

### FRISCO WILL BE ALL READY MONTHS AHEAD

Prediction Made Panama-Pacific Exposition Will Be Completed Half Year Before Opening.

### RECORD BROKEN BY WORKERS ENGAGED IN PREPARATIONS

Something About Building Which Are Nearly Completed or Are in Process of Construction.

[UNITED PRESS LEASED WIRE.]  
 San Francisco, March 13.—The Panama-Pacific exposition will be completed eight months before the date of its scheduled opening—February 20, 1915. This was the promise made here today by its directors.

San Francisco has just turned herself loose along the two-mile waterfront of the nearly completed "enchanted city." She filled the entire day and part of a night with jubilation, sports, a naval display, races, oratory, grand opera and bombardment of cannon, because she had made another world record.

The jubilee was celebrated among the newly completed towering places with their marbled domes and their half-completed parks and gorgeous gardens. And it was called forth by the certainty that everyone of the mammoth exhibition palaces—each one covering from five to ten acres—and every lake and fountain and avenue and garden and all the minor palaces of the exposition will be completed and ready for occupancy just eight months before the opening day. The record which the hustling Californians have broken is this: The Panama-Pacific exposition will be ready, not merely on time, but long before; and since no other world's fair has been ready till long afterwards, this was considered reason a-plenty for its creators to jump up and crack their collective heels together.

One year before its opening day, the \$50,000,000 show place was a little more than 80 per cent finished. The first of the gigantic buildings to be completed was the palace of machinery—the largest wooden building ever constructed. Its completion was celebrated last December by the first indoor aeroplane flight ever made, when Lincoln Beachey flew the length of its 1,000 foot nave, under its roof of Pompeian red. The next building to be completed was the huge palace of education and social economy. This will be followed by the completion early this month of the palaces of agriculture, varied industries and mines and metallurgy. These already are roofed and domed and the Travertine marble coating of the exterior walls is finished.

The palaces of manufactures, transportation, food products and liberal arts will be finished not later than June 1. Last to be completed will be the two most beautiful structures of all—the crystal palace of horticulture, with its glass dome, 152 feet in diameter—the largest dome in the world—and the palace of fine arts, which, built of enduring steel and cement, will extend in semi-lunar form nearly a quarter of a mile along a forest-bordered wilderness lake.

Under the dome of this building and dominating the whole display of statuary, will be the first statue ever erected to motherhood, the contribution of the Pioneer Mothers' association of California. This building will house the largest loan collection of paintings, mostly modern, from Europe and America, ever assembled at an exposition.

It was estimated today that 60,000 exhibitors will be represented in these various exhibit palaces. Three times as much space for displays from all over the world has been applied for as the 11 palaces can accommodate. No exhibit not manufactured or produced within the past 10 years will be received in competition for prizes.

It is planned to make the exhibit unique in many respects. For example, practically all the exhibits even including those having to do with education

### TURN HAIR DARK WITH SAGE TEA

Grandma Kept Her Locks Dark, Glossy and Thick With a Simple Mixture of Sage Tea and Sulphur.

The old-time mixture of Sage Tea and Sulphur for darkening gray, streaked and faded hair is grandmother's treatment, and folks are again using it to keep their hair a good, even color, which is quite sensible, as we are living in an age when a youthful appearance is of the greatest advantage.

Nowadays, though, we don't have the troublesome task of gathering the sage and the musky mixing at home. All drug stores sell the ready-to-use product called "Wyeth's Sage and Sulphur Hair Remedy" for about 50 cents a bottle. It is very popular because nobody can discover it has been applied. Simply moisten your comb or a soft brush with it and draw this through your hair, taking one small strand at a time; by morning the gray hair disappears, but what delights the ladies with Wyeth's Sage and Sulphur is that, besides beautifully darkening the hair after a few applications, it also produces that soft lustre and appearance of abundance which is so attractive; besides, prevents dandruff, itching scalp and falling hair. Local agent, J. C. Perry.

tion, social economy, labor, horticulture, and factory products, will be displayed in living processes—working models—a sort of laboratory for the fourteen millions of visitors who are expected to come as students to this universal university.

