Milkstuf—Bran, \$25.
Flour—Valley, \$1.20 per sack; hard wheat, \$1.45.

FRED HAMILTON DIES IN INSANE ASYLUM

(United Press Leased Wire.)
Portland, Or., Sept. 3.—The friends of Fred Hamilton, once a famous football player of the northwest, are declaring today that their contention that he was mentally unbalanced when he broke into three downtown jewelry stores last July was proved yesterday by his death, from paresis, resulting from a blow on the head during a football game some years ago.
Immediately following his arrest on a charge of burglary efforts were made by his close friends to have him sent to an asylum, while there were those who said that leniency would be shown Hamilton because he had rich relatives. Mrs. Melville Dollar, his sister and wife of a wealthy steamship owner, living in San Francisco, engaged counsel and after an examination in court, Hamilton was declared insane and sent to the Mountain View sanitarium, where he died.

MADE FIRST "AIRSHIPS" AT ALBANY

(United Press Leased Wire.)
Portland, Or., Sept. 3.—John C. Burkhardt, whose airship experiments have created comment at Cornell, is one of the heirs of the rich Fallin estate here. He began his experiments at the age of ten years at Albany, Oregon, when his tissue paper balloon airships were successful to some degree. By the time he reached the age of 15 he had become so enthusiastic on the subject of aerial navigation that he experimented with small silk gas bags, large enough to carry a cat. Too heavy to make an ascension himself, he induced a playmate, William Crawford, now a resident of this city, who was much lighter in weight to make an ascent and was deeply grieved when his mother forbade the dangerous experiment.
A year or so later he constructed a miniature aeroplane which successfully carried dead weights and struggling cats and it is believed that his present machine is an outgrowth of that crude affair of his childhood. He removed to this city with his mother, after his father's death several years ago and continued his experiments here. His mother, who was a Fallin, died a short time later and Burkhardt, who had inherited a large share of the Fallin fortune went to Cornell.

MINES MAY BE TIED UP

(United Press Leased Wire.)
Helena, Mont., Sept. 3.—The industrial peace of Montana, Washington and Wyoming hinges on the conference begun here today between the coal mine operators and the United Mine Workers over the mooted question of a wage scale for the northwest. Failure to reach an agreement will mean a general strike affecting Montana and Washington, and will prolong the Wyoming tie-up that has held mining operations in that state at a standstill for several weeks.
Should a general strike be called in the three states it would mean a walkout of from 18,000 to 25,000 men and the coal output of the northwest would be cut off almost entirely. The miners in Washington are now working under protest and the situation has been threatening ever since the Wyoming operatives went out. If the conference today results in an agreement, the Wyoming dispute will be at an end and the miners in that state will be ordered back to work by the united leaders.

HILLSBORO LAD BLOWS HEAD OFF WITH DYNAMITE

(United Press Leased Wire.)
Hillsboro, Or., Sept. 3.—That Harold Christenson, 16 years old, held one end of a stick of dynamite between his teeth and applied a match to the fuse connected with it when his head was literally blown off yesterday, is the opinion of those who viewed the mutilated remains today.
During the absence of his parents the young man entered the powder house used by his stepfather C. Christenson, road supervisor, and when they returned they were startled by the discovery that one side of the house had been blown out. Investigation disclosed the mangled form of the boy, his head having been completely torn off and his body terribly mutilated. The parents are unable to attribute any reason why the boy was tired of life.

Shoots Husband's Assailant.

(United Press Leased Wire.)
San Jose, Cal., Sept. 3.—With his head blown almost completely from his body, William Barker lies in the morgue today as the result of the deadly aim of Mrs. Manuel Founts, who interfered in a quarrel between Barker and her husband. The woman discovered the men in combat and seizing an automatic rifle, emptied its magazine into Barker's body.
She claimed afterward that the shooting was accidental and that she did not know the gun was loaded. The tragedy occurred at the Floore ranch on the Alviso road near here where all three parties were employed as prune pickers.
According to Founts, Barker quarreled with him as to whether they should work on the following day. Barker drew a long knife and was in the act of attacking Founts when the man's wife appeared and put a fatal end to the fight.

