MISERABLE STOMACH TROUBLE ENDED
NO BILIOUSNESS OR HEADACHES

Do you feel faint and fussy as you steal food—when you get up to urinate, do you feel like you have a cold inside you, and doing a bit of work, or do you feel listless and inky and hungry as you eat?

If you do, go to your doctor's now and get a medical examination by the best. Take a rest, Cocoa, and eat some bread and milk. Often a day or two of real rest will cure you. Take a good diet and keep well. Your mother will be glad to hear you are well. You will be a help to her.

If you are a little fussy, have the stomach and bowels examined. A little medication may be needed.

DF. T. HUMPHREYS, M.D.

P.S. If you are a little fussy, have the stomach and bowels examined. A little medication may be needed.
