AVIATOR BELIEVES DEATH WAS PLOTTED

Snapping of Wire Not Due to Accident--Investigation Begun

San Francisco, Sept. 3.—A well defined report that the snapping of a wire on the monoplane of Silvio Petrossi, which almost resulted in the aviator's death late yesterday, was not due to an accident but was caused by design, was being investigated by detectives here today.

Petrossi landed in the bay off the exposition after a swift descent from a height of 1,000 feet and was rescued by a fishing boat.

The aviator today believes some one plotted his death.

Two hours before Petrossi was scheduled to make his flight a local newspaper received an inquiry by telephone as to a report that the aviator had been killed. A woman's voice asked if it was true that Petrossi had fallen and met his death. When the aviator actually fell a short time later an investigation was started. Petrossi, his manager and two Argentine commissioners to the exposition examined the wire which broke on the machine last night. It is declared to have borne evidence of having been tampered with. The wire was new and indications are said to have been that they had been weakened by a blow.

Efforts were being made today to run down the source of the rumor of Petrossi's accident which was circulated two hours before it occurred.

PUTER SUED FOR DAMAGES.

Oakland, Cal., Sept. 3.—S. A. D. Pater, millionaire timber owner of Berkeley, whose son, R. C. Pater, 18, ran down and killed Mrs. Mary Hogan in his automobile two weeks ago, was sued today for \$20,000 damages by Michael Hogan, on behalf of the minor children of the deceased. Hogan is a steambath captain in the employ of the Southern Pacific.

STATE DOCTORS AND DENTISTS.

San Francisco, Sept. 3.—That state doctors and dentists will be the natural sequence to the present economic conditions which do not permit many of the common people to enjoy physicians' and dentists' services, was the prediction made today by Dr. Guy Millberry, San Francisco dentist, before the National Dental Congress.

LITTLE DAMAGE TO LINER

New York, Sept. 3.—No serious damage was done by the fire which broke out in the hold of the liner Rotterdam in port at Amsterdam yesterday, cable advices stated today. The vessel is being repaired and will sail on schedule time for New York, the Holland-American line officers were informed.

508. Lanches put up for outings. Open Sunday.

C. H. Stewart, of Albany, president of the Willamette Valley association, and W. P. Groves, of Corvallis, a member of the executive committee, were in the city this morning conferring with Secretary Fred S. Byson regarding the fruit display at the Willamette Valley association at the Panama-Pacific exposition. It is the intention of the executive committee to arrange where by a fresh supply of fruit will be on display at the exposition during the fall months.

Harry Moreland Smith, a young man in Los Angeles, has asked Secretary of State Olcott to look up the records of the "Crows Jewell Children's Home" which he says was in operation in this state in 1889 and 95. Smith says that he was taken from the home in infancy and that he has no record of his birth or relatives and that he has a sister living in Portland of whom he knows nothing. He says that his father was a locomotive engineer and was killed in a wreck and that his mother died three months after his birth and he was put in the home.

Fred S. Bynon, W. E. Slater and Dr. S. S. Skiff were appointed last evening by Executive Ruler Anderson to act as a committee from the local lodge to arrange for the special Elk day at the state fair, Thursday, September 30. The committee will confer with Secretary W. A. Jones and expect to make arrangements by which Elk day will be the biggest day of the fair. The committee will arrange with the various Elk lodges in this part of the state by which all the lodges will send special delegations to assist in the program.

Tomorrow is public market day, and judging from the opinions expressed by many farmers this week, there should be creditable displays of farm produce at the booths on Ferry street at the corner of Liberty. Last Saturday the booths were mostly taken and those who brought their produce in early, were sold out by noon.

The success of the public market depends greatly on the number of farmers taking advantage of this chance to sell their produce, and their getting here early enough in the morning for those who are doing their Saturday marketing.

