HIGH SCHOOL CHIMNEY MAY GET INTO COURT

Engineer A. E. Strang Says Inside Measurement Should Be 24 Inches

According to an expert report rendered by Engineer A. E. Strang, of the insane asylum, to furnish the required draft capacity for the two sets of furnaces in the basement of the high school building the inside measurement of the two new chimneys for the structure must not be less than 24 inches.

The inside measurement of one of the chimneys, which has been completed by Contractor S. A. Hughes, according to the measurement of the building committee of the school board, is but 22 inches and the board of directors, at last night's meeting, authorized the building committee to consult with G. G. Bingham, attorney for the board, regarding what action is necessary to take in arriving at a settlement of the differences between the board and the contractor. In the meantime the first payment of \$500, which Architect Fred A. Legg, certified to the board as being due Mr. Hughes on the contract, is being held in abeyance pending an adjustment of the chimney differences.

The report of Engineer Strang, who examined the building and took measurements of the furnace and heating space of the building yesterday afternoon, was in substance that each of the furnaces in the double-set of four in the school basement showed a grate measurement of 8 feet, capable of development of 30 horse-power heating capacity, and that each set of four furnaces would require chimney draft of at least 24 inches inside measurement. Nothing was contained in Mr. Strang's report having any reference to the inside measurement of the new chimney or as to its adaptability to the needs of the furnaces.

It is presumed that Contractor Hughes, if he still stands upon the same ground of contention which he has assumed all along, will insist that the chimney was constructed in accordance with the outside measurements as described in the drawings accompanying the contract, and that it would have been a physical impossibility to follow out the inside measurements as prescribed for the chimney and use the materials described in the specifications. It is not a matter of how the dispute can be settled from a financial standpoint, as the board insists that the specifications governing the inside measurement of the flue be strictly adhered to without regard for outside measurement and the question will be whether or not the entire chimney will be condemned and rejected and the contractor be compelled to tear it down and build it over again according to specifications.

The school board also took up the matter of the plans for the new grade school building for South Salem, which are being prepared by Architect George M. Post, and arrangements were made for the entire board to meet upon the site of the school at 5:30 Thursday afternoon for the purpose of locating the exact spot for the school to be built upon and the building committee was authorized to make all arrangements for the sinking of a well upon the premises before building operations begin. Architect Post estimated last night that the total cost of the building, so far as he was able to figure at present, would be \$24,000, which would allow \$2000 for a heating plant, and with no allowance made for the building of a septic tank and the water supply system.

OBITUARY OF JOHN PEMBERTON.

After a lingering illness of three years, John Pemberton passed away at his home No. 1455 S. Commercial St., Salem, Oregon, at four o'clock, Friday morning, March 5, 1915, at the age of 58 years, 2 months and 19 days.

John Pemberton was born December 20, 1856, at Marion, Ind. He was the youngest of twelve children born to Jesse and Ruth Pearce Pemberton.

At the age of 7 years he moved to town with his parents, where he resided until he came to Oregon in 1866. February 29, 1877, he was united in marriage with Abneretta Van Horn. To this union was born three children, Florence, Ray and Bessie.

Born of Quaker parentage and reared in a Christian home, he gave his heart to God so early in life that he often expressed a regret that he could not remember the date of his conversion. He lived a consistent Christian life and his voice was often heard in prayer and testimony. The burden of his testimony for some time past had been that he might have a perfect love for every one and that he did love every one.

He was a life long and active member of the Friends Church and was a charter member of the South Salem Friends Church to which he belonged at the time of his death. He was especially interested in the educational work of the church and had been for years a member of the board of trustees of Pacific college.

Since coming to Oregon he has been actively engaged in different lines of business and was prominently identified in the prune industry. Seven years ago he moved from his former abode at Rosedale to Salem where he has resided ever since.

On the seventh of last November he had a slight stroke of apoplexy and had been gradually failing ever since. Two weeks ago at quarterly meeting he took a cold which continued to bother him for days but he recovered sufficiently to attend the series of meetings being conducted by his nephew, Elmer Pemberton, at the Friends church. He was in his place at the church each evening until on Thursday he had difficulty in breathing so did not go out that evening but joined his wife in prayer in the home. Retiring to bed, he could not rest and about two o'clock in the morning arose and sat before the fire. He thought that it was only the asthma which was hindering his breathing and intensifying his heart trouble. His son, Dr. Ray Pemberton, was called in but his call came at four o'clock and he went into the other world to realize the truth of the sentiment of the song he loved so well:

"When by His grace, I shall look on His face,
That will be glory for me."
He leaves a widow and two children, Florence (deceased) and Dr. J. Ray Pemberton, both of Salem. Bessie Edmondson, the youngest daughter, having preceded to the other home last July.

There are but two of the large family of brothers and sisters left, Allen and Clarence Pemberton, both of Salem. Of the others, six died in early childhood. Martha Newby died 9 years ago and Harmon Pemberton, 2 years ago.

Henry Pemberton, a minister, died about 12 years ago. Besides the immediate family, there are five grand-children, nephews and nieces and a host of other relatives and close friends who will sadly miss his friendly council and love.

COMB SAGE TEA IN HAIR TO DARKEN IT

Grandma kept her locks dark, glossy and thick with a simple mixture of Sage Tea and Sulphur.

The old-time mixture of Sage Tea and Sulphur for darkening gray, streaked and faded hair is grandma's treatment, and folks are again using it to keep their hair a good, even color, which is quite desirable, as we are living in an age when a youthful appearance is of the greatest advantage.

