ADMISSION 20c

Garden Lovers Should Begin To Plant Bulbs of Flowers

Garden lovers who wish their gardens or the ground around their houses to be rich with narcissus and jonquils, should begin their work without delay, for fall is the time to plant the bulbs of these flowers. The work should be undertaken as soon as, or even before an early frost has weakened the annual flowers in the bed.

In the case of narcissus, many households will find it advantageous to naturalize the plant so that it grows and blossoms on the lawn much as the wild flowers do. In many of the parks of the larger estates of England, in portions of North Carolina, on estates along the James River, in Virginia, and in old New England gardens, narcissus that were planted over half a century ago are still vigorous and produce every spring a beautiful display of blossoms.

To naturalize the narcissus it should be planted in the sod or partial shade. Make a small hole in the soil five or six inches deep, insert the bulb, point end up, and press the soil over the top. Planting in rows or geometrical figures should be avoided. An easy method of accomplishing this is to scatter the bulbs as if one were sowing seed, and then plant them where they happen to fall.

When the tulip and narcissus bulbs are planted in the beds, the surface of the soil should be loosened after each rain and the bed kept free from weeds in the late fall and early winter. It is well to cover the beds with a light mulch of straw or leaves, to prevent injury from alternate freezing and thawing. This mulch should be gradually removed in spring when the growth appears above the ground. If the soil is well drained, the bulbs will not be injured by severe cold.

Under suitable conditions, tulip and narcissus plants will increase from year to year. The bulbs, therefore, may be left in the ground for two or three seasons until the clumps begin to crowd. It is then desirable to transplant them. This should be done from six to eight weeks after the spring blossom in order to allow the foliage to die down partially. The bulbs should be lifted with a spade or fork and after the soil has been shaken from the roots, stored in a cool, shady place. When the old leaves and roots are thoroughly dry, they may be rubbed off and the clusters of bulbs divided. These bulbs may be planted as the original bulbs were. In this way within a few years a stock of bulbs is very considerably increased.

The freeing of over 9,000 square miles of southern territory from quarantine for cattle tick is of interest not only to stock raisers in that section but also to feeders in the grain belt who buy live southern cattle to fatten up for market. The raising of the quarantine on September 15 over a large territory in Mississippi, Alabama,

Georgia, and South Carolina means that for the first time live cattle can be shipped from the sections freed for anything but immediate slaughter, unless inspected or clipped and certified by an inspector of the Bureau of Animal Industry in accordance with federal regulations. Beginning with September 15, however, stockers and feeders have been shipped from this territory to northern markets for any purpose. Hereafter cattle from these sections when shipped had to go into the quarantine pens at the slaughterhouses and be turned at once into meat, irrespective of the prices then being offered for stockers and feeders.

The southern cattle raiser in the freed territory, moreover, not only gains the advantage of being able to sell his cattle in the free pens, but also is spared the trouble and extra cost of shipping them under quarantine conditions in the stock cars.

In all since 1906, when the dipping work was started, a total of 262,469 square miles have been freed from the tick and released from quarantine. The work of dipping was done co-operatively by the counties, the states and the department of agriculture. There still remains, however, 479,000 square miles in the south still tick-infested, from which live cattle can be shipped only under quarantine regulations.

Those in charge of the work report that where a territory is cleaned from ticks stock raising receives a great impetus not only because of the better marketing conditions then open but because, with the tick clipped out of the county, breeding animals can be imported and the quality of the stock improved. As long as the region is tick infested it is impossible to bring in breeding animals, as animals so imported are peculiarly subject to Texas fever, which is transmitted by this enemy of cattle in the south.

Portland Ad Club Holds Loganberry Day

H. S. Gile went to Portland this morning to attend loganberry day of the Portland Ad club, and to deliver a short address on the general loganberry situation.

In a circular issued by the Ad club, they announce that the products of the loganberry will be served dried, canned, jerked, evaporated, straight, fried, and frozen loganberry sundae.

