

COYOTE PROOF PASTURE SUCCEEDS IN COLORADO

One Hundred Percent of Lambs Saved by Mancos Rancher Who Puts Oregon Experimental Fence to Test with Highly Satisfactory Results—One Coyote Fenced In and Offspring Does Much Damage.

The enclosure of sheep range within a coyote-proof fence has been tried in Colorado by F. H. Taylor, of Mancos, with highly satisfactory results. An experiment begun by the U. S. Department of Agriculture on the Wallows National Forest, in Oregon, to discover whether sheep could be advantageously pastured within such an enclosure, led Mr. Taylor to give the new method a trial. The outcome is set forth in a letter to the Department, as follows:

"After reading the description of your coyote-proof fence in Oregon, I constructed a fence to enclose about 500 acres in the same manner. The fence was constructed during the fall of 1908, and in the spring of 1909 and 1910 one thousand head of ewes were lambing in this enclosure. In the vernacular of the herder, 'one hundred per cent of the lambs were saved,' that is, a lamb to each ewe, 'and one man did all the work. I think the per cent of the lambs would have been higher, but one animal, presumably a coyote, was inside when the fence was constructed. It was impossible to capture this animal even with hounds. Some of the herders thought the animal was not a coyote, but since coyote tracks were found in several places I am of the opinion that it was. Whatever the animal was it raised its young inside the enclosure.'

Connecting his loss with the rapacity of this animal, Mr. Taylor says: 'A great many of the lambs were killed and a small hole eaten behind the foreleg and the remainder of the

carcass was untouched. On the land outside of the enclosure it required the services of three men and a pack of hounds to care for one thousand ewes, and only 95 per cent of the lambs were saved. This per cent could not have been saved without the assistance of the hounds.

"I consider this fence a splendid investment since it easily pays for itself in three years. On the other hand, it is often difficult and sometimes impossible to get men during the lambing season. For this reason the money value of the fence can hardly be estimated."

The Department of Agriculture entered upon the experiment of enclosing sheep range within a fence which would turn stock-destroying animals in the belief that this method would save forage as well as stock and wages. This belief has been fully justified by the results. The Oregon enclosure carried more sheep than an equal area of range of the same quality outside, produced a heavier lamb crop, heavier sheep, and more wool, and at the same time resulted in a better condition of the range itself. These advantages are due to the different behavior of sheep pastured within such an enclosure from that of sheep herded in the ordinary way.

When a band of sheep moves about in charge of a herder, it must be kept from scattering much. As a result much of the forage is wasted through trampling. Within an enclosure, however, the sheep soon learn to spread out and shift for themselves.

Under these conditions it is not to be wondered at that a given area supports more sheep, puts them in better condition, and suffers less wear and tear. The success of the new method, however, depends on the extermination of all dangerous animals within the enclosure, and on the maintenance of a fence which will keep off outside attacks.

Mr. Taylor believes that the Wallows plan of construction is open to improvement in one particular. He advocates placing a barbed wire on the ground before the woven wire is unrolled, and stapling it down. "I expect to build another enclosure soon", his letter concludes, "and will have a barbed wire stretched around the enclosure and have the men place their foot on the wire and press it close to the ground and staple it. With the fence already constructed it seemed almost impossible to get the wire as close to the ground as is necessary on account of the uneven surface."

FRUIT MARKET WELL SUPPLIED Cantaloupes Go at Lower Prices—Plenty of Peaches Now Coming.

Portland, July 26.—There was a liberal supply of all the seasonable fruits in the front-street market yesterday, and on a few important items lower prices than those of last week were quoted. Several cars of cantaloupes came in, Oregon as well as California figuring in the receipts, and the best of them sold at \$2.25 to \$3.50 a crate. Sales of loose stock at prices under \$3 were reported.

Considerable quantities of watermelons were carried over from last week, and with further arrivals from the South, the market was about as easy as at the close Saturday. The day's sales were for the most part at a cent a pound.

The market was pretty well loaded up with peaches, but trade was of good proportions from the outset and prices held in a fairly satisfactory way at or near the level of last week. Fancy California Elbertas moved at \$1 to \$1.15 a box and Oregon, according to quality, at 60 to 85 cents generally. Oregon Crawford's will not be in the market in quantities for a week or 10 days. Apricots were in liberal supply and were offered at \$1 to \$1.25 a crate, but there was only a moderate demand for the fruit. With plums of all sorts the situation was the same.

The berry season is near the end. Loganberries more or less off in quality, were offered at 75 cents to \$1 a crate and raspberries at \$1.25 to \$1.50. Wild blackberries are coming in a moderate way and selling at 10 to 12½ cents a pound. There were some late cranberries of fine quality in the market at \$2.25 a crate.

All Country Produce Quiet.

As usual Monday there was little doing in the poultry or dressed meat markets, and prices held within the last week's range. Dealers look for moderate offerings of poultry this week, in which event a further recession in values is not to be expected.

The egg market if at all changed, was a trifle stronger in tone. Most dealers quoted 26½ to 27 cents on fresh and Oregon, but in some quarters it was reported that up to 27½ cents was obtainable.

Butter held very stiffly at the recent advance, and the inadequacy of the cream supply is steadily becoming more evident. One of the leading local dealers predicted an advance of half a cent on cheese within the next few days. Cheese stocks in storage are said to be materially lighter than usual at this time of the year.

Beauty vs. Character.

