So Crisp

---and Delicious too!

There are definite reasons why the New Post Toasties are vastly superior in crispness and flavour to any other corn flakes.

In the new process of baking, intense heat raises tiny air "puffs" on each flake, bringing out a decidedly new and delicious flavour—the true flavour of the corn—unknown to the corn flakes of the past.

Owing to this new process the New Toasties maintain their crispness until eaten and do not grow soft and mushy in the bowl like other corn flakes.

The flavour is so delightfully pleasant that the New Post Toasties may be eaten and relished dry, though of course they are generally served with cream, rich milk, or fruit with a sprinkling of sugar.

Suppose you try the New Post Toasties