UNKNOWN VESSEL IS WRECKED

(Continued from Page 1.)
a lumber schooner bound from the north and it is probably that she backed off after running aground and may have got away all right," said Captain Stitt today. "We found no signs of her except the lumber floating around on the water. We went over the coast line near here carefully and I think if she had been aground we certainly would have found her even though the fog was very heavy."
Captain A. R. Williams, the lighthouse keeper, found one of the latches of a schooner with the lumber that was sent ashore. There was nothing about it by which the ship could be identified.
The vessel went aground about 5:30 o'clock last evening when the fog was so thick it was impossible to see more than a few feet. There was no storm and the sea was not running high. The captain must have lost his way and gone far out of his course. When the lumber began to come ashore the alarm was given and the life saving crew went out. At first it was feared that the wrecked vessel might be the passenger steamer, Kilburn, of the Northern Pacific Steamship company, which was due here about that time but the great amount of lumber afloat proved that she must have been a lumber laden schooner from the north.
It is believed here today that the wrecked vessel is the steam schooner Fifield, owned by the Fifield Lumber company of Bandon, Oregon, which should have passed here on her way south yesterday afternoon.
The fog is still heavy and the fate of the ship is not yet certain. The revenue cutter Manning, dispatched from San Francisco last night will arrive today and make a more complete search.

San Francisco, Sept. 3.—The steam schooner Samoa, which passed Point Arena last evening about the time that the unknown vessel went aground there, arrived here today.

The captain reported that he saw no indications of the wreck and his first information regarding it was received at this port. The Samoa was thought last night to be the wrecked vessel.
Point Arena, Cal., Sept. 3.—It is reported here today that two horses have come ashore south of here and this indicates that the ship which went aground last night was lost.
Captain A. R. Williams, of the lighthouse, says that a distant shock was felt about half an hour before the lumber came ashore last evening and the failure to discover any trace of the vessel has led him to the belief that it was destroyed by an explosion. This, he says, would account for the horses coming ashore.
There is no doubt that the ship was a lumber schooner from the north, as there is a great quantity of lumber still floating about the scene.
The general opinion here is that the schooner backed off and continued her course, the explosion theory not being accepted.

JOHN D. OWNS

(Continued from Page 5.)
after the stock and financial affairs of the concern. Last October, when the Guggenheims were hard pressed he made them a loan of \$20,000,000 and since that time he has been in practical control.
With their usual astuteness the Rockefellers kept secret their relations with the Guggenheims by having the old board of directors of the smelting trust re-elected, with the addition of one man, Walter T. Page, who was himself a Guggenheim representative.
But the deal was engineered by James Phillips Jr., the confidential financial agent of the Rockefeller interests. It is thought their control of the smelter industry will soon be as absolute as that of the Standard Oil.

STATE NEWS

Two blocks of concrete sidewalk will be built in Hillsboro.
The 1908 class of Monmouth normal school has presented the institution with a marble tablet, denoting the date of the founding of the institution and other data, to be placed in a niche in the tower of the building 40 feet above the ground.
Heirs of Mack L. Sumerville, who died in Los Angeles recently, have taken the matter in hand and are investigating, suspecting that something is wrong owing to the old man's sudden death and the disappearance of valuable property. His relatives are of Eugene.

La Grande, Union county, is the first to organize a campaign club for Taft.

Mark Twain's New Country Home.

I had the pleasure of seeing Mark Twain's country house at Redding, Conn., a few weeks ago. "Innocence at Home," he calls it, was not quite finished, though in the main part of the building the paper was on the walls and the water was running in the pipes. There was, however, only one piece of furniture in the house, and that was the billiard table! Every one who knows Mr. Clemens knows he has two ingrained habits—smoking and billiard playing. Some of his friends things he smokes to excess, but, as he has pointed out to them, he never smokes more than one cigar at a time! The Redding house is very attractive. It is large—almost large enough for a small hotel; and it overlooks a lovely wooded valley. It might have been placed further up the hill to advantage, for now, while it gets the sunrise, a hill in front of the house cuts off the sunset view, and also the summer breezes from the south and west. The dining-room—the most imposing room in the house—opens out through French windows upon a tiled terrace, which, in turn, gives upon the wooded hills and a pergola running down to a large summer-house. Almost every bedroom has its own bathroom, and, to add the last touch of comfort, the house will be lighted with acetylene. At one end of the house is the billiard-room, at the other the library, and there is a small room which may be used as a breakwater to hold back strangers or business callers. There is no formal drawing-room. Mr. Clemens will have an ideal home, but it is miles from a lemon and up a very difficult road. Perhaps his place will be "self-contained" and have its own mechanics; otherwise he will have a hard time if a water pipe bursts, with the nearest plumber or ten miles away!

