Brief News Bulletins

(UNITED PRESS LEASED WIRE.)

Washington, Sept. 5.—Government monopoly of munitions of war is proposed in a resolution introduced in the house yesterday afternoon by Representative William Kent of California. The trusts Kent declared, now control the country's ammunition output and are charging extortionate prices.

Washington, Sept. 5.—A bill allowing entrymen, failing to perfect first entry, to make a second entry, was introduced in the senate yesterday afternoon by Senator Miles Poindexter of Washington. A sale of rights or fraud would debar entrymen from a second chance.

Olympia, Wash., Sept. 5.—That despite statements to the contrary, Washington as a state is enjoying a period of unprecedented prosperity is shown today by the report of the state banks to the state examiner, Walter E. Hanson. The reports show that the resources of the state banks amount to \$120,415,924.77. The total deposits are \$88,358,499.19, not including \$10,424,961.96 trust deposits. This is a large increase over the deposits a year ago.

Walla Walla, Wash., Sept. 5.—Under the ruling of the attorney-general by the terms of which was declared unlawful for a county official to employ a member of his family, County Auditor John W. Sweazy today has released his wife from the office force. Mrs. Sweazy had held the position for three years.

Washington, Sept. 5.—The administration yesterday afternoon received absolute assurance from Mexico City that Provisional President Huerta had irrevocably eliminated himself as a candidate for the presidency in the October election. It was also authoritative y stated that Huerta had promised President Wilson that the election would be conducted in a legal and orderly manner.

Washington, Sept. 5.—At the currency bill hearing before the senate finance committee today, Festus Wade of St. Louis asserted that representatives of the American Bankers association came here merely to voice a patriotic warning against a measure which is a public danger. He said the bankers regarded the issuance of currency by the United States treasury as "weakening the republic."

Washington, Sept. 5.—Congressmen Allen of Ohio and Stephens of New Hampshire today are drafting a bill which will provide for the abolition of all wooden cars in the United States within five years. It probably will be reported for passage at the special session of congress. The bill will demand that every railroad retire 20 per cent of its wooden cars annually, beginning January 1.

San Francisco, Sept. 5.—Preparations are about completed here today for the sailing of the transport Buford from this port to the west coast of Mexico to take aboard American refugees, in compliance with recent orders issued by President Wilson. The Buford today is coaling at the Fort Mason docks and food sufficient to feed 1000 persons three weeks, exclusive of the crew, also is being taken aboard. The Buford will sail for Mexican waters Monday afternoon.

Chicago, Sept. 5.—Harold Schneider, a vaudeville actor, is today directly accused of the sensational murder of Joseph Logue, a pawnbroker killed in McVicker theater building some months ago, by Johnny Faith, who is jointly charged with the murder. Faith testified at Schneider's habeas corpus hearing that he and Schneider planned the killing, but that Faith's common law wife persuaded him not to participate. Later, he swore, Schneider alone slew Logue.

Chicago, Sept. 5.—Announcing that a new race of supermen is being developed in America and that a young Chicagoan whose identity is being closely guarded, may be chosen to represent the Messiah on earth, the vanguard of the national convention of Theosophists began arriving here yesterday. The convention will discuss plans for extending a colony to Corvus, Calif., to develop the new race.

"OW!" Corns? Use "Gets-It"

"GETS-IT," the New Plan Corn Cure, Makes Any Corn Shrive, Vanish. You'll say, "It does beat all how quick 'GETS-IT' got rid of that corn. It's almost magic!" "GETS-IT" gets every corn, every time, as sure as the sun rises. It takes about two seconds to apply it. Corn pains stop, you forget the corn, the corn shrivels up, and it is gone! Ever try anything like that? You never did. There's no more fussing with plasters that press on the corn, no more salves that take off the surrounding flesh, no more bandages. No more knives, files or razors that make corns grow, and causes danger of blood poison. "GETS-IT" is equally harmless to healthy or irritated flesh. It "gets" every corn, wart, callus and bunion you've got.

"GETS-IT" is sold at all drug-gists' at 25c a bottle, or sent on receipt of price by E. Lawrence & Co., Chicago.

Madame, If You'd Use "GETS-IT" For Corns, You Could Wear Any Tight Shoe Easily.

A NATURAL RIDDLE

Attraction of Gravitation Is a Mystery to Science.

IT CONTROLS THE UNIVERSE.

Yet That Wonderful Force That Directs and Regulates Moons, Planets, Stars and Stars Without Visible Means of Connection Is Inexplicable.

The mystery of mysteries in science is the attraction of gravitation—that very force of nature that is the most familiar to us all. It seems strange that the most familiar thing in the world should be at the same time the most inexplicable, but so it is.

In order to see clearly wherein the mystery consists, let us first consider what gravitation appears to be. It is gravitation that gives the property of weight to all bodies. If there were no gravitation we could float like thistle-downs and infinitely better than thistle-downs, for they, too, are finally brought down by gravitation.

