PROGRESSIVE BUSINESS MEN'S LEAGUE.

The Salem Business Men's League is entitled to be called pro-

At their regular monthly meeting it was decided to hold a weekly Monday noonday, get-together at the Marion hotel.

All the business men of the city will come together and partake of a fifty-cent merchants' lunch.

It will be on the Dutch treat order, each man paying for his own, and as it is washday at home he hopes to fare better down At this weekly get-together there will be a 1ew short talks on

live topics that are of deep interest to people right at home. Matters like the occupation tax, terminal freight rates, milk inspection and auto-chemicalization of the fire department, will be jabbed into on one side or the other in a good natured way. Every business man in Salem can well afford to take the hour at noon Monday and attend these dinners of the live ones.

It is a proper way to start off the week—with good-natured and frank expressions of good will for each other and the city.

If the two new school houses to be built at Salem are to be mere duplicates of what the district already has, then there is no excuse for paying out thousands in fees for plans and specifications. If they are to be on other lines, then the competition for plans should be thrown open to all architects. The two new school houses should have accommodations for the people in the suburbs for a branch library and an assembly place for lectures and neighborhood gatherings. The old way of erecting a forty thousand-dollar building and buying a block of ground, and then have it in use only six hours in the day, five days in the week for forty weeks in the year is superannuated, Modern ideas require that public buildings be made useful as part of the civic and social equipment of the neighborhood, and it is time the board of education moved up a notch in dealing with this ques-

THE STRAW VOTE.

The straw ballots taken by a Eugene paper show Roosevelt 190, La Follette 81, Taft 21.

At Baker City the straw vote, taken by a daily paper there,

shows Roosevelt 105, La Follette 80, Taft 41.

There are many other newspapers taking straw votes, and it will be interesting to get hold of the returns.

There are those who decry the straw votes and say they indicate nothing as to choice of candidates.

The only lesson of the straw veto is that it is not safe to try to force the nomination of anyone.

In the face of a strong public sentiment for popular choice of candidates it will be wise to go slow.

The more nearly it would be possible to nominate a man whom the people really desire, the better for all.

The leadership of the Republican party in the past seems to

have taken delight in swimming against the stream. It is splendid physical exercise, but the swimmer does not ar-

rive anywhere, and sometimes is drowned.

Governor West is forcing the issue on a state highway from Portland to Salem. The towns and cities and road districts know what the plans are. Now Governor West will establish a rock crushing camp at some point on the line where the road material can be had cheaply and in large quantities for distribution. Then the railroads will be asked to distribute it to their stations. The localities will be asked to co-operate in distribution. That is the line of progress and the governor deserves credit for grasping the idea, for taking the initiative and showing the people by an object lesson the value of a good road. All this is being done without bond issues or creating high salaried officers.

TAX LEVIES OF CITIES.

If high tax levies check the growth of cities there are a number in Marion county that will not grow for some time.

But that is not the case when the money levied is for necessary improvements and is honestly expended. If it is expended on rottenly constructed buildings, on real es-

tate speculations or wild-catting it will hurt.

But here is the total tax levies in all cities of Marion county for the year 1912:

From the above showing it will appear that Woodburn has a tax levy of three and a half per cent and Salem nearly three per

If the money is honestly expended these cities ought to be very prosperous for the presidential year.

So far as the legislature is concerned. Marion county will have to do semething besides hold a wittenagemette of kid politiclans to select a ticket. The blame for high taxes is largely charged to Marion county. The delegation did not land on the right man for speaker. To get what they had to have in the way of appropriations they had to pay about a million out of the pork barrel. Now it is just as much the duty of Marion county not to dig too deeply inthe pork barrel as it is the duty of the man who gets no pork. The absolute necessities of the state can be accurate without civing a series of the state can be accurate without civing a series of the state can be accurate without civing a series of the state can be accurate without civing a series of the state can be accurate without civing a series of the state can be accurate without civing a series of the state can be accurate without civing a series of the state can be accurate without civing a series of the state can be accurate without civing a series of the state can be accurate without civing a series of the state can be accurate without civing a series of the state can be accurate without civing a series of the state can be accurate to the state can be caused as the state can be accurate to the state can be caused as th state can be secured without giving away a million to a million and half. The dose will probably be repeated, and all this will contribute to what many people believe will have to be done—abolish the grafting, log-rolling, disreputable aggregation for plunder called the Oregon legislature.
