RHEUMATISM IS BURGLAR NOW OVERCOME BY **PROVES TO** THIS MIXTURE **BE WOMAN**

(United Press Leased Wire.) Anaconda, Mont., Nov. 24 .- Sit ting in one of the cells of Anaconda's jail today is a woman giving the name of Lonnie Searlight, a beautiful mulatto, who is accused of playing the role of footpad in man's at tire.

The woman came to grief a few minutes after a man was held up and searched in the glare of an electrie light last night. The victim's ring was even taken from him. The police suspected the mulatto woman of committing the crime and arrested her.

PORTLAND WOMAN SHOOTS AT BURGLAR

(United Press Leased Wire.) Portland, Or., Nov. 24.-To the pluck of Mrs. J. F. Kimball is toscription. day attributed the failure of at least on burglary in Portland at an early hour this morning. Aroused by the noise occasioned the raising of a window, Mrs. good share of them. One two-shill Kimball, who was alone in her home ling package has kept a whole family sprang out of bed just in time to in good health for a year. see the head and shoulders of a man crawling through a window. Mrs. Kimball seized a revolver and fired. and disappeared. Mrs. Kimball is EX-OREGONIANS

DISEASE.

Recent hospital reports show that the dread disease, rheumatism, is steadily increasing throughout the country. All known means of relief are being suggested to save the great amount of suffering this winter, especially among those who are not in a position to pack up and visit the noted health resorts to be treat.

Recent tests prove rheumatism not exactly a disease in itself, but a severe symptom of kidney trouble. a condition caused by clogged up pores of the eliminative tissues in the kidneys which fail to filter the poisonous waste matter and uric acid from the blood, permitting these substances to remain in the veins and decompose, usually sett'ing about the joints and muscles, causing the intense pain , swelling and stiffness of rheumatism.

The following simple home treat-J Heney's condition is reported today ment will cure Rheumatism and is not to be as satisfactory as his physi- harmless and inexpensive and so cians would wish, and it is planned simple that anybody can mix it at

His doctors dients and mix them by shaking in a declare, however, that, only for his bottle, taking as a dose a tea poon-

There is nothing better in the world for a backache, kidney and bladder trouble, too. Such symptoms as frequent and painful urination, sorcness, weakniess, general and nervous debility are caused by certain acids and poisonous waste mat ter, decayed tissue, etc, in the blood which the kidneys will clear and purify after a few doses of this pre-

Great as the advance in fire-proof onstruction has been during the last en years there has been no let-up in the use of lumber ,and both architects and builders find themselves so dependent on wood today that they are compelled to admit that the forests of the country are likely to be the chief source of building material for many years to come.

The use of cement, terra cotta. brick and stone, with a framework of steel, will make it possible soon to do away with wood entirely," is a remark often heard, and, Indeed, when one stands on lower Broadway and looks up at the towering skyserapers. the statement seems to contain much truth. As a matter of fact, however, the popular idea that fire-proof materials will do away with the need of using lumber in a comparatively few years is a very erroneous one. All of the various fire-proof materials going into the approved construction of the more substantial buildings are used in greater quantities now than the world dreamed of a few years ago, lowance of ammunition for the presyet the heavy demand for lumber continues.

That wood predominates is shown by the annual building records. Of being 50 per cent of the allowance the permits used for buildings erected last year approximately 61 per cent were constructed of wood, and the remaining 39 per cent of fire resistng material, according to a report issued by the Geological Survey on operations in forty-nine leading cities of the country. These figures are the more significant when it is realized that they only represent the building actvities in the largest cities; they do not take into account the construction of dwellings, stores and other buildings in the thousands

of small cities and towns scattered over and not included in the fortynine cities on which the reckoning is made.

In town and small cities wood is usually the predominating building material and it is safe to say that if the statistics had included figures for all places of whatever size, the per-centage of wooden construction would have been much greater. These figures, as a rule, are only for the corporate limits, and the suburbs of these cities have each very large amounts to be added. The cost, also, is relatively higher in these cities than in towns nearer the base of the gapply.