At the banquet will be sung the new loganberry song, composed by the Oregon poet, Dean Collins. Wm. H. Crane, Maelyn Arbuckle and Thos. W. Ross have been invited by the Ad club to be present at the banquet. "All the loganberry needs is publicity," said Mr. Gile, "and the Portland Ad club men are the right ones to bring the merits of the loganberry and its products before the people."

CUT JUICY MELON IN BIG WAR LOAN

Wall Street Jubilant Now That Half Billion "Touch" Will Be Completed

New York, Sept. 29.—Wall street prepared today for a big melon cutting, for it had successfully arranged the half billion dollar loan with the allies' commissioners, which means approximately \$10,000,000 profit for those "on the inside."

The bankers will get their portion of the bonds at 96. On each \$100 bond they will net \$2, for they will sell them to the public at 98. The public's share in the melon slicing will be 3.36 per cent, secured by the nation's of France and England as first liens. For the men who engineered the gigantic deal, the interest rate will be higher, for they buy at \$2 less than the general public.

Inasmuch as there were no restrictions as to purchases of American munitions, it was assumed here that a goodly sum out of the \$500,000,000 will go to swell the profits of American munitions concerns.

America as a whole will be given a chance to profit by the war, for the bonds will be sold to small investors, as well as to the big banks and bankers. The bonds will be issued in denominations as low as \$100 but for big business there will be larger blocks.

An advertising campaign to float the "baby" bonds—the \$100 issues—may soon be launched it was reported today. Newspaper advertising is part of the scheme to place these bonds within the reach and knowledge of the man of moderate means.

The banks will circularize the country and posters will be distributed by county correspondents to the cross-roads stores.

Arrangements will probably be made to pay interest on the bonds at many places outside of New York.

Bulls Celebrate

New York, Sept. 29.—The bulls ran riot in the stock exchange today sweeping the market into new records, unequalled since 1907. Speculation in "war stocks" was the principal influence with the completion of the \$500,000,000 loan to the allies used as the chief bull factor.

Prospects of a new and gigantic steel combination was made the basis for bidding up Crucible Steel 8 points and Lackawanna nearly 13.

A big wave of speculation, said the street authorities, is sweeping the country. Throngs are daily crowding the exchange and the curb market.

In today's spectacular rise, crowds of perspiring, tugging, shouting men fought for places at the post. The tickers were crowded as the speculation-mad men watched prices soar to new high marks.

The old days of "shoe-string" gambling have gone. It takes a fifty point margin to deal in Bethlehem steel since it began its skyward career. The lowest accepted is ten points and then only on stocks of unimpeachable stability.

Scenes around the exchange resembled the stirring days of the early sixties. The market closed irregular.

STRONG RESISTANCE TO ALLIES' OFFENSIVE

Gains Are Now By Yards Instead of Miles As On First Attack

By J. W. T. Mason

New York, Sept. 29.—The most significant indication of the situation along the western battle front is that the allied official statements enumerate gains of yards instead of miles and prisoners by hundreds instead of thousands.

It is apparent from this that the Germans are putting up a strong resistance, although they are not yet maintaining their position at all points. The British apparently have abandoned their plan for reaching Lille and have halted north of Ypres. Meantime they have concentrated strongly at Loos. The Germans are facing a concerted drive toward Douai, 12 miles east. Through reinforcing the Douai vicinity and elsewhere, the Germans at points have probably been weakened. If the allies can discover from what places the withdrawals have been made, they may be able to pierce the German forces at these spots.

Normally, before a successful assault can be delivered against entrenched strong artillery preparation is necessary to blow up obstructions in the path. In this manner, the Germans would be forewarned. The result would be a race between the effectiveness of the allied artillery and the concentration of German soldiers in the threatened area.

State's Witnesses Are Schooled In Perjury

Indianapolis, Ind., Sept. 29.—Charges that state witnesses in the election conspiracy trial of Mayor Bell were schooled in "perjury" and "bribed with the county's money" which "paid for their women" were made today when the defense opened its case.

Charles Clark, state witness, recalled by the defense testified that an officer from the prosecution bought him clothes, took him to a theatre and paid his hotel bills. At the hotel, he said, a woman knocked at his door, but no woman was mentioned in an expense account he saw afterward.