Up to date 34 foreign nations have elected to be presented officially by pavilions and comprehensive exhibits; a greater representation than any previous exposition has been able to boast.

The vast interest aroused in the San Francisco celebration is shown by the fact that every American nation between the Arctic ocean and the south pole, will be represented by buildings and displays—Argentina leading all the rest with an appropriation of \$3,000,000.

Even nations so distant as Turkey, China, and Japan, will spend the enormous sum of \$700,000 each on their displays. France, which fell down on her Panama canal construction plans, shows her sporting blood by appropriating \$500,000 to participate in the celebration.

Thirty-five states of the union have already decided to erect buildings. The others are soon to take similar action.

### STORES ORDERED CLOSED.

New York, March 13.—The two big department stores operated here by Henry Seigel and his partners were ordered closed yesterday afternoon by the federal court.

### HEADACHY, COSTIVE, BILIOUS,—"CASCARETS"

Sick Headache, Bad Breath, Sour Stomach, Meas Liver and Bowels Are Clogged—Cheer Up!

Get a 10-cent box.

Sick headache, biliousness, dizziness, coated tongue, foul taste and foul breath—always trace them to torpid liver; delayed, fermenting food in the bowels or sour, gassy stomach.

Poisonous matter clogged in the intestines, instead of being cast out of the system is re-absorbed into the blood. When this poison reaches the delicate brain tissue it causes congestion and that dull, throbbing, sickening headache.

Cascarets immediately cleanse the stomach, remove the sour, undigested food and foul gases, take the excess bile from the liver and carry out all the constipated waste matter and poisons in the bowels.

A Cascaret tonight will surely straighten you out by morning. They work while you sleep—a 10-cent box from your druggist means your head clear, stomach sweet and your liver and bowels regular for months.

### TRANSACTIONS LARGER THAN ONE YEAR AGO

Stock Exchange Record is Below That of Years Previous to 1913, According to Henry Clews.

### OUTLOOK FOR IMPROVEMENT DURING SPRING MONTHS

Evidence of Torpor Found in Monthly Statement of New Incorporations in Eastern States.

BY HENRY CLEWS. [UNITED PRESS LEASED WIRE.]

New York, March 11.—Transactions on the stock exchange in both bonds and stocks are larger than a year ago, but still considerably below the proportions of previous years. Neither confidence nor business have yet fully recovered from the shocks and reaction of the last few years. Last week the market was discouraged by developments in Mexico, by the poor reports of a number of eastern trunk lines and by the recent severity of the weather, which imposed a sharp restraint upon traffic and industrial operations in general. Steel orders were less in February than in January, although mills were more busily employed on account of the increase in January orders. Generally speaking, the business situation is sound, and the outlook is for improvement when spring approaches. The declining tendency of money has been checked, and there is the possibility of temporarily firmer rates as the first of April approaches. Bank reserves have fallen from \$40,000,000 in the first week of February to below \$27,000,000 a week ago, loans meanwhile having steadily increased from \$1,849,000,000 December 13 to \$2,059,754,000 a week ago. The reserves, however, will soon be aided by the return of Canadian funds to this market which will serve to compensate for the further outflow of gold to Paris. The western credit situation still attracts some attention in view of the real estate situation out there, and the fact that the farmers are in debt more heavily than usual, although not to any embarrassing extent. The crop situation is now a matter of increased interest, and the heavy precipitation of snow and rain during the winter months should leave the soil in general good condition. The railroad situation is still somewhat embarrassing owing to declining earnings, which emphasize the necessity of the interstate commerce commission granting some concessions. It can hardly be expected that the full 5 per cent will be conceded, but there is good reason to hope for a 2½ to 3 per cent advance, particularly on the eastern lines which are feeling the depression much more keenly than those in the west. No lasting improvement can be expected in the railroad situation until this rate problem is settled. The outbreak in Brazil had more effect in London than here, though this market is sure to feel the disturbance indirectly.

