SCHOOL BUILDINGS NOT PROVIDED WITH SUFFICIENT FIRE ESCAPES

CRIMINAL CARELESSNESS TO PERMIT CONDITIONS TO REMAIN AS THEY NOW ARE

Baton Rouge, June 30, 1913, To the President of the Board of Trade.

Madam:—A communication which I have just received from the board of education of a neighboring county has put me in mind of certain conditions in our schools which you will readily believe are dangerous. Having been engaged in school building in the vicinity of this city for many years, I have been impressed with the fact that the public has been made the butt of what may be called an indifference to the safety of the structures it has paid for. As an example I adduce the following to your information and for your consideration.

In one high school, which I believe is the largest in the state, there are six exits, none of which is the correct size for a school building, and the approved fire plan. One is a door, the same as any house front can have. The other five are exactly the size of a door and less. The vast majority of the schools present the same aspect. The High School at the High School which I believe is the largest in the state, there are six exits, none of which is the correct size for a school building, and the approved fire plan. One is a door, the same as any house front can have. The other five are exactly the size of a door and less. The vast majority of the schools present the same aspect. The High School at the