Chicago Herald: When pork meets national defense at Washington in December then will come the tug of war.

The Spotless White Cupboards of the New Hoosier Beauty
See Them
This is the "National Step Saver"—Finest and most complete kitchen cabinet ever built—Most popular cabinet in the world.
Now improved in a dozen ways with no increase in price.
The woman who gets a "Hoosier Beauty" this week has a labor-saving machine of which she will be as proud in twenty years as she is today.
Note the wide cupboards, uncluttered by cubby holes or partitions—the sanitary base that can't collect dust—the trays for cooking tools on the right door—at your fingers' ends. Think of having all your kitchen tools within arm's reach, around a big table of pure aluminum. Think of the miles of steps you save.
This is "HOOSIER BEAUTY" The National Step Saver
ALL FOR \$1 CASH AND A FEW \$1 WEEKLY DUES
This offer, under direct authority of the Hoosier Company, is too great to be missed. Come in sure and see the entire new line of Hoosiers tomorrow before they are all taken. This sale at these remarkably low prices is possible only because the enormous Hoosier output has made huge factory savings.
See Also **The NEW HOOSIER WONDER** at \$9 LESS than standard price—with aluminum table—and white enamel cupboards.
See Also **The NEW HOOSIER SPECIAL** midway between the Hoosier Wonder and Hoosier Beauty in convenience—equal to Hoosier Beauty in size.
See Also **The NEW ROLL DOOR HOOSIER**—the only kitchen cabinet with roll doors that are removable and sanitary—no cubby holes or partitions catch dirt or dust.
See Also **The NEW HOOSIER DE LUXE**—all white enamel inside and out—a kitchen cabinet of remarkable beauty.
—All at prices far under the standards for their class. You can pick your choice—the cabinet you want and need—if you come tomorrow—at the price you want to pay. No wonder Hoosier dominates the entire world. No woman who ever used one would do without it.

Her Life's Ambition Becomes A Reality

Louise Glauco, vivacious little player of the New York Motion Picture Corporation, who portrays Poppea, a member of the imperial ballet in "The Toast of Death," a gripping four-part Mutual masterpiece of picturesque India, has, after months of hard work, seen her greatest ambition realized. For months she had desired to play the lead in a Mutuas masterpiece, but it was not until Director Thomas H. Ince cast her for the role of Poppea that her life's ambition became a reality.

Miss Glauco has had important parts in several Mutual masterpieces, notably in "The Heiress," in which she plays such an important part in the molding of the lives of two men, the dainty star of motion picture dramas presents one of the most dramatic portrayals ever screened.

"I knew I would see my life's ambition realized before long," said Miss Glauco after the screening of the last of the four sets had been completed. "Happy! There is no word strong enough to explain just how happy I am."

"The Toast of Death" will be shown at Ye Liberty on Thursday, Friday and Saturday of this week.

James Rolph Re-elected Mayor of San Francisco

San Francisco, Sept. 29.—James Rolph, Jr., was re-elected mayor of San Francisco at the municipal nominating primaries by a plurality of 27,508 over his nearest rival, Eugene Schmitz, according to final returns given out today by Registrar Zernansky. Rolph polled a total of 63,814 votes. This was 9,383 more than the combined vote of all other mayoralty candidates. Schmitz polled 36,006 votes, giving him a plurality of 20,982 over Andrew J. Gallagher, the labor candidate. There were five other mayoralty candidates.

AMERICA PREPARED FOR END OF WAR

Secretary Redfield Already Planning to Prevent Competition of Cheap Goods

Washington, Sept. 29.—America is prepared to prevent the unloading of the low priced goods of foreign countries of Commerce Redfield today told tries here at the close of the war Secretary of the United States.

"The question," he said, "is no longer shall we prevent this unloading—but rather how shall we stop it." From plans of Redfield and the federal trade commission it appears that the tariff will play the smallest part in this plan.

facturers. It is understood that Secretary Redfield, Chairman Davis of the federal trade commission, President Wilson and other leaders who have conferred schedule temporarily to meet the emergency created by the war.
