping of the center rugs and a dust-cloth mop for the painted or stained floors. Most sensible women prefer a rug that can be moved, as carpets are unsanitary and a good deal of trouble.

Woodwork should be painted often enough to give it a smooth surface to keep clean; and there are so many excellent rules for cleaning paint, and so many household powders and cleansing fluids that are invaluable, that foolish indeed would the woman be who did not employ one or more of them to aid her in cleaning.

There are simple washing fluids and powders that, used with care and discrimination, help greatly in starting the dirt. If one's wash is large, a washing-machine should be employed, and one of the household ironers or small mangles is equally indispensable if the ironing is large and composed of many pieces. There are so many little ways that help also in preparing the work: a patent sprinker for clothes, which saves the tiresome dipping of one's fingers in water, and this in winter, is a great help.

In cooking, there are endless aids to work, some of which appeal to some women, some to others. There are the fireless cookers, the gas and oil stoves that save the heat of the hot range in summer, the steamers that save gas in preparing meals over one burner and cooking utensils that prepare vegetables and help one in having everything dainty and attractive on the table. There is a bread machine, a cake machine and patent boilers that make whipped cream and mayonnaise dressing but child's play to make. There are dish-washing machines, and for those who do not care for this innovation the work may be greatly simplified by a deep drainer, and care in having the dishes soaked in water before washing them in plenty of hot suds and draining until the drying is as nothing.

The new passenger depot at Albany will be dedicated November 3, Salem next.

Destruction of a Samoan Island.

The wonderful volcano that came into existence on the island of Savaii, in the Samoan group, three years ago next month, has burst again into tremendous activity, surpassing all its earlier performances. Reports received late in June say that the incessant flow of lava is one of the greatest on record and amounts to between 2000 and 3000 tons a minute.

Spreading out in an almost continuous sheet about eight miles wide and with a depth of six inches to six feet, it is flowing to the sea, dropping over the cliffs into the water with many incidental explosions and great clouds of steam. Attacking parts of the northeast coast not reached by the earlier eruptions, it is destroying many houses and another exodus of the natives to the southern part of the island has occurred.

All the Samoan islands together are about as large as the state of Rhode Island. Savaii, the most western, except for a little rock or two, is the largest of them, having more than half the total area. All the islands are volcanic, but for many generations the natives had seen no active volcanic phenomena. Only a few years ago Reclus said the volcanoes of Savaii were probably the latest to become extinct.

Though the largest of the islands, Savaii is far less important than Upolu, where Apia is a port of call for Pacific steamers. On Upolu the larger part of the population and industries is centered. Most of Savaii, however, is still covered with dense forest, and there are very few settlements excepting along parts of the coast.

It is supposed to have been about 150 years ago that the last signs of volcanic activity were seen in Savaii. The natives of today believed themselves perfectly secure and many of them had never heard of such a thing as volcanic action, though a line of lava cones extends from end to end of their island. But in 1902 an old crater about ten miles west of the present scene of activity suddenly burst into violence. The rising lava had forced out the plug that closed the crater vent and there was an exudation of molten rock. It was not a very large eruption, for the stream was less than half a mile wide and two miles long. Then all was quiet again. Only sulphurous vapors were emitted from the crater and the excitement among the natives subsided till it was rekindled by a remarkable occurrence in a wholly unexpected quarter. About eight miles inland from the

northeast coast was a deep wooded valley to which the natives often resorted for hunting. There was no eruptive cone in this valley, and it was one of the solitudes of the island. Suddenly on the night of August 4, 1905, the natives in the coast settlements felt a severe earthquake shock which was recorded on the seismograph at Apia, far away, and a great light pierced the sky above the valley. Three craters had suddenly been opened in the valley, and red hot stones lava and ash were shooting high into the air and falling back upon the valley floor. This was the outbreak which continued, with periods of subsidence, through the rest of 1905 and most of 1906, attracting wide attention and completely changing the aspect of a wide extent of surface. The new volcano was almost quiescent in 1907, but it was merely gathering force for the tremendous outburst that is now in progress.—New York Sun.

APPEALS FOR VOTES

(Continued from Page 1.)

the will of the people and dwelt at length on Roosevelt's efforts to purge the country of corporation evils and called attention to the legislation that has been enacted in that direction.

Several special trains arrived during the morning bringing large crowds of Republicans from all sections of the state. The meeting was held at the baseball park and was opened with speeches by Congressman Slemm and S. Brownallen, U. S. administration to be an expression of marshal for the Staunton district.

Taft today made an appointment to meet a delegation of colored men from the National Baptist convention in Cincinnati, Sept. 23. The convention will be held in Lexington, Ky., Sept. 15 to 21, and the delegates will make a special trip to Cincinnati to meet the candidate in a body.

PRESIDENT CAMPBELL WEDS IN COLORADO

(United Press Lined Wire.)

Grand Lake, Colo., Aug. 21.—President Charles C. Campbell, of the University of Oregon, is today on his way to Sulphur Springs with his bride, formerly Mrs. Susan Campbell Church of San Francisco, to spend a few days honeymoon. The couple were married last night at Grand Lake.

When the fall term of the University of Oregon opens President Campbell and his wife will take up their residence in Eugene where the big institution is located.
