

SOMERS BREAKS RECORD

(United Press Leased Wire.)

Paris, Aug. 7.—The aeroplane record for sustained flight was won today by Roger Somer, a Frenchman, if the flight credited to him at Mourmelon Le Grand proves authentic. It is reported that he remained in the air two hours, 27 minutes and fifteen seconds. This is eight minutes longer than the best official flight of Wilbur Wright, made at Lemains, France, on January 1 of this year.

Somer maintained a height ranging from 60 to 100 feet above the ground during his flight.

During the early part of the aerial voyage his speed was much retarded by the sagging of a linen underplane.

This was finally cut by the propellers and the speed increased.

The machine with which the aviator made his record is of the Voisin type and is one of the best aeroplanes yet seen in France.

When Somer began his flight at 3:14 a. m. the moon was shining brightly and the movements of the aviator and his machine as it sped through the air were plainly visible to the scores of watchers standing below.

As the time lengthened and Wright's record time for a sustained flight was neared, the crowd below cheered and when it was announced that the record had been broken the crowd went wild with delight.

MADE A GOOD FIND OF CLASSY JEWELRY

(United Press Leased Wire.)

Portland, Or., Aug. 7.—Miss Margaret Winstock of this city is wondering today if she would be fortunate enough to find a gold mine on a prospecting trip. Miss Winstock yesterday afternoon found a satchel containing diamonds and other jewels that must have exceeded \$2,500 in value. The owner of the satchel appeared shortly afterward, excitedly claimed the property and vanished with the gems before the bewildered finder could learn her name.

Miss Winstock found the satchel near a candy store and almost fell over when she spied its contents. Thinking that the owner was in the store she hastened in while she and the cashier were gazing wide-eyed at sunbursts, tiara, rings and at a card with the name Mrs. Edwards on it, an excited woman rushed in and seeing the handbag claimed it and hurriedly left without a "Thank you."

TO PRACTICE ON EXPLODING MINES

(United Press Leased Wire.)

San Francisco, Aug. 7.—The mine planting ship Colonel George Armistead began laying dummy mines in San Francisco harbor today. As soon as the drill is completed the real mines will be laid which later will be exploded by the artillerymen of the Presidio to gain proficiency in handling the harbors under water defenses.

According to the present plans, large rafts towed by tugs will be allowed to pass over the mines and the mines exploded by the gun crews on shore.

OBJECT TO WIRELESS NOISES

(United Press Leased Wire.)

San Francisco, Aug. 7.—Signed by the majority of residents of Russian hill, which includes a number of the leading men of the city, a petition is to be presented to the board of education asking that the wireless station at Taylor and Vallejo streets be ordered to vacate the property, which belongs to the public schools.

Those living in the vicinity of the wireless station complain that the crash of electricity when a message is being sent and the flashes from the wireless disturbs them.

Complaint has been made to the company's officials and a promise that the "evil would be ameliorated" was given.

But the flashes were just as strong and the ripping noises as loud and in consequence the residents will attempt to bring about "amelioration" by having the wireless removed.

FINDS WAY TO ESCAPE FROM SUBMARINES

(United Press Leased Wire.)

Washington, Aug. 7.—Midshipman Kenneth Whiting, in command of the United States submarine Porpoise, now stationed at Manila, has demonstrated that sailors imprisoned beneath the surface of the sea in submarine vessels may escape through a torpedo tube, according to advices

in possession of the navy department today.

To demonstrate the feasibility of this mode of escape, Whiting risked his life. He caused his vessel to be submerged near Cavite and when the great hulk lay on the bottom under sixty feet of water entered a torpedo tube, closing the breach behind him.

Acting on his orders, other officers manipulated the controlling mechanism and the young midshipman was hurried through the water to the surface, where he was picked up by a waiting boat.

Whiting's experiment may result in the construction of a safety apparatus, modeled on the regulation torpedo tube, that will make less hazardous submarine experiments.

Dr. John Shaw Dies Suddenly.

Dr. John Shaw died Friday morning at the Salem hospital. He had been suffering from heart trouble for several years, and, fearing an attack of the ailment a week ago he hurried home from the mountains. Dr. Shaw was well known in this city and vicinity, having served as physician at the Oregon state penitentiary for many years and resigning last spring.

He was about 55 years of age and was one of the best known physicians in the city.

News of his death is a great shock to his many friends, for while it was known that his health was failing, his death was unexpected. He leaves one sister, Miss Sallie Shaw, of this city.

Dr. Shaw was the only son of the late Judge J. J. Shaw, one of the pioneer attorneys of this city.

The funeral will be held from the late residence of the deceased Sunday at 3 p. m., conducted by Dr. Comer, of the First Baptist church.

Notice to Contractors—

Contractors are especially requested to read the call for bids by the city of Salem for the construction of a concrete culvert on another page of this paper. Read this over and make a bid.

There are so many kind of selfishness that you tread on very unsafe ground when you condemn the other fellow's kind.

A Skin of Beauty Is a Joy Forever

DR. T. FELIX GOURAUD'S

Oriental Cream

OR MAGICAL BEAUTIFIER

GIVES A FASHIONABLE AND REFINED COMPLEXION

It is the duty of every woman to preserve her beauty, and even the most beautiful must protect their complexion.
