BRIGHTER CHILDREN

Children are probably brighter to-day than a generation ago—but are they stronger? That's a grave question. So many pinched faces, dulled eyes and languid feelings make us wonder if they will ever grow into robust, healthy men and women.

If your children catch colds easily, are tired when rising, lack healthy color, or find studies difficult, give them Scott's Emulsion for one month to enrich their blood and restore the body-forms to healthy action.

Scott's Emulsion is used in private schools. It is not a "patent medicine," simply a highly concentrated oil-food, without alcohol or harmful drugs. It cannot harm; it improves blood; it benefits lungs and strengthens the system. Your druggist has it—refuse substitutes.

Scott & Bowne, Bloomfield, N. J. 15-2

YOUR HEADACHE DUE TO WAR IN EUROPE

Shutting Off Supplies From Germany Causes Shortage of Drug Supplies

To the average citizen in Salem there is not a very close connection between headache powders and the war in Europe. But the relationship becomes a reality not only in the price now paid for headache powders, but many other drugs in common use.

All chemicals like bismuth, phenacetin, and salol and others which are ingredients of headache powders have advanced fully 1,000 per cent in price. The Germans supplied the world and were the only manufacturers, and just at present, Germany is not shipping to this country.

Quinine that sold for 50 cents an ounce before the war, now retails for from \$2 to \$2.50 an ounce and is very scarce.

That useful article, castor oil, comes just twice as high as it did before the fatal August 4, 1914, when England declared war on Germany.

The 10 cent bottle of glycerine is not as large as it used to be. In fact, the dime bottle in the days of two years ago is just half as large as it used to be.

Epsom salts have also taken the skyward route in prices. Instead of buying a pound for 16 cents, it will require money to the amount of 25 cents to buy a pound and it is becoming more scarce every day.

Blue vitriol, worth 10 cents a pound, before the war, is now selling in Salem for 30 cents a pound and even the common alum, that formerly was

retailed for 15 cents a pound, has advanced to 25 cents.

Salt petre, so necessary in the manufacture of explosives, is naturally in great demand with the munition plants, and this accounts for the advance in price of from 15 cents a pound to 60 cents.

Borax may be included in the useful articles, advancing from 15 cents to 25 cents a pound.

But it is in the bromide class that the greatest scarcity exists, as bromide potassium has advanced from 10 cents an ounce to \$1 an ounce and bromide soda is worth just two times as much as it was before the war.

If the 10 cent bottle of castor oil is not as large by half as it used to be, or if it requires a microscope to find the 10 cents worth of quinine, the cause thereof is not due to the lack of generosity on the part of the druggist, but to the fact that Germany practically had control of the drug market of the world, and that for good and sufficient reasons, commerce between this country and Germany is at a standstill.

Turner News Items

(Capital Journal Special Service.)

Turner, Ore., Feb. 15.—The high water mark has passed and the "City Dads" can get to the city hall without boots again. This spring weather has caused Cop Smith to get his squad busy repairing sidewalks and crossings.

Miss Elizabeth Cornelius is spending a few days in Salem this week after attending the Lincoln Day banquet where she made a Lincoln speech.

Henry Earl swears more than any other man in town these days because there are so many prospective voters coming in to register.

Mr. and Mrs. Crawford visited with friends in Salem Sunday afternoon.

Eugene McVicker recently returned to Kansas and reports that times are good back there.

Dr. Mrs. G. A. Massey, Prof. and Mrs. T. E. Wilson attended church services in Salem Sunday evening.

Turner high school boys are beginning to get the baseball spirit and plan to organize a team at once.

The high school student body plans to give a reception and rally for all eighth grade and high school students in the adjoining districts on or about the 10th of March.

Exams have come and gone. One-half year of successful school at Turner has passed into history. The momentum already gathered in the last half will help to make the coming half even shorter if measured by one's mental time piece.

Parents and students alike agree that the school this year is the most popular institution in this section. Mrs. J. Lister has presented each room with a beautiful hand-painted picture. These pictures are taken from Oregon scenery and are highly prized by both teachers and students. Mrs. Lister says in presenting these pictures, that she wishes to show her appreciation of the school and that it is a pleasure to present these pictures to the boys and girls who are working hard and faithfully for the school.

Outsiders often speak of the high-

ENRICH THE BLOOD

Hood's Sarsaparilla, a Spring Tonic Medicine, is Necessary.

Everybody is troubled at this season with loss of vitality, failure of appetite, that tired feeling, or with bilious turns, dull headaches, indigestion and other stomach troubles or with pimples and other eruptions on the face and body. The reason is that the blood is impure and impoverished.

Hood's Sarsaparilla relieves all these ailments. It is the old reliable medicine that has stood the test of forty years—that makes pure, rich red blood—that strengthens every organ and builds up the whole system.