### Evidence of Torpor.

Evidence of business torpor is found in the monthly statements of new incorporations in the eastern states—those incorporated for \$1,000,000 or over, having amounted in February to only \$51,000,000, compared with \$121,000,000 a year ago. Since January 1, the total was only \$171,000,000 in comparison with \$524,000,000 a year ago. Allowing that the figures a year ago were unusually large, this is a striking illustration of the shrinkage in business initiative. The record of new issues confirms this general trend. The total issues reported since January 1 of railroad an industrial corporations was \$306,000,000, against \$493,000,000 a year ago. For the month of February the total was \$176,000,000 as compared with \$343,000,000 in February of last year, when the returns were also exceptionally large. Nevertheless, there has been a notable improvement in the bond market during the last few weeks when the issues were of a desirable character; and it is notable that a larger

### HOW RESTAURANTS OF CITY ARE CLASSIFIED

City Health Officer Miles Gives Out Information of Much Interest to Residents of Salem.

### NOODLE HOUSES COME AT BOTTOM OF LIST SCORED.

Royale Cafeteria Is at Head and Is Closely Followed by the Baker, Marlon and Dilleys House.

City Health Officer Miles today issued his monthly health bulletin and, for the first time, has included in it a report of the work being done in the way of inspecting and scoring restaurants and eating houses under the federal score card system, a copy of which appeared in The Capital Journal recently.

There are 29 restaurants and eating places in the city which have been inspected by Deputy Health Officer, J. D. Hartwell and the following report has been made by the department for the month of February:

Name	Score
Royale Cafeteria	93.0
The Baker	89.2
Marlon Hotel	88.3
Dilleys House	87.9
The Leonard	85.3
Cherry City Cafe	84.3
Florence Hotel	83.5
Bent's Restaurant	83.4
Royal Bakery Lunch	83.3
Oen Restaurant	83.0
Salem Hotel	82.3
Farmers' Home	81.8
White Swan Dairy Lunch	80.2
Neil's Boarding House	78.1
Depot Hotel	76.3
Scott's Restaurant	75.1
Modern Lunch Room	74.7
Cottage Hotel	73.3
White House Restaurant	69.4
City Restaurant	69.4
Salem Restaurant	68.4
Electric Restaurant	68.3
Kozy Kitchen	67.7
New England Chop House	63.7
Smith's Short Order Restaurant	60.3
Peerless Cafe	47.1
T. Matsumoto Noodle House	46.0
Wa Hong Noodle House	39.8
Lou On Noodle House	31.0
White House restaurant remodeling kitchen	

### Better International Feeling.

Indirectly this Mexican difficulty is playing a very important part in our foreign relations. Britain's exhibition of friendliness and patience has visibly strengthened the entente cordiale between the two nations, and this notwithstanding the strain recently imposed by our inclination to disregard the Panama treaty. President Wilson's open determination to stand by that treaty as a matter of national honor, will tend to make the rapprochement dictated on both sides by intelligent self-interest and common honesty. Since there are several important questions between the United States and Great Britain requiring solution, such a state of mutual understanding is exceedingly fortunate, and bodes well for a final adjustment of differences, satisfactory to both sides. As a nation we are exceedingly sensitive about the Monroe Doctrine, the indefinite claims of which are always a source of possible international difficulty. It may not be generally known that this doctrine is really originated with Canning, the prime minister of England, in the early days of this republic, who as an offset to the threatening powers of the Holy Alliance suggested this policy to the American minister in London. He in turn promptly forwarded the suggestion to Washington, where its value was quickly recognized by President Monroe and his cabinet. The latter's memorable pronouncement followed, declaring our intentions in regard to countries south of us. Great Britain has consequently always been friendly to any reasonable interpretation of the Monroe Doctrine, more so than Germany or any other European power, and her endorsement undoubtedly strengthens our ability to enforce it. Nevertheless the Monroe Doctrine is a claim of much vagueness and many dangerous possibilities; a claim that should be exercised with much discretion until more keenly defined. It is exceedingly unpopular with all nations in South America, who naturally do not relish our playing the big policeman without their consent. Nor do some of the great powers like our standing in the way of their colonial ambitions. As they become more and more thickly populated the national land hunger will increase, and the overflow of population may seek new fields in South America. Such a development is of much economic importance to the United States; hence the necessity of an interpretation of the Monroe Doctrine that will encourage and not discourage the commercial growth of that vast and rich territory.