It is gravitation that brings a cannon ball eventually to the earth, no matter how swiftly it may be projected. The faster it starts the farther it will go, but during every second of its flight it drops the same distance vertically toward the earth, whether the speed imparted to it by the powder is 500 or 5,000 feet per second. Gravitation acts on a moving body exactly as well as on one at rest.

It is gravitation that curbs the motion of the moon and keeps it in an orbit of which the earth is the active focus.

So, too, it is gravitation that governs the earth in its motion around the sun, preventing it from flying away into boundless space. Astronomy shows that gravitation acts between all the planets and all the stars and controls their motions with respect to one another.

Now, this mysterious force appears to be an attraction, as if there were elastic cords connecting all the bodies in space and tending to draw them together. But space, as far as our senses can detect, is empty. There are no elastic cords and no physical connections whatever between astronomical bodies or between a flying stone or cannon ball and the earth. How, then, can there be an attraction? In order that a body may be attracted or drawn there must be something to draw it. Gravitation does the trick, but completely hides from us the mechanism through which it acts. We can discover no mechanism at all.

When an unfortunate aeroplanist drops from his machine at a height of a thousand feet he begins at once to fall toward the earth as if it were pulling him. But how can it pull if it has nothing to pull with? You may think at first sight that it is the air which acts as an intermediary, but that is not so, because the earth and the moon "pull" upon one another with a force equal to the strength of a steel cable 500 miles in diameter. But there is no air and no other tangible thing in the open space, 240,000 miles across, that gaps between the moon and the earth.

Then, gravitation exerts the same force at every instant. No matter how fast the falling aeronaut may be descending at any moment, gravitation will keep on adding speed as if he had just started. Disregarding the slight retardation produced by the resistance of the air, he will fall sixteen feet in the first second, forty-eight feet in the second second, eighty feet in the third second, gaining thirty-two feet in his velocity during every second after the first.

From a height of 1,000 feet he will come down in about eight seconds, and will strike the ground with a velocity of about 250 feet per second. From a height of 10,000 feet he would fall in about twenty-five seconds and would strike with a velocity of 400 feet per second.

The same kind of calculation can be applied to the gravitation between the earth and the moon. If the moon were not in motion across the direction of the earth's "pull" it would fall to the earth in about 116 hours.

Now, to return to the mystery, how is this force exerted? Is it really a pull, as it seems to be? The answer to which science is tending is that instead of being a pull, gravitation is a push; in other words, that the falling aeronaut is pushed toward the ground and the moon is pushed toward the earth.

On the face of it one might think that nothing was gained by this theory, because it seems as impossible that a push should be exerted without a tangible connection as a pull. But the clew is found in the supposed properties of that invisible, intangible, all pervading medium called the ether.

This, to be sure, is explaining one mystery by another, for we know nothing about the ether except that it conveys the waves of light and electricity; but, at any rate, it affords a conceivable explanation of gravitation. Dr. Charles F. Brush's theory regards the ether as being filled with a peculiar form of waves and that material bodies may intercept these waves in such a way as to be pushed toward one another on account of the diminished effect of the ether waves in the space between the bodies.—Garrett P. Serviss in New York Journal.

If you know how to spend less than you get you have the philosopher's stone.—Benjamin Franklin.

The average girl is even willing to marry a brainy man if she can't do any better.

The fool man who is always asking for advice should be advised to keep his mouth closed.

OLCOTT AND KAY
(Continued from page one.)

as set forth in the complaint, to \$16,905.92.

In Sequel of Quarrel.

The complaint filed by Attorney General Crawford today is the sequel to a long standing and bitter quarrel between Governor West and The Evening Oregon of Portland. Several months ago the local representative of the Oregon wrote an article in which he accused the governor of unlawfully appropriating moneys from the prison revolving fund with which to pay improvements, cover expenses incurred by catching escaped "honored," and using the fund for several other purposes for which it was not intended by the statute. Shortly after the article appeared, the governor threatened to sue the Telegram for \$16,905.92. This suit was never filed.

He then addressed a communication to Attorney General Crawford in which he directed the attorney general to bring suit against him, West, if the story in the Telegram was true, but if, on the other hand, the story was not true, to institute suit against the Telegram. It is understood that the com-

plaint filed today has been in the attorney-general's hands for the past month.

Signs Protests to Warrants.

According to other state officials, there is no such thing as a "prison revolving fund." The name "revolving fund" originated from the fact that the law provides that all moneys received from the penitentiary brick yard, stove foundry and other prison manufacturing institutions shall revert back into the general state fund, and for this reason Treasurer Kay first refused to honor the warrants drawn against the fund but later signed them under protest. Governor West, it is understood, finally agreed to close up the "revolving fund" after Secretary Olcott also expressed himself as being opposed to drawing on the prison funds for any other purpose than designated by law and the expenditure of the moneys ceased.

