The police said they expected to place some charge against Fowler before Monday, when he will ask for his release on a writ of habeas corpus. As a result of the protest of the executive committee of the Portland typographical union to the state printing board against its action in naming W. M. Plimpton as temporary state printer to fill the position during the coming session of the legislature, it is probable that the board will reconsider its former action when, upon the suggestion of the board, the printing fraternity present a list of eligibles for the position from which the board may select a suitable candidate for the appointment between now and the first of the year, when the law prescribes the selection of a state printer shall be made. The protest was made, as was predicted in the Journal, on constitutional grounds—that Mr. Plimpton has not had "10 years actual experience in the art and science of printing" and is not qualified to fill the position, and the action taken by the typographical union is intended to force the hands of the board to make the appointment of some practical printer.