ROAD OPENS UP AGRICULTURAL DISTRICT

(United Press Leased Wire.)
Butte, Mont., Sept. 3.—Joy among the agriculturists in this part of the country is general today because of the completion of the Billings & Northern railroad to Laurel, Mont., opening up one of the finest agricultural districts in Montana. The road is a Hill enterprise and its completion marks the laying of the last rail connecting Great Falls and Billings.

IDENTIFY ROBBER SUSPECT

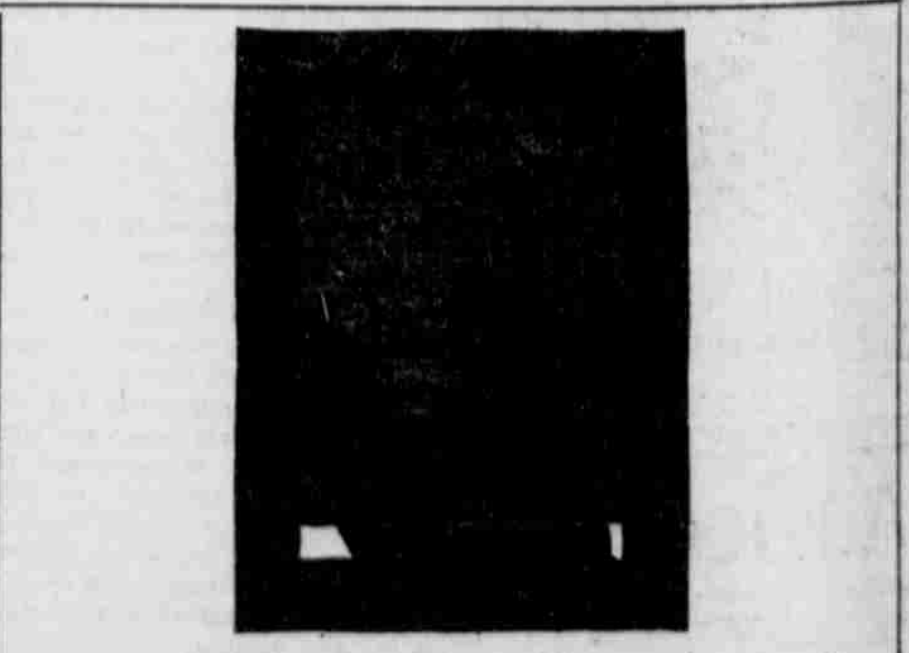

(United Press Leased Wire.)
Chico, Cal., Sept. 3.—Mate Jackson, who is under arrest here on the charge of holding up 15 lumbermen, with aid of an accomplice in a single night, was identified by the federal authorities today as A. Carlson, who is charged with robbing the Tillamook stage in Oregon on July 2. It

is understood that he will be indicted by the federal grand jury at Portland.

The theory has been advanced that Jackson, of Carlson, may have killed his partner, who helped him in holding up the 15 men here. The authorities claim to have evidence indicating this. It is known that bloody overalls were found in his possession after the crime. They procured several hundred dollars from their victims, over which they may have had a fight, it is said.

NEWS FROM HERE, THERE AND EVERYWHERE

France and Germany are at outs over the latter's act in recognizing Mulai Mahid, usurping sultan of Morocco.
Earl Poulett, of England, has been wedded to Sylvia Lillian Storey, gaily girl of the "Gay Cordons" and daughter of a famous comedian!
John C. Buckhart, of Portland, a Cornell university student, has perfected an aeroplane in conjunction with Arthur Trorlicht, another student. A trial flight yesterday brought the machine up to a height of 50 feet and it alighted without accident.
A special court martial has been ordered by President Roosevelt to convene at Fort Wayne, Ind., September 19 to sit on graft cases—particularly that of Colonel Daniel Cornman, commandant of Ft. Wayne.
Explorer Peary would now make an expedition towards the South Pole.

Are you a modest man?

Perhaps your neighbor doesn't think so.
Look into the thing—see if your bedroom shades are giving complete privacy.
BRENLIN, the new shade we are offering, is a substantial, closely-woven material, which really shades, and it hangs straight and smooth—doesn't wrinkle nor sag, doesn't crack.
All colors, several tones of each color, to harmonize with any color scheme.
Measurements taken accurately—orders filled promptly.
We are able to carry out any plan. Give us your order.