C. C. Lamb, of the extension division of the Oregon Agricultural college, was in the city yesterday. He was instrumental in organizing the Salem Poultry and Egg Circle, working with I. J. Chapin, county agriculturist. Mr. Lamb is a specialist in poultry husbandry and was the prime mover in the organization of the Circle here, and also at Corvallis and Lebanon. According to Mr. Lamb the Egg Circle here is getting along in fine shape and for the time it has been organized, doing more business than was expected. New members are being received into the Circle each week, and shipments are made that average the members from two to four cents cash more than the local market. Sherrill Fleming, president of the Circle, receives eggs every Tuesday, Thursday and Saturday afternoons at the Salem Fruit Union.

SOME SYMPTOMS OF SERIOUS EYE TROUBLE

- Dimness of vision, seeing spots, specks, etc., dance before the eyes.
- The atmosphere seems smoky and foggy.
- Seeing better some days than straight ahead.
- Seeing better sideways than straight ahead.
- Seeing better in the evening or early morning than at mid-day.
- Seeing a halo or circle about a light.
- Pain in or about the eyes.
- Constant or periodic headaches.

My nearly 32 years' experience in scientific eyesight testing is at your disposal. If I find glasses are not necessary, then I decline to supply them.

I do not use drops or drugs in making examinations as they are dangerous.

Dr. M. P. Mendelsohn
Doctor of Optics
210-211 U. S. BANK BUILDING
Salem, Oregon

The first cases of loganberries are being packed this week at the Draper Fruit company. Also, the first wagon load of prunes was received yesterday. Prunes are coming in much earlier this year than last and are generally running much larger.

W. A. Danielson, one of the owners of the Oregon theatre, returned yesterday from a visit to Portland. As a member of the American Institute of Electrical Engineers, he was invited to be present at the reception given General George W. Goethals in Portland on the evening of September 1.

The following parties will sail on the steamer Northern Pacific from Elvost tomorrow afternoon, bound for San Francisco: Mrs. Winifred R. Clark, Miss Edna Byrd, Mrs. E. Ostrander, Miss Marguerite Ostrander, Miss Margaret Mrs. Mrs. Margaret Hodges, Dr. W. O. Cox and H. Gunther.

The Salem fire department was called out at 12:30 today to put out a block east of south Commercial street. The burning grass threatened to spread until a barn was endangered but the department wet down the flames in short order without any damage being done.

David W. Eyre, assistant cashier of the United States National bank, will leave Saturday evening for Seattle, to attend the annual meeting of the American Bankers' association to be held in Seattle next week, accompanied by his wife. Before returning they will take several side trips, including Victoria and other Canadian cities.

A new and wonderful bird of the genus Columba has been captured by ex-Acting Mayor Mills and the specimen is now displayed at his downtown office. The bird's body is light tan with dark wings and it is said that it is a highly edible variety. Mr. Mills states unofficially that he has a farm listed where they may be raised in large numbers and in certain seasons are of great commercial value.

On account of the cement work being done on the walk leading from the state house to Cottage street and other hand improvements close to the new bank stand, the concert which was to have been given this evening has been postponed. The large attendance at the concert last Tuesday evening has inspired Manager Gardner to make a special effort for the last concert of the season, which will probably be sometime next week.

Hon. Merrill Moores, congressman from the Seventh district of Indiana, which includes Indianapolis, is in the city, coming to attend the Kinsey-Wilkinson university some 35 years ago and was yesterday looking over the remains of his early boyhood. Mr. Moores has the distinction of being the first republican congressman from the Indianapolis district since 1908, as this district had been in the habit of sending democrats to congress.

A real aeroplane passed through, and not over Salem this afternoon at 1 o'clock. It was the flying machine of U. W. Stromer who will appear at the Lima county fair at Seilo next week and was loaded on an automobile, wings and all. That is, all except the motor. The same motor is used for aeroplanes as well as hydroplane flights, and today Mr. Stromer is doing some hydroplane flying at Astoria. According to his mechanism, who had charge of the aeroplane as it was to be seen today, Mr. Stromer finds it much easier to travel by air than by rail. Home early tomorrow morning he will leave Astoria with his hydroplane, fly to Portland by bus and later in the day will pass through Salem on his way to Albany from which place he will ship the motor to Seilo. Thus, according to the mechanism, Mr. Stromer found hydroplane traveling much quicker than the rail service, as it was quite customary to travel down the water routes at the rate of 70 miles an hour.

