ECONOMY LEATHER THE TIRE COVER

In presenting this article descriptive of our tire cover, we do so with a great deal of satisfaction, knowing as we do that we can save every man who runs an automobile fifty per cent of his tire cost, which is more than half of his entire running expense.

Our appliance is not a new idea. The theory was first advanced several years ago, and you probably know some of the results. As with every new thing, even with the automobile itself, the first attempts were failures. Great men, and geniuses, have taken up great works where other men, just as great perhaps, dropped them, and carried valuable ideas on to completion. So with our enterprise. We have taken over the idea and work of others and expended our energy and time, and by working, testing and re-working we are now able to serve you who own automobiles by cutting in two the cost and making it a real pleasure and satisfaction to run your machine.

Our idea is, to inclose the tire in a cover made of such material and such way that it will protect and preserve the casing.

Our product is the perfection of our idea: A combination of leather, steel and patent hook that guarantees against puncture, blow-out, or skidding.

The first and most important element is the protector leather which is cut in one continuous piece extending over the tire from rim to rim. On the outer face of the protector leather and covering the entire tread or wearing surface, is another layer of leather which extends entirely around the wheel and forms the wearing sole of the tread. Through these two thicknesses of leather are placed rivets and steel burs about one inch apart. The heads of the rivets are covered with a third thickness of leather which forms the lining for the cover.

This combined thickness of leather and steel makes a puncture proof and wear resisting cover a little more than one-half inch in thickness. Does it seem unreasonable to you when we say that this tire protector will resist puncture for four thousand miles and wear for nearly twice that distance? If it were not for the fact immediately following we would be unable to back such a statement:

The secret of our success lies in our patent hook which holds the cover in place by snapping into the clincher part of the rim. Unlike other methods of applying covers, this places all the strain of driving on the rim of the wheel and not on the tread of the casing, thus insuring absolutely no slip and chafing of tire.

In guaranteeing our cover we insure against tire trouble of any kind whatsoever for thirty-five hundred miles, and that at a cost which will cut in two your tire expense.

The material used is the very best we can buy. Our leather is chrome-tanned steer hides, specially prepared for us. The tanning and oiling renders the leather tough as rawhide and soft and pliable as rubber. Every hide is carefully examined and tested before it goes into our product.

The metal from which we make the burs is the very best of tool or plow

steel, three-sixteenths of an inch thick. The whole is countersunk entirely through the bur, thus giving the rivet holding surface until the entire surface of the bur is worn away. Before using we temper these burs in oil to a point of hardness that is extremely tough and wear resisting but not brittle.

The patent hook* are made of the same material, not so thick, and are fastened to the edge of the protector leather with three copper rivets.

And last but not least the construction is all the very best of hand workmanship and every cover is a model

of perfection when it leaves our shop. We have made the statement that we can cut your running expenses nearly fifty per cent. We don't only save in tire cost, but we save in the life of machinery, and in oil.

If the road is slick you either have to use chains or worry along with slipping wheels. If you use chains you are eating into your tires; if you don't you are overworking your engine and burning an excess of oil. Sometimes, depending on the character of road, you are hung up entirely. If you are equipped with our covers rain and mud don't bother. The square

steel burs are like cogs on a track. They put your machine on the same safe footing as corks in your shoes insures for you.

The damage of one accident, caused by being unable to stop quickly, would probably pay for a dozen sets of covers, while one set would insure perfect control of your car.

Our guaranty is not merely an ad. To make you know that we mean what we say we will back it with a bond sufficient to cover the cost to you and under that "Bond Guarantee" we will replace any and all covers that do not stand thirty-five hundred miles with-

out puncture, blowout or trouble of any kind whatsoever, on the mileage basis.

We are designing our covers "Made in Oregon" to sell, and we aim to give every purchaser full value, dollar for dollar.

If you run a car, write for our booklet. It will tell you what others think of Economy Leather Tire Covers.

To Cure a Cold in One Day.
Take Laxative Bromo Quinine Tablets. Druggists refund money if it fails to cure. E. W. Grove's signature is on each box. 25 cents.

See the Greatest Automobile Show Ever in Salem

The stripped chassis of the Flanders "20" is now on exhibition at our sales rooms, 246 South Commercial street. The general public is invited to call and see this wonderful piece of automatic perfection in full running operation. We also have on exhibition the celebrated Hazelton Flanders "20" Pathfinder. It will well pay your time to call and inspect these two world-renowned cars and hear the interesting talk of Mr. G. C. Nichols, who is exhibiting these cars, direct from the Stuebaker factory, and in the interest of

E. M. F. Motor Sales Co.

SUMMER SUGGESTIONS

Make a pleasant, cozy living room of your porch this summer by equipping it with "Old Hickory" Furniture and "Vudor" Porch Shades.

OLD HICKORY

Is the ideal furniture for the porch and lawn. It combines perfect comfort and durability with that touch of the out-doors which you like in veranda furnishings. All Old Hickory is made of genuine seasoned hickory in the natural rustic state; it is not affected by any weather and is the most durable as well as the most artistic porch furniture manufactured. Our stock of Old Hickory includes chairs, rockers, settees, swings.

Vudor Porch Shades

Keep out the heat and glare of the sun, and let in plenty of light and air. With Vudors you can make a cool, secluded living room of your porch at small cost.

Vudor shades are strongly made of clear, straight grained linden wood, and will last for years if properly cared for. They are easily and quickly raised or lowered. We can show you Vudors in a variety of sizes and colors to suit any porch. No charge for hanging.

HOUSE FURNISHERS

NOTICE TO THE PUBLIC

We have recently completed a large modern sash and door factory, and are in a position to turn out a fine quality of mill work.

We manufacture the lumber used in our factory, which will not only insure prompt delivery of orders, but will insure our customers of receiving choice select finish.

We have secured the best of mechanics and can give our customers the assurance of having their orders filled to their entire satisfaction.

We are now manufacturing door and window screens, and would be pleased to submit estimates on screens of any kind.

We are prepared to submit quotations on all kinds of mill work, and would like to have our customers call at our office, and permit us to show them through our plant.

The Chas. K. Spaulding Logging Company.
