# What Shall a Man Drink?

A question much in the public mind nowadays is "What shall a man drink?" Or rather, what may be drink? "Water," you say, "of course." But the purity of our water supply is the problem in every large city. As an old proverb puts it: "God defend me from the still water, and I'll keep myself from the rough." Quite recently the people of New York have been warned against the water by the head of the Health Department, and have been urged to boll it before drinking. Have you ever thought of the enormous cost and labor this would involve, if it were carried into general practice? The fuel, the implements, the lifting, fetching; the serving and replenishing on every floor of every tenement; in every restaurant and office; in public places and drinking

#### fountains. Truly it is a "counsel of perfection," which is practically hopeless. Why Drink Water When You Can Get SALEM BEER

"It is in the breweries that sanitation has been brought to as nearly perfect condition as it is possible in a food-producing establishment. The water used in the material is distilled. The hops and malt are absolutely clean before being permitted to enter into the manufacturing process. The vats, pipes, etc., are not merely washed, but scalded and thoroughly sterilized. And as if that were not enough, when the beer is placed in bottles it is pasteurized by being run through hot water, which would kill every germ which might have escaped the warfare conducted against it in the process of manufacture. The person who opens a bottle of beer is assured absolutely that what he has before him is a product absolutely free from germs and perfectly clean. It is also true that he may know that he has before him the only manufactured food article which may be said

sufficient to pleasantly stimulate and invigorate. SALEM BREWERY ASS'N.

Salem's Famous Bottled Beer is especially brewed for domestic use. Its alcohol contents are just
