The public safety commission of Portland, has asked permission of Secretary of State Olcott and the co-operation of this official to send out pamphlets containing educational talks on public safety to the auto owners of the state with their license tags which are sent out from the office of the secretary of state. The letter states that it is possible to corral school children, policemen and street car men for the talks but that if a meeting were advertised for auto owners that just a "corporal's guard" would come out to hear a safety talk. It was thought that the auto owners of the state might be reached in a better manner by the pamphlets which would also contain the road laws of the state and city and the commission expressed the willingness to have the pamphlets printed and forwarded to the secretary of state's office if he would mail them out with the license tags.
