

Social and Personal

UNMISTAKABLE signs betokening the passing of winter and the approach of spring are here! They can be seen in any downtown shop window.

Looking at the new styles and considering the possibility of transforming last summer's clinging and springy-made gowns into a replica of the crisp, bell-skirted, high-necked and full-skirted models displayed, the study develops into something of an unsolvable puzzle.

There is a subtle coquetry about the new hats that is quite alluring. They are so small, so round, so perky, worn, as they should be, cocked over one eye, that they are bound to give a vivacious, sophisticated air to the mildest wearer.

At the Salem Heights school tonight the following program will be given. The event to be an elocutionary contest in connection with the regular Parent-Teacher association meeting.

Shiny black shoes, gleaming white gaiters, a black cloth suit with white waistcoat and white collar, a black hat with a white crown, and a black veil with white dots and a white band bordering it.

The bell-shaped skirts are short, revealing every inch of the white spats. The shoulders are narrow, the head small, the hat worn well forward and to one side, the hair being drawn straight and close back over the ears, the coiffure probably drawing the modern woman as a pyramid.

Miss Leona Cass Iner, dramatic critic of the Oregonian, will arrive tonight to remain for the week-end the guest of Mr. and Mrs. George E. Waters.

Tonight the Yeoman lodge will hold their special masquerade "once at the Moose hall. The grand march will begin promptly at 9 o'clock and the music will be furnished by the Yeoman orchestra.

The community sing scheduled for a recent date at the Highland school and which was postponed owing to the general attention being paid the tabernacle meetings, will, now that those events are nearly past, be given Wednesday evening of the coming week at this school building.

Mrs. La Moine R. Clark has been appointed permanent director, and she will be assisted in all arrangements by a committee of four.

Mr. and Mrs. Andrew Vercler are among Salem people who will be present at the opening of the Panama-Pacific exposition in San Francisco tomorrow, going down some little time ago. They are with the Thomas Holmans (Viola Vercler).

Mrs. Ruth Sayre is contemplating going down to the exposition about April. She will spend some time there with friends and will also pass part of the summer in San Diego.

Mr. and Mrs. John Farrer will probably leave for San Francisco shortly afterwards, their sojourn to cover a week or more.

Cape Perpetua Road Is Nearing Completion

Portland, Or., Feb. 19.—Supervisor Rankin of Eugene, Oregon, announces that the road which the forest service, in co-operation with Lane and Lincoln counties, is building around Cape Perpetua, is nearing completion, and will be ready for use by wagon and auto this coming summer.

With the completion of this road, there will be a continuous highway along the Oregon coast from Newport to Gold Beach, or almost to the California line. That part of the road constructed by the forest service is about a mile and a quarter in length, and is located on the side of a steep mountain or promontory jutting out into the sea, the highest point on the road being 300 feet above sea level.

The construction of this road around the cape, was a very difficult piece of work. Most of the way had to be forced through solid rock so that much drilling and blasting had to be done. Furthermore, it was often difficult to keep a foot-hold on the face of the slope. In fact, it was found to be a task for both mules and men. On one occasion a mule went over the grade and turned a somersault down the side of the mountain about 90 feet, his fall being checked by some brush at the edge of a precipice. He was rescued and found to be little the worse for wear. At another time, one of the men fell about 50 feet down the bluff. He was holding a rope to guide a plow on the edge of the grade, and was walking along a 90 percent slope, clinging to the side-hill as best he could, when the rope broke and let him fall. He struck on his face and shoulder, then slid about 25 feet further landing on his feet. His comrades on the road above watched him with bated breath and wondered how they could get a dead man up that steep slope. To their surprise and relief, he turned and waved his hat to them! He was able to get out without assistance and resume his work. This incident has caused this spot to be named "Keller's Leap."

YOU CAN'T BRUSH OR WASH OUT DANDRUFF

The only sure way to get rid of dandruff is to dissolve it, then you destroy it entirely. To do this get about four ounces of ordinary liquid arvon; apply it at night when retiring; use enough to moisten the scalp and rub it in gently with the finger tips.

Do this tonight, and by morning most if not all of your dandruff will be gone, and three or four more applications will completely dissolve and entirely destroy every single grain and trace of it, no matter how much dandruff you may have.

You will find, too, that all itching and digging of the scalp will stop at once, and your hair will be fluffy, lustrous, glossy, silky and soft, and look and feel a hundred times better.

You can get liquid arvon at any drug store. It is inexpensive and never fails to do the work.

Polk County Farmer Captures Wild Goose

Dallas, Ore., Feb. 19.—One night this week John G. Rempel, residing near this city, was awakened by a loud quacking in his yard. There being no domestic geese on his farm, he was filled with curiosity to learn the source of noise, and, investigating, he found a wild goose, which had been crippled by a hunter, endeavoring to get through the meshes of a woven wire fence. Rempel caught the bird with his hands, and now has it in a pen. It weighs 8 1/2 pounds.

WHAT CAUSES COLDS?

This question and "How to Prevent Colds" is asked a thousand times every day. A cold is really a fever, not always caused by the weather but due to a disordered condition of the blood or lack of important food elements. In changing seasons fat foods are essential because they distribute heat by enriching the blood and so render the body better able to withstand the varying elements.

This is the underlying reason why the medicinal fats in Scott's Emulsion quickly overcome colds and build strength to prevent more serious sickness. It contains nature's medicinal fats, so skillfully prepared that the blood profits from every drop, and it is free from harmful drugs or alcohol.

Mrs. J. M. Madison went to the Rose City Saturday to spend a few days with