It is the all-the-year-round blood-purifier and health-giver. Nothing else acts like it, for nothing else is like it. There is no real substitute; so be sure to get Hood's Ask your druggist for it today, and begin taking it at once.

school moral standard upheld by the entire student body. This is practically a self-governed school because there have not been any cases of discipline to speak of.

The student body has shown its loyalty to the school by maintaining an average of 90.5 per cent through the stormy month of January.

Principal Wilson has organized new classes in civics and botany for the second half. Each of these classes has some 21 or 22 students in it.

Throw Off Colds and Prevent Grip.

When you feel a cold coming on, take LAXATIVE BROMO QUININE. It relieves cause of Colds and Grip. Only One "BROMO QUININE." E. W. GROVE'S signature on box, 25c.

OAT SMUT PREVENTION

Washington, D. C., Feb. 16.—The average annual losses from smut in oats are greater than those caused by any other preventable cereal disease in the United States.

Treating the seed with hot water or with formaldehyde solution before sowing is an easy, cheap, and effective way of preventing this disease. The latter method, which is the one most available for general use, is here briefly summarized. Both methods are described in detail in Farmers' Bulletin 507, which will be sent free on application to the secretary of agriculture, Washington, D. C.

Mix the formalin (a commercial preparation which is 37 per cent formaldehyde by weight) with water at the rate of 1 pound (a little less than a pint) to 40 gallons of water. The grain may be either loosely included in sacks or put loose into a tub or vat with the solution. Agitate the sacks or stir the loose grain occasionally so that the outside surface of every grain will be thoroughly wet.

Instead of being immersed the seed oats may be spread on a clean floor or canvas and sprinkled with the solution and shoveled over during the process so that they will be wet evenly as in the other method. Not over a gallon of solution will be needed for every bushel of dry grain.

After sprinkling, shovel the seed into a pile, cover it with sacks wet with the solution, and allow it to stand for at least two hours before spreading it out to dry.

Precautions: The oats may be seed-dried as soon as dry enough to run through the drill. If the seed is still moist, however, the drill must be set to sow more to the acre than if it is dry.

The quantity which should be sown may be determined by measuring a given bulk before and after treatment and figuring the proportion of increase. After treating do not expose the seed to freezing until it is thoroughly dry.

Do not allow the treated seed to come into contact with old sacks, bins or machinery in which there may be smut spores. If such must be used, seal them or wash them first with the formaldehyde solution.

Santa Monica After Big Automobile Races

Santa Monica, Cal., Feb. 16.—Santa Monica started a hot fight yesterday to get the Vanderbilt and Grand Prix automobile races for the historic eight mile course here next November.

At the request of the chamber of commerce, the city commissioners sent a telegram to the Cup Holders' association in New York asking sanction for the twin classics. The message stated that all difficulties with property holders had been settled, and that the necessary cash guarantees had been assured by bankers of the bay district.

Elgin, Ill., is already in the field making a strong campaign to grab the races. Now that Santa Monica has virtually decided to have them here if the sanction can be obtained, a warm battle is expected.

The telegram was sent this morning when a delegation from the chamber of commerce, headed by Paul Derkum, promoter of the last Venice automobile race, attended the meeting of the city commissioners and went to the bat hard in favor of the proposition.

They were urged there were already a number of famous machines in southern California, including the English Sunbeam, just arrived, and that the Vanderbilt and Grand Prix would afford a fitting climax to the projected season of motor racing here.

The Vanderbilt and Grand Prix were held on the Santa Monica course two years ago. The course, which runs through the city streets, is conceded to be one of the fastest in the world. Records have repeatedly been smashed on it.

Last year the races were contested at the Panama Pacific exposition, San Francisco. If sanction is secured, work will start at once in regaining the Santa Monica course.

DON'T LET SOAP SPOIL YOUR HAIR

When you wash your hair, be careful what you use. Most soaps and prepared shampoos contain too much alkali, which is very injurious, as it dries the scalp and makes the hair brittle.

The best thing to use is just plain mulsified coconut oil, for this is pure and entirely greaseless. It's very cheap, and beats the most expensive soaps or anything else all to pieces. You can get this at any drug store, and a few ounces will last the whole family for months.

Simply moisten the hair with water and rub it in, about a teaspoonful is all that is required. It makes an abundance of rich, creamy lather, cleanses thoroughly, and rinses out easily. The hair dries quickly and evenly, and is soft, fresh looking, bright, fluffy, wavy and easy to handle. Besides, it loosens and takes out every particle of dust, dirt and dandruff.

Public Opinion Indorses this family remedy by making its sale larger than that of any other medicine in the world. The experience of generations has proved its great value in the treatment of indigestion, biliousness, headache and constipation.

BEECHAM'S PILLS

relieve these troubles and prevent them from becoming serious ills by promptly clearing wastes and poisons out of the digestive system. They strengthen the stomach, stimulate the liver and regulate the bowels. Mild and harmless. A proven family remedy, unequalled
