

London Springs Famous Health Resort of Lane County, Oregon

The wonderful resources of the Cascade valley are only just beginning to be realized. When we look at the hundreds of millions of feet of fine saw timber, the enormous wealth, the unlimited water power, all undeveloped and awaiting the efforts of the enterprising business man to make his fortune, because of the unlimited possibility of the

from the Springs being always in readiness to transport the guests. London Springs is located in a shady grove which provides excellent camping privileges and is supplied with the purest spring water piped to the grounds for domestic purposes. A commodious hotel looks after the comfort of those who do not desire to camp, while in close

duct. The water is unexcelled as a pleasant, refreshing drink, and as a remedy for chronic ailments it has no superior. In fact, many have found it a remedy for strong drink. It is a favorite as a bar water, excellent as a mixer and is sold everywhere. It is guaranteed to be an absolutely pure and natural mineral

along the resources of the valley the famous London Mineral Springs, the great curative powers of these springs, like all other resorts, are only just beginning to be appreciated. As Saratoga is to the Hot Springs are to the south, so London Springs will be the west.

There are so-called mineral waters and so-called mineral waters, the natural genuine mineral water with genuine curative qualities are so common.

London Mineral Water is the natural product of the famous springs bearing the same name, situated in Lane County, Oregon, 12 miles south of Cottage Grove. Here this great water bursts out of the solid earth from the banks of the Willamette river with an incessant flow of hundred gallons per hour. Unusually mineral waters now on the market, it is very palatable—a delicious beverage, as well as an aid to health.

cots on which bathers can lounge after taking their bath.

Here also is located the bottling works where is bottled for an even

of many mineral waters, it is the product of some chemist's laboratory, but is given to the public in the natural state, just as the hand of the Almighty created it in the bosom of the earth. It is bottled at the springs, is slightly impregnated with carbonic acid gas, if required, and is sent forth to do its duty of bestowing health and happiness to all who partake of it. London Mineral Water both pleases and cures. It has been famous in southern Oregon for a number of years a medicinal treatment for nearly all the chronic ailments to which the human flesh is heir, and in nineteen hundred and five at the Lewis and Clark Fair was awarded the silver medal and diploma against the world. Especially is this water recommended by leading physicians in cases of rheumatism, neuralgia, catarrh and liver affections, indigestion, and, in fact, all diseases of stomach skin and blood.

widening trade the waters of these celebrated springs, bottles being shipped in by the car load to meet the demands of the trade for the pro-

benefits derived from the medicinal virtues of the water continue to pile up the volume of testimonials from all over the country.

IDEAL CAMP GROUNDS.

Winter Resort Also.
London Springs is not only a summer resort, but a winter resort as well. The management spent several thousand dollars last summer in adding to and improving the bath houses, so now they are prepared to take care of all persons desiring baths both summer and winter.

The tonic effect of this water is great. It contains rich quantities of iron, and those suffering from blood disorders, general debility, skin diseases and catarrh, almost without exception are benefited and cured.

Many have gone there suffering from loss of vitality and nervous prostration have been cured and gone away strong and happy.

Ponce de Leon, following his discovery of Florida, sought vainly for the "Fountain of Perpetual Youth," which the traditions of the natives said extended somewhere in the interior.

Had his search extended so far as the beautiful spot by the side of the Coast Fork of the Willamette river where from the western bank flows the waters of the London Mineral Springs, he would not then have discovered such a fountain. He would, however, have discovered a water that while it cannot arrest the flight of time, it can and does, when properly used, so assist nature that health and strength may be retained to a ripe old age.

Here day and night one of nature's laboratories is always at work, compounding a remedy for many of the ills of life, that thus far have baffled the science and skill of the most eminent physicians.

The fact that these waters contain all the principal tissue-builders, combined in the nearest relative proportions to a normal condition, makes them superior to other mineral waters, as an analysis will show.

Analysis of the Water.
The water has been carefully analyzed by the chemists of the Oregon State university at Eugene and contains the following inorganic salts per litre:

Sodium chloride, 2.0692; sodium silicate, .1292; magnesium chloride, .1584; calcium chloride, .15268; iron and alum chloride, .0160.

Note the natural distribution of these salts in harmony with those conditions which make for perfect health in the human economy.

London Mineral Water.
London Mineral Water may be obtained in any quantity, directly from the springs, any local dealer or at our depot in Portland, Ore., at Clarke, Woodward & Co.'s. Phone exchange 11.

It has the endorsement of Dr. Bartle, Eugene; Dr. Jobe, Cottage Grove; Dr. Capron, Medford; Woodward, Clarke & Co., Portland, and many other physicians and chemists.

The Cottage Grove Commercial club, after using this mineral water for several years, says unreservedly that as a beverage and as a remedy for chronic trouble London mineral water has no equal.

Testimonials.
The management of the Springs could furnish many more testimonials but those given should be sufficient to cause investigation. Further information can be had by addressing London Mineral Springs, Lane county, Oregon.