According to the attorney general, not one cent of the \$16,918.83 alleged to have been expended by the board should have been taken out of the fund for the purposes for which it was used, and that the defendants had no legal right to molest the fund.

Chamberlain Involved.

Governor West instructed the attorney general by letter of May 7 last, after charges were made in the Oregonian and Telegram that the funds of the prison brickyard had not been turned over to the state treasurer as required by law, to investigate the matter, and if he found this was true to bring suit against the guilty parties whoever they might be. It seems that the board only followed the practice of preceding boards, and that if this board did not handle the funds properly then the preceding boards are in the same fix and suits should be brought against them. This would bring in as parties defendant the Chamberlain administration and Chamberlain as governor, Dunbar as secretary of state and Steels and Moore as state treasurers and also Gatens as private secretary of the governor.

The Bowerman administration would also be liable with Bowerman as governor, Benson as secretary of state and "Pat" McArthur as the governor's private secretary.

If the suit against West and the others sticks, it will become necessary to also sue the parties named for they are all in the same boat.

REBEL PLOT UNCOVERED.

(UNITED PRESS LEASED WIRE.)

San Juan Del Sur, Nicaragua, Sept. 5.—That the government has discovered a Liberal plot for a revolution leaked out today. It was said simultaneous uprisings were planned at Managua and Leon.

CAMINETTI CASE

(Continued from page 1.)

by manifestation of affections, attentions, automobile rides, gentle compliments, theatres and in other ways wins her confidence and love, and who then breaks down her sense of delicacy for the final submission.

"It is essential that you find the defendant holding the intent, together with commission of the act, but this need not have been held for any particular period of time previous. It may simply co-exist with the act charged.

"If the motive of fear alleged by the defendant is found to have existed, with the other motives at the same time as a reason for going to Reno, you men of the jury may disregard the first."

Charges Against Him.

The four charges against Caminetti follow:

1. That he aided in the transportation of Lola Norris from Sacramento to Reno for immoral purposes.
2. That he aided in the transportation to Reno for immoral purposes Marsha Warrington.
3. That he persuaded and enticed and aided in entering Lola Norris to leave her home and accompany him to Reno.
4. That he so aided in persuading and enticing Marsha Warrington, Maury I. Diggs' companion, in leaving Sacramento for Reno.

A CURIOUS LOVE SCENE.

Rochefort Sprang a Surprise on the Troubled Couple.

Rochefort could be very democratic on occasions. I remember an amusing incident which occurred when Rochefort was in London. His French chambermaid fell in love with his English roachman, and they were engaged to be married. John, who never spoke of Rochefort otherwise than as "the marquis," gloomily informed Charlotte that their project must be kept a profound secret, for it was a custom in aristocratic houses in London that when servants in the same household became engaged to be married they were promptly dismissed. Charlotte could hardly believe this, but John assured her that it was so.

At last Charlotte took her courage in two hands and, dragging the trembling John behind her, advanced into the awesome presence of "the marquis" while he was taking coffee after lunch. I was present and witnessed the scene. "Monsieur Rochefort," said the chambermaid boldly, "I have something to tell you."

Rochefort—Tell me, my child.

Charlotte—John loves me, and I love John, and we want to be married. (John went as pale as a sheet.) Does monsieur see any objection?

Rochefort (his great blue eyes dancing with fun, his arms raised in the air)—Objection, my children, objection? What earthly objection can I have? Venes done que je vous embrasse! (Come and let me embrace you.)

And, to the utter amazement of John, he heartily kissed both young lovers on both cheeks.—Westminster Gazette.

Paint Keeps the Home Bright

A LITTLE paint here, a touch of enamel there, a brushful of varnish yonder—everyone can see a dozen or more such opportunities for brightening and beautifying the home.

Perhaps it's the outside of the house that needs protection from the ravages of the weather; perhaps it's a chair, or dresser, the floor or wood-work that has become worn and shabby, or perhaps it's the family carriage, the farm wagon or the lawn swing that has ceased to be a source of pride.

No matter what it is that has become marred and unsightly from age and wear, there's an Acme Quality paint, enamel, stain or varnish that will exactly fit the need. We are agents in this vicinity for

ACME QUALITY PAINTS AND FINISHES

—the most scientifically prepared, the most satisfactory in appearance and wear, made in the largest paint and varnish plant in the world. Simply tell us what you want to do, ask for the proper Acme Quality goods for that purpose and you are sure to get the best that can be made.

The Acme Quality Painting Guide Book tells what Acme Quality Paint, Enamel, Stain, Varnish or Finish to use, how much will be required and how it should be put on. It not only enables you to tell your painter or decorator exactly what you want, but makes it easy for you to refinish the many surfaces about the home that do not require the skill of the expert—the jobs that a painter would not bother with. Ask us for a copy. It's Free.
