THE GREATEST EXPLORER SINCE COLUMBUS

ALL THE WORLD HONORS COOK, SAVE ENGLAND ALONE WHICH DOUBTS HIS STORY

HIS WIFE MURDERED BY MANIAC

Tore Flesh From Her Body With His Teeth and Beat Head to a Pulp With a Lamp.

MAKES HARD FIGHT

SHOTS TWO POLICEMEN AND BITES FINGER OFF THIRD AND IS BEATEN INTO INSENSIBILITY BEFORE SECURED—BODY OF VICTIM HORRIBLY MANGLED.

(United Press Leased Wire.) Spokane, Wash., Sept. 2.—Seized with maniacal fury, John Glandaman,

a stock buyer, and former champion wrestler of the Pacific coast, last night murdered his wife, tore strips of flesh from her body with his teeth and beat her head to a pulp with a heavy brass lamp bowl. Glandaman is in the city prison here today after a terrific struggle with five patrolmen, three of whom were injured, in the arrest.

Police were called to the Glandaman home late last night by the man's neighbors, who heard him wrecking the interior of the house. It was not known at the time that Glandaman had attacked his wife, and the stepchildren of Glandaman pleaded with the police not to enter the building, because the man had threatened to kill them if they called in the police.

When the officers entered they found Glandaman seated over the body of his wife. In each hand was a loaded revolver, and the man fired several shots before the police closed upon him.

The maniac escaped from the grasp of the policemen, who discovered that Glandaman cunningly had covered his hands, arms and head with vaselline, to escape their grasp. After a terrific struggle, Glandaman was

HIS LEGS BROKEN BY AUTO

Earl Brodine Crossing Street in Front of Automobile. Is Caught and Crushed.

IS 'BADLY BRUISED

AUTO DRIVEN BY E. P. McCORNAK WAS MOVING SLOWLY AND WAS STOPPED IN 16 FEET. ONLY ONE WHEEL PASSED OVER BODY.

The first serious automobile accident to happen in Salem occurred this morning at 9:20 at the corner of Mission and South Commercial streets, when Earl Brodine, on a bicycle, collided with an automobile driven by E. P. McCornack.

Mr. McCornack was going north on Commercial street and a number of teams loaded with hop pickers were going south, at the junction of Commercial and Mission streets. To avoid the teams, McCornack turned down Mission street to the east. Just at this juncture Brodine went south down the grade on the east side of Commercial street and started across Mission street ahead of McCornack. The bicycle and the automobile met, and the left front wheel of the heavy Pope-Hartford touring car passed over Mr. Brodine and the bicycle.

The auto was practically stopped when it struck the rider, but the weight of it forced it along down the slight grade for about 16 feet, dragging Brodine under it, breaking both of his ankles and nearly twisting one of them off. Mr. Brodine is a brick mason, residing here with his family. At present his injuries are not considered dangerous. Mr. McCornack is a son-in-law of ex-Governor Moody, and a prominent business man of this city. He is a very careful driver with his machine, and those who saw the accident attach no blame to him whatever, as they say he was going very slowly. He did everything possible for the injured man at the time, getting a doctor and ambulance, and helping in every way he could. This is another of those sad accidents that seem unavoidable at times.

ONE AMERICAN WAS DROWNED IN MEXICO

Rualto, Cal., Sept. 2.—Worth Mort, of this little city, was swept to his death in the disastrous flood that last week visited the vicinity of Monterey, Mex., according to a message received today by his wife. Mort left his home six weeks ago to accept a position with the Mexico Land Company at Arguelles. The dispatch stated that he was drowned in the first rush of flood waters Saturday, and was buried the following day.

Much advice is like other cheap commodities—not worth taking as a gift.

When a man starts to blow in his money his friends like to get wind of it.

SCIENTISTS STAND BY EXPLORER

English Press Finds All Kinds of Fault With Statement That Dr. Cook Has Not Made.

DENMARK IS JOYFUL

OPINION IS PRACTICALLY UNANIMOUS THAT COOK HAS FOUND THE POLE AND WILL BE ABLE TO PROVE IT—SCIENTISTS SAY THEY CANNOT BE FOOLED.