Cottage Grove, Ore., April 25, 1905.

I desire to be one among the many to tell the sufferers of the wonderful virtues of the London mineral waters. I do not think it is possible to say too much for these springs. I had been suffering from scrofula for many years. I doctored with the leading physicians continually for over four years without and permanent relief. I had running sores on my neck and breaking out inside of my throat, which caused much suffering and in fact life was a misery and hope for health had almost vanished, when one who had been cured of the same trouble by these waters recommended them to me, so I decided to try them and their effect was wonderful. I began to improve at once and in a few months was entirely well and hearty. It has now been ten years since I began the use of these waters and I have not had any symptoms of scrofula since. As for me I think these waters are among the greatest remedies of earth and take pleasure in recommending them to all I know or see who are suffering from chronic troubles especially skin and blood diseases. With best wishes to the London Mineral Springs,
Mrs. Elizabeth Husband.

Cottage Grove, Ore., Jan. 17, 1905.

MR LEVI GEER, London, Ore.—Dear Sir:—It gives us great pleasure to write you in reference to your mineral water, which we have used for the past five months and find that it gives great satisfaction to our customers as well as to ourselves. It is not only a good merchantable commodity but the beneficial results obtained from drinking the same are its best recommendation. Wishing you every success, we remain,
Very truly yours,
Barker & Perman.

Eugene, Ore.

I and my brother William have been at London Mineral Springs about three months. I was suffering from kidney, bladder and stomach trouble for several years. I was also troubled with rheumatism. I have used the water both for drinking and bathing. I have no more trouble with my rheumatism or stomach and my kidneys are relieved. My brother was suffering from rheumatism and catarrh, from both of which he has found relief. We consider the water good for the above troubles and is a good general tonic water. We think London Mineral Springs a pleasant place and is well equipped to accommodate its patrons.
Robert and W. S. Tandy.

Eugene, Ore., Feb. 15, '07.

To Whom It May Concern: While I was in business I used all the leading brands of mineral water but found none that gave the satisfaction that the London Mineral Water did.
C. J. Barhite.

Eugene, Ore.

To the Public: We have used the London Springs Mineral Water very extensively and find it gives splendid satisfaction.
Walker & Renshaw.

Thousands of testimonials such as these could be furnished.

Mr. A. G. Magers is the general agent for the London Mineral Water in Salem; J. C. Perry also handles it at his drug store.

The country is flooded with bogus artificially manufactured mineral waters which are often detrimental rather than beneficial to health. All should be careful to distinguish between such waters and the real natural mineral water.

How to Get Strong.

P. J. Daly, of 1247 W. Congress St., Chicago, tells of a way to become strong: He says: "My mother, who is old and was very feeble, is deriving so much benefit from Electric Bitters, that I feel it's my duty to tell those who need a tonic and strengthening medicine about it. In my mother's case a marked gain in flesh has resulted, insomnia has been overcome, and she is steadily growing stronger." Electric Bitters quickly remedy stomach, liver and kidney complaints. Sold under guarantee at J. C. Perry's drug store, 50c.

Why the Government is Interested in Concrete.

With the problems arising from the waste of money in perishable construction, and with the growing scarcity and consequent increase in the price of wood, the search for desirable substitutes for timber becomes a matter of prime importance and justifies the work now being done by the government at its structural materials laboratories in St. Louis. These investigations, states Cement Age of New York, are being conducted with a view to determining the nature and extent of the materials belonging to or available for use in the building and construction work of the government and how these materials may be used most efficiently. While these investigations are not conducted for private parties, it is believed that both the ordinary tests and the investigations, though conducted to meet the needs of the government, can not fail to be of great value to the engineering profession and the general public.

The building and construction work of the federal government now aggregates \$40,000,000 annually, and this work is being done under so many different conditions and requires so great a variety of materials that the problems which the government needs to have solved for its own purposes can hardly fail to be broad enough to cover a large share of the needs of the engineering profession for state and municipal governments and for the general public. The work in the past has been confined largely to the constituent materials of concrete and the concrete itself, the funds available being too limited to admit of a more rapid extension of this work to other structural materials, and this being the greatest demand for information by the various branches of the government service.

As a single illustration of how these investigations, conducted to meet the needs of the general government, may incidentally be of service to the engineering profession or to state or municipal governments it may be mentioned that the investigations of the sands and gravels in the vicinity of Louisville, for the use of the supervising architect of the treasury department and the corps of engineers of the army for use in concrete works are said by the engineer in charge of the new sewer system for that city to have saved the city in the construction of work not less than \$100,000.

Best Treatment for a Burn.

If for no other reason, Chamberlain's Salve should be kept in every household on account of its great value in the treatment of burns. It allays the pain almost instantly, and unless the injury is a severe one, heals the parts without leaving a scar. This salve is also unequalled for chapped hands, sore nipples and diseases of the skin. Price, 25 cents. For sale by Dr. Stone's Drug Store.