SPECIAL SHOOT FOR BEGINNERS SCHEDULED

Handsome DuPont Trophy Offered To Winner of Twenty-Five Bird Event

The Capital City Rod and Gun club will stage a trap shoot for beginners at the Seventeenth street grounds Sunday, at which a fine bronze trophy in the form of a watch fob is to be given to the winner. This shoot is open to all men and women who have never shot at clay birds and the best record for 25 birds will win the trophy.

For the older shooters a practice shoot will be staged in order that the Salem shotgun experts may clear up their eyes for the final partridge which will become legitimate game October 1. This is the first shoot that has been scheduled for the Capital City Rod and Gun club since the first part of June, when the clay bird shooters quit for the season. Regular weekly shoots will be pulled off from noon on during the remainder of the coming season.

Portland Canoe Club To Paddle From Salem To Portland In Two Days

About forty canoes with 75 members of the Portland canoe club will leave this city Sunday morning to paddle down the Willamette to Portland over Sunday and Monday which is Labor day. The excursionists plan to spend two nights along the banks of the river, one at Salem and one at Astoria. C. A. Vibbert, secretary of the Salem Canoe club, was notified today by Harry Gammie, of Portland, that the Portland canoes would arrive in Salem tomorrow morning and the members would come down on the trail later as their duties would permit.

The unload of canoes will be taken along the river bank where the canoes will be unloaded into the water. The canoeists will spend the night camping out on the island across from the boat house of the Salem Canoe club.

C. A. Vibbert, Elmer Armstrong, Ed Ebbettson and Ervin Hays are planning to take the trip back with his Portland canoe fleet and it is probable that several other members of the Salem canoe club will join the party at the last moment.

Vessel Lumber Laden Attacked By Submarine

San Francisco, Sept. 3.—The Hind Rolph company, of San Francisco, today was advised by cable that its trader, William P. Lewis, and been fired on while off Queenstown by a German submarine.

Captain Manning and his crew of 30 men abandoned the vessel after the attack. They were taken on board the Danish motor ship Australia. No lives were lost. The report that the vessel had been sunk could not be verified by the owners.

The William P. Lewis sailed from Everett, Wash. March 29, with a cargo of 2,000,000 feet of lumber, bound for Shrewsbury, England. When the vessel was purchased by the local firm, it was named Robert Dunsen. It received its new name in honor of the pilot commissioner of San Francisco.

The vessel was under British registry. Officials of the company declared today they would wait further information regarding the attack before taking action.

Those who were soliciting donations to assist in the improvement of the Fair grounds road have not met with much encouragement today. When the proposition was put before the merchants to raise \$1,000, there was no doubt but that this amount could easily be raised. But when the highway commission refused to give \$2,000 state money for the road, then it was up to the merchants to raise this amount in addition to the original \$1,000. With the necessity of raising \$3,000 looking them in the face, the committee who were interested in securing subscriptions do not feel very optimistic today.

Salem seems to be a good point from which to start on a wedding tour, according to the Albany idea, and Albany seems to be a fine city from which to start on a honeymoon, according to the Salem idea. At least that is what happened last Wednesday evening. At exactly the hour of the Moores-Kinsey wedding in this city Wednesday evening, Edwin Furtmiller and Miss Julia Crowell were married in Albany. The wedding party in Salem left that evening by auto for Albany, from which place they started on their wedding journey, and the Albany newlyweds motored at the same time to Salem, from which point their wedding tour began.

Sterling's Remarkable Gain In Wall Street

(Copyright 1915 by the New York Evening Post.)
New York, Sept. 3.—Sterling, which reached \$4.62 yesterday, against Wednesday's \$4.50 and closed at \$4.61 on the street, opened today with an extraordinary overnight advance of 10 1/2.

This initial price of \$4.71 1/2 necessarily reflected operations in the London market before the New York opening, and those operations in turn must have been governed by actual arrangements for New York credit on London account.