Copenhagen, Sept. 2.—All Denmark is today preparing to do honor to Dr. Cook, the plucky explorer, who after two years of indescribable hardships, succeeded in reaching the North Pole. Preparations are now under way for a magnificent reception in honor of Dr. Cook when he arrives here on the Hans Egere.

Thousands of people, representing all nations, will greet the American, the most talked-of man in the world, when he plants his feet on Danish soil Saturday.

The officials of Copenhagen, including the city council, have chartered a special boat and will go out to sea to meet the Hans Egere.

In the evening a banquet will be tendered the explorer when he will be presented to the queen and King Frederick. Everywhere Dr. Cook is being hailed as "The man of the century."

The Americans here are jubilant at his discovery and all business is practically suspended.

The stars and stripes is flying from all the government buildings and business houses while the residential section is a mass of red, white and blue bunting.

The Danish press today is giving Cook full credit for his wonderful feat. With one accord they admit that the American has accomplished the achievement for which hundreds of brave men have laid down their lives.

There is not a paper in Denmark that has even hinted that the report of the discovery may not be true, and all are profuse in their praises of the courageous American.

A Message from Cook.

San Jose, Cal., Sept. 2.—According to Father Richard Gleeson, president of the Santa Clara college, Mrs. F. J. Martz, the wife of a Redlands capitalist, received a telegram from Dr. Frederick Cook, the discoverer of the North Pole, acquainting her with the news of his discovery.

The message read: "Have placed the stars and stripes over the North Pole. (Signed) 'Cook.'"

Mrs. Martz explained that the cablegram had been sent her by Dr. Cook in accordance with an agreement between them to the effect that he would let her know the first news regarding the success or non-success of his expedition into the Boreal zone.

Financier Bradley Happy.

New York, Sept. 2.—The happiest man in New York today is John R. Bradley, who financed the exploration expedition of Dr. Frederick A. Cook, of Brooklyn, which resulted in

the stars and stripes being planted at the North Pole.

"If the news be true," said Bradley this morning, "and it must be true, Dr. Cook has accomplished the most wonderful thing ever attempted by any man. Just imagine any man with courage enough to make a dash for the pole, accomplish his object, unassisted by any other white man, and then return alive and well. I tell you it's the most wonderful achievement in the history of this generation or any other generation, for that matter.

"I never entertained the slightest doubt but that Dr. Cook would succeed, as I had absolute confidence in his courage, determination and will power. So when some friends of Dr. Cook tried to finance a relief expedition recently I refused to subscribe to the fund as I believed that it might interfere with the plans of Cook.

"Naturally I am pleased with Dr. Cook's great discovery, and I believe that when he returns to his native soil that the American people will give him the greatest welcome ever accorded to any American."

Government Will Honor Cook.

Beverly, Mass., Sept. 2.—President Taft is immensely pleased at the achievement of Dr. Frederick A. Cook in planting the stars and stripes upon the north pole.

As soon as the president receives official notification of the discovery he will send special messages of congratulation to the great explorer.

Taft declined to make any formal statement today but did not endeavor to conceal his pleasure over the news.

It is expected that the American government will take steps to honor properly the man who has gained for this nation the glory that has been sought by all countries for centuries, but it is certain that no step will be taken until the discovery is confirmed and it is officially recorded.

His Wife Had Faith.

New York, Sept. 2.—Mrs. Cook, wife of Dr. Frederick A. Cook, discoverer of the north pole, today sent the following telegram:

"Brunswick, Me., Sept. 2.—To the United Press, New York City: My faith has never wavered and I am glad that my judgment of my husband's ability has been vindicated. (Signed) 'Mrs. Dr. Frederick A. Cook.'"

English Are Dead Sore.

London, Sept. 2.—Most of the leading afternoon papers today refuse to credit Dr. Frederick A. Cook's statement that he has discovered the north pole, basing their doubt chiefly upon the fact that he has no witnesses to verify his claims except two Eskimos who are now aboard a Danish vessel en route for Copenhagen with the explorer.

