[United Press Leased Wire.] Berkeley, Cal., July 15 .- That a

partial solution of the problem arising from the entry of women into ouslness may be found in a system providing payment for housewives for domestic services rendered; is the opinion of Mrs. Ellen Richards, instructor of chemistry at the Massachusetts Institute of Technology.

Women do not seek environments other than the home, because they are more pleasant, on the contrary, they take up occupations less agreeable because in them their efforts are appreciated and rewarded."
