

J. L. STOCKTON

The Old White Corner

A special offering of Fall Underwear at this season of the year might seem strange to you at first, but a second thought brings to mind that in only a few days Old Jack Frost will be sneaking around trying to get a slap at you. A big purchase of Union Suits direct from the mill enables us to offer real \$1.00 values for 75c. Had we bought these in less than original cases we could not sell them for less than \$1.00 a suit. See display in our Court Street Window

Heavy and Medium Weight

Union Suits 75c

Real \$1.00 Values

New Outing Gowns 50c to \$3.50

the operator desired. He made sharp turns, reversing the direction of the course with ease, and kept in the general movement around the parade grounds without any trouble whatever.

In all the machine circled the grounds 58 times.

Inventor Cheered.

As a large crowd of army officials and citizens watched the flight of the aeroplane Wright was cheered constantly as he sailed about.

At one time, just to show how easy it was, he turned the nose of the ship skyward, and sailed up until he reached a height estimated at 120 feet.

On account of the anemeter being out of order the exact rate per hour is not known, but the officials who watched it and timed the flight, estimate it at an average of 38 miles an hour.

The greatest enthusiasm is expressed by the army officials, who hail Wright as the greatest aviator the world has known, and say that his flight makes good every statement he ever made regarding the possibilities of the machine.

The performance of the Wright aeroplane this morning insures its acceptance by the government under the contract by which \$25,000 will be paid to the Wright brothers. The test today was not official, but it is not doubted that Wright can duplicate the feat at any time, and can make the 40 miles an hour, as required, very easily on a straightaway course.

Capt. Schwickardi Writes

RUDOLPH B. SCHWICKARDI.

"I Have the Fullest Confidence in the Efficacy of Pe-ru-na."

A War Veteran's Tribute to Pe-ru-na.

Rudolph B. Schwickardi, Capt. 89th N. Y. Vol. Inf., writes from 1818 G St., N. W., Washington, D. C., as follows:

"Having the fullest confidence in the efficacy of Peruna, both as a tonic and as a remedy for catarrhal trouble, I commend its use in the strongest possible terms. It should be in every household."

War Left Ailments.

Mr. William J. Lees, 8601 Morgan St., St. Louis, Mo., member Frank P. Blair Post No. 1, Grand Army of the Republic, and ex-Commander of the U. S. S. Benton Miss. Squadron, writes:

"The war left me with a complication of stomach, liver and kidney troubles, and I decided to take Peruna for my affliction. I began to use it about five years ago at the earnest solicitation of some friends. At that time I was only able to be up about half of the time, and my health was simply miserable. I consider a bottle off and on is a preventive. I certainly do endorse your remedy, and am glad to do so."

Helped From Chronic Catarrh.

Capt. Lemuel M. Hutchinson, Montpelier, Vt., writes:

"It gives me pleasure to write you this letter at this time on account of the good your Peruna has done me when I was quite done up with a very bad cold. I could hardly perform my ordinary

duties, but from the use of Peruna I am almost restored to health. I am quite convinced that it has helped me from chronic catarrh, to which I am subject. It has also benefited my throat.

"I can truly recommend it as the best all-round medicine it has been my privilege to become acquainted with.

"Of this I am quite convinced from my own experience."

Mr. W. C. Rollins, Prairie View, Texas, Secretary of the State Normal and Industrial College of Texas, writes that for years he had chills and fever, and after taking Peruna his appetite returned, he became stronger, the fever left him, and he is now in excellent health and vigor.

Pe-ru-na Tablets.

Some people prefer to take tablets, rather than to take medicine in a fluid form. Such people can obtain Peruna tablets, which represent the medicinal ingredients of Peruna. Each tablet is equivalent to one average dose of Peruna.

CATHOLICS

(Continued From Page 1.)

pope, a high mass is to be celebrated, according to the Greek rite, one day in the cathedral.

Albert hall, the largest auditorium in London, has been selected for a general meeting, a reception and men's meeting on three different evenings. The cathedral hall and Horticultural hall have also been selected for the sectional meetings and the reading of papers.

There will be two English sections and one French section. The archbishop of Paris will address the French section.

The program will open every week day with high mass in the cathedral at 9 o'clock. Sunday there will be a pontifical high mass at 10:30. The concluding ceremony of the congress will be at 4 p. m. It will include pontifical vespers, a sermon, the great procession of the Blessed Sacrament, Te Deum benediction and the solemn closing of the congress.

Gibbons Prominent.

Cardinal Gibbons is the guest of the Duke of Norfolk, and is receiving much attention.

One special feature of the congress will be the parade of 14,000 school children on Saturday. The children will represent the Catholic schools of London and the provinces. The dignitaries will view the parade from the residence of the archbishop of London.

Dignitaries Hissed.

The city authorities arranged a heavy guard of police at the cathedral today, and extra precautions have been arranged for all the events of the week, to prevent a demonstration by the radical Protestants. The only show of feeling so far noticed was the hissing of dignitaries by street crowds today. The threats of the Protestant alliance was more general than the fear of some sort of outbreak.

ARRESTED WITH \$19,000 STOLEN MONEY ON HIM

Seattle, Wash., Sept. 9.—Accused of stealing a part of \$19,000 in gold, which he carried with him, James H. Beggs today occupies a cell in Seattle's city prison, while the police are watching close for Robert Miller, who is thought to be on his way here from Alaska to meet Beggs.