### THE PRECISE MAN.

"It looks like rain."  
 "I beg your pardon."  
 "I say it looks like rain."  
 "What does?"  
 "The weather."  
 "The weather, my dear sir, is a condition. Rain is water in the act of falling from the clouds. It is impossible they should look alike."  
 "What I meant was that the sky looked like rain."  
 "Equally impossible. The sky is the blue vault above us—the seeming arch or dome that we call the heavens. It does not resemble falling water in the least."  
 "Well, then if you are so thunderingly particular, it looks as if it would rain."  
 "The weather, of course."  
 "The weather, as before stated, being a condition, cannot rain."  
 "The clouds, then confound you! I may not know as much about it as you do, but I've got enough sense to get in out of it, and you haven't," said the man, as he raised his umbrella and walked away in a huff.

### SAYS RICH RADIUM CLAIMS ARE TO BE FOUND IN DESERT.

[UNITED PRESS LEASED WIRE.]

Pasadena, Cal., March 13.—Fearing a radium "rush" that would rival the gold rushes of former days, F. J. Main and four associates left here secretly to begin work on a newly discovered deposit of radium-bearing ore. Their claims are located in the desert in San Bernardino county.

Main admits the claims have been worked for gold, but says that their new-found radium values will place southern California in the lead among radium producing sections on account of the immense size of the deposits.

The men left here in two four horse wagons and expected to make the trip in about six days. They took elaborate precautions to prevent being followed, although they asserted that all the claims of known value were taken. Main is an old prospector.

### NOMINATIONS SENT TO SENATE FOR CONFIRMATION.

[UNITED PRESS LEASED WIRE.]

Washington, March 13.—The following nominations were sent to the senate yesterday:

Ralph Quarles, of Honolulu, to be assistant justice of the supreme court of Hawaii.

Wade Thayer, of Honolulu, to be secretary of the interior for Hawaii.

William May of Culebra, to be marshal for the Panama canal zone.

The less a woman means it the louder she can laugh.

### Statement About Conditions.

These 29 restaurants or eating houses were inspected and scored according to federal score card system, and to give the readers an idea of the carelessness with which some of our food is handled, the following are some of the conditions found during the inspection:

Tin cans used for kitchen utensils 9

Canned vegetables left in tins after being opened 4

Kitchen and storeroom very dark and poorly ventilated 8

Storeroom needs cleaning 11

Cockroaches found in kitchen 5

Ice boxes unsanitary 4

Silverware and dishes not clean 4

Kitchen table unsanitary 3

Rat holes found in kitchen floor 6

Evidence of mice seen 4

Cooking utensils dirty 3

Windows very dirty 3

Rubbish and filth in back yard 3

Garbage can filthy 6

### Death Rate Low.

The death rate in Salem for the month of February was extremely low for a population of 18,000 according to Dr. Miles' report. There were but 22 deaths during the month, 6 males and 16 females. To offset this decrease in population, there were 15 male and 8 female births during the month, making a total of 23. The deaths were caused by the following diseases: La grippe, 1; lobar pneumonia, 2; cancer of the stomach, 2; hypertrophy of ear, 1; maniacal exhaustion, 1; arterio sclerosis, 1; Bright's disease, 1 and scullery, 3.

The greater number of deaths