It did not follow that the familiar \$500,000,000 had been already raised as that was quite improbable. But speculative Wall Street has been very blind in not anticipating similar advance if only tentative measures for relief, when from between \$50,000,000 and \$60,000,000 in American securities had been usually delivered a week ago by London to New York fiscal agents. After the opening sterling declined with some violence.

All kinds of rates were quoted by different houses simultaneously but \$4.64 was generally reported, which although below the opening, was substantially above yesterday.

Stocks were almost as erratic as exchange.

Suttles Lake Irrigation District Is Approved

State Engineer Lewis today approved the plans of the Suttles Lake Irrigation district, in Jefferson county, for the issuance of \$600,000 in bonds for the irrigation of 12,000 acres.

The district includes a total of 36,000 acres, much of which is in cultivation. Many of the settlers haul water ten or twelve miles for stock and domestic purposes. The rain fall is hardly sufficient for successful dry farming. If irrigation cannot be secured, many of these settlers claim they will have to move out and abandon their places.

A dam 58 feet high will be constructed to store 21,500 acre feet of water in Blue and Suttles lake at the head of the Metolus river. A canal 18 miles in length will carry water across the divide south of Black Butte, and to the lands lying on the west side of the Deschutes river. The estimated cost is approximately \$50 per acre. The land, where free of rock, appears to be of good quality and of reasonable depth.

This approval was based upon information furnished by Geo. S. Young, project engineer; O. Langruiard, consulting engineer, and a field inspection by Percy A. Cupper, assistant state engineer.

Donald Water Company Shows Loss For Year

The Donald Water Company operated at a loss for the year ending June 31 according to the report filed today at the office of the Public Utilities Commission. The report states that the operating revenues for the year were \$251,200 and that the operating expenses were \$372,226 with \$28.94 as taxes, leaving an operating loss of \$120,000.

The company has a capital stock of \$5,000, of which \$3,000 is outstanding. The plant pumped approximately 750,000 gallons of water last year at a daily average of about 2,000 gallons. The pumping was done by a gasoline engine and the water is furnished by a well 141 feet deep. A Eugene Aufranc, of 1845 South Commercial street, is president of the company, Auguste Aufranc of Donald is vice-president, and B. S. Quinn, of Donald, is secretary.

United States Willing To Arbitrate Differences

Washington, Sept. 3.—The United States is willing to settle the Lusitania and Arabic reparation claims at The Hague, it was declared on high authority at the state department today.

This does not mean arbitration of the points growing out of the torpedoing of these vessels by submarines. Germany has yielded on that issue. Settlement of the reparation claims relates only to the amount the Kaiser shall pay for the lives of Americans who were lost when the liners were destroyed.

Question Is Settled.

Amsterdam, Sept. 3.—It is surmised the questions at issue with America are now settled, a semi-official communication from Berlin reviewing the note submitted by Ambassador Von Bernstorff in Washington stated today.

Contract for the brick work on the building to be erected on Liberty street, adjoining Ye Liberty theatre, by the Ruth grocery company has been awarded to S. A. Hughes. Bids were submitted by A. L. Hendrick, S. E. Wolfe and F. A. Erickson. About 30 days will be required to finish the brick work and it is expected that the building will be ready for its occupants by the first of November.

I Saw an Ad

In a Portland paper recently where CASH is pictured as a King sitting on a THRONE, Cash is King and always will be all powerful in the commercial world. You can buy most anything cheaper for cash than on credit. We pay cash for our goods and get the benefit of the cash discount. We find that by carrying on a cash business we can give our customers better goods for less money than we can by the credit system.

Special Labor Day Program

A special "Labor Day" service to commemorate labor's holiday, will be held in the First Methodist church, corner Church and State, Sunday evening, September 5. C. O. Young, general organizer for the American Federation of Labor, will be the principal speaker. Mr. Young is an able speaker who knows his subject. "The Labor Movement," from years of experience among the laboring people of the United States, and all who hear him will have heard something worth while. Everybody, and especially the laboring people of Salem, are urged to be present at this meeting. A special musical program is also promised. Monday evening, September 6, Mr. Young will give another public address at the Labor hall, 437 Court Street.
