CONSPIRED TO RECRUIT MEN FOR BRITISH NAVY

Two San Francisco Men
Found Guilty of Violating
Neutrality

San Francisco, Oct. 27.—Ralph K. Blair, partner of Supervisor Murdoch and Dr. Thomas J. Aldis, both of San Francisco, were found guilty today of violating American neutrality by conspiring to recruit men for the British navy.

Lieutenant Kenneth Croft, Harry K. Lane, alleged field agent, and Olive Lawrence, were acquitted.

The probable punishment for the crime will be two years imprisonment and a fine of \$10,000.

This is the first conviction of neutrality violation of this since 1895, when a British ambassador was recalled by his government after being convicted of recruiting for the Crimean war.

Judge Duelling's opinion, which took him 40 minutes to read, says with respect to the defense contention that no contract existed between the men and the British government that they were to enter the army.

"It would be taxing credulity to the utmost to urge that the defendants did not know what was sought by the consular general, that they would go to England and enlist in the military or naval service."

Without leaving the box, the jury elected William Leachy of San Francisco, foreman and voted a verdict as instructed by the judge.

Blair and Aldis will be sentenced Saturday, J. J. Dunne, their counsel, has filed a bill of exceptions. It is said that the case will be carried to the supreme court through English orders.

Judge Duelling said the instructions from the British consular general to the British friendly association, seemed designed for no other purpose than to secure new recruits for the British army here, without appearing to have violated the law to accomplish the results against which the statute is directed, and to do the things themselves for business without appearing to do so.

SCROFULA AND ALL HUMORS GIVE WAY

There are many things learned from experience and observation that the older generation should impress upon the younger. Among them is the fact that scrofula and other humors, which produce eczema, boils, pimples and other eruptions, can be most successfully treated with Hood's Sarsaparilla.

This great medicine is a peculiar combination of remarkably effective blood purifying and health giving roots, barks and herbs, which are gathered especially for it.

Hood's Sarsaparilla has stood the test of forty years.

**JOHNSON'S MEASURES
ARE ALL TURNED DOWN**

Non-Partisan Bills and Nine
Constitutional Amendments
All Lost

San Francisco, Oct. 27.—Admitting the defeat of his non-partisan and other measures at the special state election yesterday, Governor Johnson today expressed the belief that non-partisanship will ultimately—and not at a distant date—be adopted in California. His admission was based on incomplete official returns which indicate the non-partisan bills were defeated by pluralities exceeding 20,000 and the nine proposed constitutional amendments by small pluralities.

More complete returns today showed that most of the measures were defeated in nearly every county in the state. In San Francisco there was a majority of 7,000 against the non-partisan measures while all other parts of the bay district registered heavily against the proposals.

In San Francisco only 30 per cent of the total registration, or 50,000 votes was cast.

Returns from all parts of the state show that everywhere only a small percentage of the total registration went to the polls. Sentiment against non-partisanship was strongly expressed throughout the San Joaquin valley, with the exception of Fresno county, where the balance in favor of it was small.

In the Sacramento valley there was a majority against the measures, as there was in Alameda county.

Returns from all parts of the state show that everywhere only a small percentage of the total registration went to the polls. Sentiment against non-partisanship was strongly expressed throughout the San Joaquin valley, with the exception of Fresno county, where the balance in favor of it was small.

In the Sacramento valley there was a majority against the measures, as there was in Alameda county.

STATE AND FEDERAL GOVERNMENT JOIN IN MATTER OF PERMITS

No More Duplication of Surveys to Cause Unnecessary Expense

An execution agreement was received today by John H. Lewis, state engineer, from Franklin K. Lane, secretary of the interior, providing for co-operation between the state and the United States in the issuance of permits for water power development on the lands withdrawn by the United States for water power purposes. This agreement has been executed on behalf of the state and is now in force.

The purpose of this co-operative agreement, as stated in the preamble is "to avoid duplication of work and expense, to make available to both, the data secured and the action taken by each, and to facilitate the approval of applications for water rights for the occupancy and use of lands including power-site withdrawals in the state of Oregon for the development of water power."

Heretofore it has been necessary for those desiring to appropriate water for power development to first secure a permit from the state engineer, which involved the making of surveys and the payment of rather heavy fees. This permit was then presented to the interior department with an application for right to occupy the power site with approval. Not infrequently the application was denied and the cost of making surveys and the payment of fees to the state engineer's office was a total loss, thus causing the unnecessary expenditure of money and much dissatisfaction.

It is probable that the state will receive its greatest advantage through section eight which provides: "The secretary of the interior will furnish the state engineer with copies of all reports of construction work and operation reports on power cases in the state of Oregon, with sets of blue prints of maps and plans of such power projects after completion of construction, except such as may have been filed as confidential information, and with preliminary diagrams of all power site withdrawals in effect at the time of the execution of this contract and shall notify the state engineer of any changes and additions thereto." Under the provisions of this section a great deal of valuable information will be received at the state engineer's office and will be subject to public inspection which would otherwise not be available to the public. It also placed in the hands of the state engineer progress reports of development which will eliminate the necessity of many field inspections and save much expense to the state.

OUCH! LUMBAGO! RUB PAIN FROM SORE, LAME BACK

Rub Backache Away With
Small Trial Bottle of Old,
Penetrating "St.
Jacob's Oil"

Back hurt you? Can't straighten up without feeling sudden pains, sharp aches and twinges? Now listen! That's lumbago, sciatica or maybe from a strain, and you'll get relief the moment you rub your back with soothing, penetrating "St. Jacob's Oil." Nothing else takes out soreness, lameness and stiffness so quickly. You simply rub it on your back and out comes the pain. It is harmless and doesn't burn the skin.

Lumber up! Don't suffer! Get a small trial bottle of old, honest "St. Jacob's Oil" from any drug store, and after using it just once, you'll forget that you ever had backaches, lumbago or sciatica, because your back will never hurt or cause any more misery. It never disappoints and has been recommended for 60 years.

lose part of his claim as there are not enough thirds to go around but the main question to be decided is "Who shall dig them?" Justice Webster was called upon to decide such an action which was instituted in his court this afternoon in a case brought by Ward K. Richardson against C. K. Marty, Roy F. Shields and Ivan G. Martin were the opposing attorneys.

The Willamette valley is not the only section of the northwest becoming interested in the flax industry. The Oxnard Gardens Co. of Walla Walla, Wash., planted 80 acres in flax this year and the results seem to have been so satisfactory, that an inquiry was received this morning by the Commercial club, asking for the names of manufacturers of machinery for converting flax into tow. The correspondence rather indicated that the company

At a banquet in Missouri the local orator responded to a toast "The Ladies."

In unbroken eloquence he told how the roses, the lilies, the peaches, the cherries, and the stars had been robbed of their beauties to endow the women of Missouri.

A Kansan squirmed with