Nowadays, though we don't have the troublesome task of gathering the sage and the mussy mixing at home. All drug stores sell the ready-to-use product called "Wynd's Sage and Sulphur Hair Remedy" for about 50 cents a bottle. It is very popular because nobody can discover it has been applied. Simply moisten your comb or a soft brush with it and draw this through your hair, taking one small strand at a time; by morning the gray hair disappears, but what delights the ladies with Wynd's Sage and Sulphur is that, besides beautifully darkening the hair after a few applications, it also produces that soft luster and appearance of abundance which is so attractive; besides, prevents dandruff, itching scalp and falling hair. Local agent, J. C. Perry.

THE TORTURES OF RHEUMATISM

are always aggravated during damp, changeable weather and ordinary treatments are often useless.

Such conditions need the oil-fool in Scott's Emulsion to reduce the injurious acids and strengthen the organs to expel them.

Scott's Emulsion, with careful diet for one month, often relieves the lame muscles and stiffened joints and subdues the sharp, unbearable pains when other remedies have failed.

NO ALCOHOL IN SCOTT'S

Brave Austrian Fights Blindly Against Odds

London, Feb. 27.—(By mail to New York)—This is about the bravest man I have seen on either side in the great war. He is a half Dane and half Hungarian, and he is an officer in the Austro-Hungarian navy. His name is Olaf Wolff and he is only 38 years old. Wolff always fights with the odds against him. He is a right-handed man, but he always fights with his left hand. He is a right-handed man, but he always fights with his left hand. He is a right-handed man, but he always fights with his left hand.

At the beginning of the war there were four Austro-Hungarian monitors on the Danube. Little fighting boats of steel, 75 feet long and 30 feet wide, Wolff was called from his place in the high-sea navy to take charge of those four little boats on the river. It looked like an easy and interesting job. The steel armor of the boats, the big guns that could reach as far as any of the Serbian land batteries, the machine guns that could mow down any Serbian army as the low banks of the river looked like a lake.

The first crash out of the box, Wolff was ordered to take one of the monitors into the Save river, which forms the Serbian border. He dropped down the Danube from Vienna to Belgrade, where the Save has its mouth. It was a wonderful sight. The Serbians had blown up the great steel bridge and its twisted girders almost filled the water-way where the two rivers meet. There were mines at every hand. The great guns of Belgrade began to fire. One of the monitors, in a glancing way on the bank, killed 12 men. But the little monitor steamed ahead, turned into the Save, and ran up between the low banks of the Save to where Austrian and Serbian were fighting across the water.

The monitor raised havoc with the

URIC ACID IN MEAT CLOGS THE KIDNEYS

Take a Glass of Salts if Your Back Hurts or Bladder bothers You—Drink More Water.

If you must have your meat every day, eat it, but flush your kidneys with salts occasionally, says a noted authority who tells us that meat forms uric acid which almost paralyzes the kidneys in their efforts to expel it from the blood. They become sluggish and weaker, then you suffer with a dull you have rheumatic twinges. The uric acid coats, and when the weather is bad, is often get sore and irritated, obliging you to seek relief two or three times during the night.

To neutralize these irritating acids, to cleanse the kidneys and flush off the body's urinous waste, get four ounces of Jad Salts from any pharmacy here; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate sluggish kidneys, also to neutralize the acids in uric acid, so it no longer irritates, thus ending bladder weakness.

Jad Salts is inexpensive; cannot injure, and makes a delightful effervescent lithia-water drink.

"Pop, did the tournaments you read about always take place in the daytime?" "Of course, my son." "Then why did they call them knight affairs?"—New York Sun.

Wolff came up to Belgrade again, in another monitor. Twice before the run past Belgrade had meant death. It meant the same thing this time.

Three weeks later he took me into a boiler room of the monitor and showed the drop on him with its distant artillery. He finds that the enemy has got the exact range figured out to the last tiny fraction and that they can drop a shell into the canal any time they want to, as easily as a child drops a stone into a well.

Last Tribute Paid To Lincoln Beachey

San Francisco, March 17.—San Francisco paid her last tribute today to Aviator Lincoln Beachey.

The funeral of the intrepid aviator, who met death in a flight over the Panama-Pacific exposition grounds Sunday, was held here at 1 p. m. today under the auspices of the Elks. More than 300 friends of Beachey gathered to hear the eulogies voiced by Exalted Ruler Lewis of the Hyington Elks and President William Humphrey of the Olympic club.

Following the solemn Elks ritual for the dead, the St. Johns boy choir of which Beachey was a member during his youth sang at the request of the mother, Mrs. Amy Beachey.

The funeral was attended by representatives of the Panama-Pacific exposition, municipal officials and various organizations to which the aviator belonged. A long cortege of automobiles followed the remains to Mount Olivet cemetery for the interment.

Among the honorary pall bearers were Mayor Rolph, President Moore of the exposition, Superior Judge E. P. Shortall, and many other prominent citizens.

MUNICIPAL "KICK BUREAU."

Cleveland, March 17.—Cleveland's newest municipal innovation, created to be a municipal telephone complaint bureau.

The plan is before the city council with the support of City Service Director Sidlo. If successful the "kick" bureau will consist of a director and assistants who will make it their business to ascertain why "Mrs. Smith tried to get Mrs. Jones for two hours when Mrs. Jones was at home all the time"; why "the line was busy when it wasn't"; why "the operator wouldn't give Mr. Smith's nickel back when he didn't get his party"; and the innumerable other "whys" that occur every day. But the city will not make it a point to criticize the telephone company all the time. The municipal directors will probe "Mr. and Mrs. Subscriber," too, and find out just who it is that was wrong, and, if so, why.

"So Lady Gladys is back from the front?" "Yes, she couldn't find any body interesting or romantic to nurse."—Pittsburg Post.
