ET the greatest athlete have dyspepsia and his strength will soon fail. One's stamina—force, fullness and strength of mind or muscle depend upon the blood, and the blood in turn, requires a healthy stomach. For the stomach is the laboratory where the food is digested and such elements are taken up—or assimilated—which make blood. In consequence all the organs of the body, such as heart, lungs, liver and kidneys, as well as the nervous system, feel the bad effect if the stomach is deranged.	15.00	Goulet, W.
