Bartlett pears are now coming into the market, and according to James Walton, the Drager Fruit company will probably ship 20 car loads and as many more from outlying points. The quality of the pears is improving, due to a great extent to the spraying that has been done following the suggestions of the county agronomist, and to the scientific methods now being adopted by the majority of growers. The low prices this year are due to the restricted foreign shipments.

Sensational Break In London and Paris

(Copyright 1915 by the New York Evening Post) New York, Aug. 8.—The feature of the financial situation today was a sensational break in exchange on London and Paris.

Sterling exchange declined to 4.75 1/2, a new low mark for the war period, compared to the previous low figure of 4.75 11-16 on June 30. The further break gave interest to the arrangements under way in London to arrange for large credit here. There has been no official announcement, but indications are that something must be done soon by London bankers to fortify the exchange market.

Exchange on Paris also touched a new low mark of 5.74 francs to the dollar against the previous low of 5.53 Berlin exchange was a trifle stronger. So far as the stock market was concerned general profit taking after an early advance caused some recession. There was apparently increased buying in a few railroads on the expectation of a favorable crop report, it was evident the demand for "war stocks" is not so keen as it was.

There were sharp advances in a few war stocks at the opening which was fairly active with heavy trading in some quarters. Some new high records were made, but the trading lacked the enthusiasm which has been so pronounced recently. Most of the speculation appeared to be in steel shares and the stocks of equipment companies. Pittsburg advices indicates the demand must become prominent soon if the railroads have prepared themselves to handle the large traffic expected when the crop movement is at its height. The government's August crop report on the whole is highly satisfactory.

Salem's municipal bathing beach did a land office business yesterday. Fully 600 people were on the beach and bathing, and the ferry worked overtime carrying, by actual count and the money taken in, 480. All of which seems to indicate that the idea of a municipal bathing beach was right and has the support of the people. In order to make things more comfortable, a refreshment stand is now doing business on the island and a checking room has been established for the convenience of the bathers.