Which is the greater jewel of the two? Is it beauty or is it character. The answer should come unhesitatingly. It is character. What the fragrance is to the flower, character is to the man and woman. Take away the fragrance from the blossom and the color and outlines remain, it is true. But without the fragrance is the flower so attractive? Consider the poppy or the dahlia. Both are imposing to the eye. Compare with the heliotrope or the mignonette. There is no comparison; judging by the standard of exterior beauty. But let the senses catch the fine perfume of these modest flowers, and the gaudy yet odorless beauty of the larger is wholly overshadowed. So it is with character. Not only with character wear, but it becomes brighter as the years roll on.—From an old scrapbook.

MECHANICS' LIEN FILED ON BIG FIGHT STADIUM

Reno, Ne., July 25.—Members of the Reno Athletic Association evinced considerable surprise when informed that J. L. McLaughlin and J. T. Walsh, who supervised the erection of the Jeffries-Johnson fight arena, had filed a foreclosure for a mechanic's lien, naming as defendants the association, and claiming that \$5000 of their bill on the arena was unpaid. Moreover the members unofficially declared that there was a mistake somewhere, and that if the bill was not paid in full this will be done without delay.

The failure to pay, it is believed, is merely an oversight. The association, which volunteered to pay the \$1000 fight license and erect the arena, it is said, is well able to meet the \$5000.

A Bedtime Expedition.

Children do not like to go to bed, and when the nights are cold and the rooms chilly and dark, a certain mother has hit on the plan of playing Peary and Cook. The two youngsters are told to see which can be first to discover the pole—which is, of course, a bedpost. Then there is a rush for the stairs, up which they scramble on all fours like the dog team over the Arctic slopes. Mother goes up presently to find them both cuddled under the bedclothes, arranged like an Eskimo but. But in this case there are two poles, for there are two tall bedposts, and so the controversy is happily settled. One has been discovered by Peary, the other by Dr. Cook.

Notice of Assessment; North Salem Sewer.

Notice is hereby given that the Common Council, will at or about 5 o'clock p. m. on Monday the 25 day of July, 1910, at the Common Council Chambers at Salem, Oregon, proceed to assess upon each lot or parcel of land liable therefore its proportionate share of the cost of the North Salem sewer, according to the maps, plans and specifications adopted for such sewer by the Council, and on file at the office of the City Recorder, reference to which is hereby made for a more perfect description thereof.

All persons interested in said assessment shall appear at said time before said Council and present objections if any they have to said assessment.
Done by order of the Common Council of the City of Salem, Oregon this 18th day of July, 1910.

EARLY FIRE DOES DAMAGE IN PORTLAND

PAINTER MISSING, MANY NARROW ESCAPES FROM DEATH AND A HEAVY PROPERTY LOSS INFLECTED BY FLAMES WHICH DEVOUR FRAME LODGING HOUSES.

[UNITED PRESS LEASED WIRE.]
Portland, Ore., July 26.—George Simonds, a painter, is unaccounted for, and a number of narrow escapes from death are recorded as a result of a fire early today which did damage aggregating \$10,000 to three frame lodging houses near Second and Madison streets.

Two women, Mrs. Faye Fox, proprietress of a rooming house at 240 Madison street, and Miss Mabel Flax, a guest, were compelled to jump from second-story windows through a solid sheet of flame to escape. They were injured, but not seriously.

Other guests who had awakened before the fire gained much headway, succeeded in leaving the building by regular exits.

In the remaining two structures several of the guests jumped from the windows, and many fled to the street in their night clothes.

A Girl's Discovery.

In a seaside church in England is a memorial window to a schoolgirl, Mary Anning, who found when playing on the beach a wonderful example of a strange old-time monster of which the geology books tell us. It was the Ichthyosaurus Platyodon, and the remains now rest in the Natural History Museum at South Kensington, or so the London Chronicle says. It was, indeed, a strange find for a little girl to make.

Notice of Intention to Improve Alleys In Blocks 32, 33, 34 and 35.

Notice is hereby given that the Common Council of the City of Salem, Oregon, deems it expedient and proposes to improve the alleys in blocks 32, 33, 34, and 35 of the City of Salem, Oregon, at the expense of the adjacent and abutting property within said limits, according to the plans and specifications adopted for said improvement and on file at the office of the City Recorder. Reference to which is hereby made for a more perfect description of said improvement.

This notice is published for ten days pursuant to the order of the Common Council, and the date of the first publication thereof is the 20th day of July, 1910.

Remonstrances may be filed against said improvement within ten days from the last publication of this notice as provided by the City Charter.
W. A. MOORES, City Recorder.

Many Women who are Splendid Cooks

dread having to prepare an elaborate dinner because they are not sufficiently strong to stand over an intensely hot coal range. This is especially true in summer. Every woman takes pride in the table she sets, but often it is done at tremendous cost to her own vitality through the weakening effect of cooking on a coal range in a hot kitchen.

New Perfection Oil Cook-stove

WICK BLUE FLAME

Gives no outside heat, no smell, no smoke. It will cook the biggest dinner without heating the kitchen or the cook. It is immediately lighted and immediately extinguished. It can be changed from a slow to a quick fire by turning a handle. There's no drudgery connected with it, no coal to carry, no wood to chop. You don't have to wait fifteen or twenty minutes till its fire gets going. Apply a light and it's ready. By simply turning the wick up or down you get a slow or an intense heat on the bottom of the pot, pan, kettle or oven, and nowhere else. It has a Cabinet Top with shelf for keeping plates and food hot, drop shelves for coffee, teapot or saucepan, and even a rack for towels. It saves time, worry, health and temper. It does all a woman needs and more than she expects. Made with 1, 2, and 3 burners; the 2 and 3-burner sizes can be had with or without Cabinet.