Despite the attitude assumed by the local papers a bitter tone of disappointment prevails here and the Westminster Gazette's story says:

"If Cook has really found the pole there is nothing left in the way of scientific accomplishments for the English to attain, as Bleriot already has piloted his airship across the English channel."

They Want to See the Pole.

London, Sept. 2.—The account of his discovery of the north pole, sent by Dr. Frederick A. Cook himself, to the New York Herald, is declared to be weak by explorers here today.

Scientists are asking whether the "April 21, 1908," on which he says he found the pole was Washington or Greenwich time. The pole is without longitude, and there is no rising and no setting of the sun, and no way to determine time by the Greenwich meridian.

Cook's statement that there is land beyond the pole is assailed by nearly all English scientists, as not proven.

SMALL BOY'S WILD RIDE IN BALLOON

Quinter Neff in Watching Balloon Start Gets Tangled in Ropes and Is Carried Up.

SPINS LIKE A TOP

SOARS THREE THOUSAND FEET WHILE SPECTATORS EXPECT EVERY MINUTE TO SEE HIM DROP TO DEATH—WRAPS ROPE AROUND HIMSELF—IS UNHURT

(United Press Leased Wire.)

Syracuse, Ind., Sept. 2.—Carried 3000 feet into the air and whirled around with the speed of a locomotive when his body became entangled in the ropes of William Simmons' balloon, little Quinter Neff, 12 years old, is today recovering from the effects of his perilous aerial journey.

With hundreds of other boys Quinter yesterday was intently watching the preparation of Simmons for his flight. The balloon had already been filled with gas and Simmons had shouted a warning to the spectators to stand back. Instead of heeding the warning of the balloonist, Neff and his companions pushed closer to the big bag.

The ropes were cut and with the cry of "They're off!" from the throats of thousands of spectators, the balloon started skyward.

Unknown to the operator of the balloon, Quinter in his eagerness not to miss any feature of the flight had pressed too close to the balloon and in some way his little body became entangled in the ropes.

The first inkling Simmons had that all was not right was when he heard a cry of horror going up from the thousands of spectators.

Peering over the edge of the balloon Simmons saw the body of little Quinter dangling from one of the ropes. As the balloon shot upward gaining momentum with each second, the boy's body began to revolve. At first it moved slowly, but as the air craft shot upward Quinter was whirled around at the rate of an express engine.

The spectators, 3000 feet below, were paralyzed with fear, expecting every minute to see the lad's body break loose from the balloon and fall to the ground. Suddenly the balloon began to descend, almost imperceptibly at first. As it neared the ground it was noticed that Quinter was firmly fastened to the balloon. The boy had drawn the rope tightly about him. When it was observed that the lad was in no danger a cheer went up from the crowd. As the air craft drew nearer to earth a hundred willing hands were outstretched to break Quinter's fall.

His little form was cut loose from the ropes, and he was turned over to friends, who hurried him to a hospital.

There it was said today that the lad was only suffering from the shock and would be entirely recovered in a few days.

Simmons descended to the ground safely and today is profuse in his praise of the nerve Quinter displayed in fastening himself securely to the ropes.

..Salem's Big Store..

With the big stock of the newest merchandise shown on the Pacific Coast. The only thing that you will find small in this establishment is the price. The goods, style and the quality can not be surpassed. The Chicago Store always leads in progressive merchandising.

NEW FALL STYLES IN LADIES' SUITS

Dress Goods and Silks

The big stores of Portland cannot show you any grander or finer stock of dress goods and silks than we can, and we can beat their prices 25 per cent less. Come here and get samples, then send to Portland or any other big city, compare prices, styles and quality, and when you get through if you study the interest of your pocketbook you will buy from the Chicago Store. The reason is this: We know where to buy, how to buy and to get prices that will stand competition with any house in America.

1000 yards of the new Ottoman Fall Silk in all colors, 85c quality. Introduction price, yard 59c

SILKS SILKS SILKS

If you want style, quality and a grand variety, come here.

DRESS GOODS

DRESS GOODS

If you want to take a look through the greatest stock of up-to-the-minute dress goods, come to the Chicago Store. We ask small prices.
