

# Cottolene at Cake-Baking Time

It is mighty hard to obtain uniform results in cake making—if you use butter or lard—because both of these products vary so in quality. *Cottolene* is always uniform—always produces good results. With its use, you can count on a certain kind of cake being the same every time. *Cottolene* sells at about the price of lard, and is so rich that one-third less is required than either butter or lard.

### TRY THIS RECIPE:

Cream 1/2 cup *Cottolene*, add 1 cup sugar and mix in alternately 1/2 cup milk and 2 cups pastry flour in which 2 teaspoons baking powder and 1/2 teaspoon salt have been well sifted. Beat well, add the well beaten yolks and whites of 3 eggs separately. Bake in two layers. Use any desired filling or frosting.