The \$19,000 represents the money which "Bobby" Miller planted two years ago at Fairbanks, after turning over to the authorities the major portion of \$78,236.34 taken from the steamer Tanana. Robert Miller is supposed to be on his way from Skagway to Seattle to meet Beggs and divide the money.

The Firemen's Fund Insurance Company, of San Francisco, which had paid the full loss on the gold, kept track of Miller's movements from the time he left McNeill's Island up to the time he is alleged to have given Beggs the gold. It was due to a detective's close surveillance that Beggs was accused of carrying out the gold which Miller left.

MONTHLY MEETING BOARD OF TRADE

The regular monthly meeting of the Salem Board of Trade will be held at the rooms this evening at 8 o'clock. The location of the new smelter in the Gold Creek mining region will be reported on, and other matters of importance are coming up.

CITY COUNCIL TAKES UP MANY MATTERS

The Honorable Common Council of the City of Salem:

Members: I beg to call your attention to the fact that the price of gas per thousand, charged for gas by the holders of the gas franchise in this city, is considerably above the average price charged in other cities in this state in the United States.

Something over a year ago a bill was introduced to fix the price of gas at \$1.00 per thousand was before your honorable body and its members were strongly recommended by the commercial organizations of the city. At that time the local manufacturer of the gas plant, which is owned by the electric lighting company, suggested that a new plant was to be installed which would reduce the cost of production and thereby reduce the price to consumers. The new plant has long been installed and not has the price remained unchanged, but the price of the gas supplied is so much higher, and its odor so noxious as to render its consumption costly and generally disagreeable.

According to the latest government figures the average price paid for gas in the United States for total consumption, is less than one dollar per thousand feet. If our people are not getting their money's worth when they buy gas, it certainly is incumbent upon the city council to give them some relief by fixing a standard for quality and a reasonable rate for consumption.

I do not wish to appear as dictating, but should like to respectfully suggest the appointment of an investigating committee to look into the matter and report such legislation as they may think fit.

I hope your honorable body will give this matter the careful and early attention its urgency demands.

Respectfully,
GEO. F. RODGERS,
Mayor.

Sept. 8, 1908.

The above communication from Mayor Rodgers was read before the council at its adjourned meeting last night and was enthusiastically received. The mayor was authorized to appoint a committee of three to investigate the conditions referred to in the letter. This committee, which will be named later, will report to the council at the next regular meeting.

The report of the street committee recommending that all the property owners on Liberty street between State and Court, sign a petition asking that the street be paved immediately and waiving all assessment notices and irregularities in the procedure of the speedy construction of the pavement, was adopted. Another petition will be circulated among the property owners on the two blocks on Liberty street between State and Chemeketa, who were included in the original improvement ordinance, to withdraw the remonstrance filed by them several months ago.

The special committee appointed to purchase a site for the street department, and erect a suitable building for the street cleaning apparatus and for the horses, owned by the city, reported that the plans of the building were completed. The committee was authorized to advertise for bids for the construction of the building, and to accept partial payment of \$1000 on the city property on State street, recently sold by the city.

The report of the poundmaster for the past month showed 18 arrests, 93 dog licenses, 10 dogs impounded and 5 killed.

On motion of Councilman Stockton the city marshal was authorized

to detail five special policemen to serve in the several residence districts during the state fair.

The councilman from the fourth and seventh wards were authorized to confer with the state authorities with a view of improving the road leading to the institute for the feeble minded.

The order for the change of grade on N. High street was authorized to be published. Also the grade on State street between Thirteenth and Nineteenth streets.

Construction of the sewer on Bellevue street, and the improvement of the fair grounds road.

The ordinance regarding the remodeling of theaters was referred to the committee on fire and water.

The bill regulating the speed of automobiles was referred to the committee on ordinances.

A bill providing for the extermination of weeds and thistles in the city limits of Salem was introduced and referred to the committee on ordinances.

The bill providing that the city marshal shall have authority to expurgate such weeds if the property owners refuse to do so. The bill is in accordance with the state law which makes a similar ordinance in each municipality compulsory.

The bill regulating slaughter houses in the city was referred to the committee on ordinances.

A bill for the protection and use of the city street was introduced and referred to the ordinance committee. The bill prohibits persons from sweeping refuse into the street, from building fires on paved streets, and from allowing oil from automobiles, wood saws, etc., to drip on a hard surface pavement. The bill also prohibits peanut, popcorn, fruit stands, etc., on the streets of the city.

FLIES

(Continued From Page 1.)

"I could have kept on going 10 or 15 minutes longer," said Wright, when he alighted, "I still have gasoline left and the motor worked to perfection. I shall try again as soon as I reload the tank with gasoline and inspect the engine."

The average speed made by Wright was 38 miles an hour, which is two miles an hour less than is required under the government contract for a straightaway course.

The weather was ideal this morning, when Wright started his marvelous flight. The machine rose gracefully like a bird, and from the first it was apparent that it was in perfect condition, and under perfect control.

Wright lifted the aeroplane at times to a height of from 60 to 70 feet. He rose and dipped with perfect ease, and the guiding rudder held the machine in any course that

Eye Care

The Eye is the most delicate and the most sensitive part of our system, yet the most neglected. Eye troubles come directly from improper care of the Eye.

Properly Fitted Glasses

Remove muscular strains and the eyesight applied the better. We are on the alert for defective eyes.
