### STANFORD CREW READY

#### FOR WASHINGTON

Stanford University—Special—After a period of strenuous training, although hampered by many difficulties, the cardinal eight, which is to row against the University of Washington, May 25, is now practically ready for the struggle, and only the finishing touches are needed to put the crew in the pink of condition. The men who will make the trip were picked today by the coaches. A severe handicap to the crew has been encountered in the fact that J. W. Fitting, who has been in the boat as stroke during most of the preliminary training, will be unable to accompany the crew, as he is to take the Australian trip with the international Rugby team. This has necessitated a change of stroke during the last few days since Partridge

has been put in the position of stroke.

The crew which will compete against the University of Washington will be as follows: Bow, R. H. Seward; No. 2, R. Halls; No. 3, R. F. Duryea; No. 4, L. F. Hofer; No. 5, R. R. Gilmore; No. 6, H. L. Dietler; No. 7, J. C. Huston; stroke, J. F. Partridge; and coxswain, J. W. Roberts. F. V. Acker will accompany the team as substitute.

## TO WATCH EFFECTS OF THE COMET

(UNITED PRESS LEASED WIRE.)

Portland, Ore., May 14.—In a government bulletin issued by the hydrographic office, which has just been received here, fears are expressed that the close approach of Halley's comet to the earth, beginning next Monday, and lasting until Thursday, may seriously interfere with ships, compasses and wireless messages.

The bulletin says in part: "It is probable that during the approach and recession of Halley's comet unusual electro-magnetic phenomena may occur. Electro-magnetic magnets may be set up by electrical discharges or meteoric particles, in which case disturbances would be observed in the receiving apparatus of wireless installations. The maximum effect will be observed between the 16th and 20th of May, and particularly on May 18.

"It is requested that wireless operators pay particular attention to static effects during this period, and note anything unusual. The occurrence of meteorites should be logged by the watch officer, with details of time, size, direction and duration. The operator hearing unusual noises in the telephone, should note the time, and see whether there were any meteorites observed at that time; also the ship's head and the direction of the antennae at the same time.

As the compass may also be affected, a close watch should be kept for unusual deflections of the needle, noting their exact time, amount and whether periodical."

## NO SHIRT REFUSES TO BE COUNTED

(UNITED PRESS LEASED WIRE.)

Pendleton, Ore., May 14.—Chief Charlie No Shirt, of the Walla Walla tribe, has taken to the tall timbers of the Blue Mountains. Today he issued a deft to Uncle Sams enumerators, and told them that there would be no count of the Walla Walla until he received personal assurance from President Taft that no harm would result.

Ever since the census began the enumerators have had trouble with the various tribes of the Umatilla reservation. The Indians believe that the census men were representatives of the tax department of the state, and as a result they refused to come out of the mountains.

Finally Captain O. C. Applegate, who is well-known and trusted by the Umatillas, Nez Perces and Cayuses, succeeded in calming the redmen. They gathered at the regular camping places, on orders from Chief Peo, and submitted to the count. But No Shirt was suspicious, and, with his followers, he hid into the crags, and ordered the tribe to disperse, until the great White Feather, which is President Taft, is heard from.
