COMMUNIPAW IS SAFE.

New York, Dec. 9.—The Standard Oil tanker Communipaw, variously reported sunk, captured and safe, left Alexandria, Egypt, for New York Tuesday in ballast, a cable to the Standard Oil company said today. It is now believed another vessel was mistaken for the Communipaw.

Claim Oil Tanker Was Sunk By a Submarine

London, Dec. 9.—Saarp contradiction in reports made it uncertain today whether the Standard Oil tanker Communipaw had been sunk by a submarine in the Mediterranean as reported.

Some reports placed her safety at Alexandria. None mentioned her departure from there.

Rome, however, reiterated the claim that her crew of 39 and five American officers har perished.

New York, Dec. 8.—The Standard Oil tanker Communipaw, reported sunk by a submarine, arrived at Alexandria Sunday, according to a cable received here today.

The message came to the Standard Oil offices from their Alexandria agent, but he did not intimate that she had been attacked by a submarine.

List of Normal and Kindergarten Schools In State Announced

Superintendent of Public Instruction J. A. Churchill has announced a list of the normal and kindergarten schools of the United States, which are now standard for the purposes of certification in Oregon. The dates when the institutions became standard are given, and persons graduating after these dates, will be certificated without examination. Graduates of the normal schools may be certificated for life to teach in the grades and in one-year, two-year and three-year secondary schools, while graduates of the kindergarten schools may receive life special certificates for kindergarten work.

The list contains 114 normals, and 66 kindergarten schools. Pennsylvania leads in the number of standard state normal schools, having 14; while California has five, Washington three, Idaho two, and Oregon one. These lists, together with the list of standard colleges and universities which was published last year by the state superintendent's office, will be furnished on demand, and will be of great assistance to school officers in the selection of their teachers.

DO YOU FEEL HEADACHY? LOOK TO YOUR STOMACH

It is an unusual thing for a druggist to sell medicine under a guarantee to refund the money if it does not cure. Yet this is the way Daniel J. Fry, the popular druggist, is selling Mi-o-na, the standard dyspepsia remedy.

Never before has he had so large a number of customers tell him that a medicine has been successful as with Mi-o-na. People who a few months ago looked like walking skeletons have put on flesh and today are ruddy and vigorous with perfect digestion and good health.

There is no longer any need for anyone suffering or making their friends suffer on account of dyspepsia. Mi-o-na can always be relied upon. The percentage of cures is so great that there is little risk to Daniel J. Fry in guaranteeing to return the money if the medicine does not relieve. And he stands ready to do so without any questions.

Headaches, all forms of indigestion, specks before the eyes, dizzy feeling, poor sleep, ringing in the ears and all forms of liver trouble are helped by Mi-o-na. A few days' treatment should show considerable gain in health while a complete cure often follows rapidly.

These days are the best in the whole year for the enjoyment of good health, and Mi-o-na will put you in such perfect condition that you can enjoy every minute of them.

ELLA FLAGG YOUNG QUITS.

Chicago, Dec. 8.—Mrs. Ella Flagg Young closed her career as superintendent of schools here today.

She visited her office during the forenoon and removed the decorations, with their feminine touch, which had been there since she assumed the place six years ago. Her successor has not yet been appointed.

O. A. C. Short Course Will Help Farmers

The correlation of the different farm industries and the management of the farm as a whole is necessary if the farmer is to realize the greatest profitable income. With higher prices of land and increased transportation facilities the farmer has become engaged in a competitive business and his work can no longer be done profitably unless it is done on a business basis. Many of the most progressive and successful farmer are working out definite plans for the management of their farms frequently altering the type of farming they have been doing, re-arranging their fields and croping systems, eliminating profit-consuming features of their work, and increasing the diversity of their production. A course designed to assist farmers in these problems will be given by Professor Scudder at the Oregon Agricultural College Winter Short Course, January 10 to February 4, 1916.

The new addition to the church here has been plastered and all who have seen it are well pleased. Mr. LaDuke did the work. He surely knows how to handle tools. He averaged $2.27 per day, besides the patch work, which was much slower. He warrants his work in every respect. We have heard nothing but praise for Mr. LaDuke in quality, price and time in which the work was done.

How To Prevent Acid Stomachs And Food Fermentation

By a New York Physician.

"My experience has forced me to the conclusion that most people who complain of stomach trouble possess stomachs that are absolutely healthy and normal. The real trouble, that which causes all the pain and difficulty, is excessive acid in the stomach, aggravated by food fermentation. Hyperacidity irritates the delicate lining of the stomach abnormally, causing that full bloated feeling. Thus both acid and fermentation interfere with and retard the process of digestion. The stomach wall is usually healthy and normal, but irritated almost past endurance by these foreign elements—acid and wind. In all cases—and they comprise a great majority of all stomach difficulties—the first and only step necessary is to neutralize the acid and stop the fermentation by taking in a little warm or cold water immediately after eating, from one to two teaspoonfuls of bisurated magnesia, which is the most effective antacid and food corrective I have ever found. The excess acid will be neutralized and the fermentation stopped almost instantly, and your stomach will at once proceed to digest the food in a healthy normal manner. Be sure to ask your druggist for bisurated magnesia rather than magnesia in any other form."

Women and Babies Face Dreary Winter

Seward, Alaska, Dec. 8.—One thousand miles from Seward at the lonely little post of Bethel, frozen in for the winter, is a white woman and two babies.

Facing the alternative of a lonely winter at Bethel or the 1,000 mile "mush" over the snows, the woman, Mrs. R. P. Frohock, a government school teacher, chose the former. She was traveling on the Seattle power schooner Bender Bros., which became ice bound on the Kuskokwim river. Captain Louis Kunflich and Engineers Lester and Fitzpatrick, of the Bender Bros., arrived here Monday after mushing from Bethel.

DID THE WOMEN DEFEAT THEMSELVES?

"Women will help the suffrage cause if they quit smoking cigarettes," declares Miss Susanna Cocroft, of Chicago, advocate of better health for women. Miss Cocroft was in New York at the time of the recent big suffrage parade.

"One had but to walk from the women's suffrage parade on Fifth avenue to the dining room of any of New York's first-class hotels to be confronted with the answer given to the women at the polls in New Jersey, New York, Massachusetts and Pennsylvania.

"I sat at table in a corner of the dining room of a prominent hotel, alone, quietly studying the faces and figures of beautiful women and the strong features of men. I selected types of splendid manhood and womanhood, but alas for my ideals when dessert was served! Not alone women whose faces expressed the downward tendency, but many whom I had selected as beautiful types both in faces and features were drinking and smoking—blowing cigarette smoke through their nostrils. Before the meal was finished, dozens of women were smoking, and I am told this custom prevails in nearly every high-class hotel in the East.

"I wondered if the men who smoked with them would not go directly to the polls, in November, and vote against suffrage; I wondered if they, deep down in their inner consciousness, were not dismayed at their shattered ideals of womanhood?

"Of course, this is not generally true, because it is only a small percentage of women—suffragists or not—who smoke cigarettes, but, can women afford to smoke? If we leave out the moral effect entirely the physical result is sufficient. Woman's nerves, digestion and heart action are too delicate for tobacco in any form.

"Woman is the custodian of man's ideals, but a cigarette-smoking woman is a poor advocate of suffrage. A man may regard her as capable of voting, and he wants her help in the moral issues of city, state and nation, but he is afraid she will step down from his ideal to be 'common.'"
