#### State Engineer Will Supervise Construction of Inter-County Bridge

The state highway commission authorized State Engineer Lewis to prepare plans and specifications for the proposed inter-county bridge at this city yesterday. In compliance with the request of the two county courts the state nighway department will also superintend the construction of the structure.

That Madame Schwimmer was "well meaning but incapable," and that her lendership of the peace expedition was a "said feature."

The board of viewers requested the state envineer to prepare a set of plans for the bridge but Lewis declined upon the advice of the attorney general on the grounds that the law did not give him this power. The right of the highway commission to give aim the power was not denied and at yesterday's meeting the highway commission is said the order. Joseph Wenre, of Porthand, who has been employed at different times by the equantission will be employed to work in this case and Lewis was nathorized to employ such other assistance as was needed in his department. Representatives of the Yambill county court were present and presented a petition asking the commission to amend a highway road map. No netion was taken by the commission in this matter until the attorney general had passed upon their powers.

#### How to Prevent Acid Stomachs and Food Fermentation

You may complain of stomach tron ble and yet your stomach may be absolutely normal and healthy. The real trouble—the trouble that nearly every-body has at times—is probably exces-sive acid in the stomach. You may be quite sure that this is your trouble if your food ferments, turns sour, causes belching, distress after eating, etc. Excessive acid arritates the deficate lining of the atomach abnormally, causing that full bloated feeling. Thus both acid and fermentation interfere with and retard the process of digestion. The stomach wall is usually healthy and normal, but irritated almost past endurance by these foreign elements—acid and wind. In all such cases—and they comprise a great majority of all stomach difficulties—the first and only aton necessary. ies the first and only step necessary s to neutralize the neld and stop feraentation by taking in a little warm o old water immediately after enting, rom one to two teaspoonfuls of Bisu-ated Magnesia which is a remarkably effective antacid and foul corrective. The excess acid will be neutralized and the food fermentation stopped imme-diately so that your stomach may then proceed to digost the food in a healthy normal manner. Be sure to ask your bruggist for Bisurated Magnesia rather than Magnesia in any other form,

If the carrier does not give service notify the office.
