Wilson's Firm Stand May Clear Situation

(Continued From Page One.)

Not Violation of Law.
Berlin, by wireless to Sayville, L. I., Feb. 28.—Commenting upon President Wilson's letter to Senator Stone, the

semi-official North German Gazette declared today that the German proclamation of war against armed merchantmen is not a violation of international law.

Germany Tacitly Admits

Washington, Feb. 28.—Germany has admitted for the first time that her proposal to war on armed merchantmen technically violates international law. This is the interpretation drawn here

today from United Press Staff Correspondent Ackerman's dispatch, quoting a German official as charging that England "first" violated international law.

If Germany takes this view, she is contending that the decree is a reciprocal, though previous Berlin reports indicated Germany took positions that neutrals could not expect to bind Germany by an obsolete law adopted when priva-

teers infested the seas.

Would Avoid Extremes

Washington, Feb. 28.—"I would be just as much ashamed to be rash as I would to be a coward. Valor strikes only when it is right to strike."

This is President Wilson's viewpoint as published today from the text of his Saturday night speech before the Grati-

on club. As for the presidency he declared any man seeking it with the idea of getting what it will bring is an "audacious fool."

One Preacher Talks of Another's Book

San Francisco, Feb. 28.—"Social poison" is the term applied by Rev. Paul Smith of this city to the book, "The Soul of Woman," written by Rev. Paul Jordan Smith of Berkeley.

In the course of an attack on the book and its ideas, the local pastor de-

clared last night to his congregation: "The sex obsession which has swept over the American public in these last two or three years can be explained only by the fact that women are allowing at least a freedom of thought and imagination which formerly they con-

demned. Incidentally he declared that "deliberately and permanently childless marriages" are a "disastrous prostitution of the whole sex idea."

WHAT CAUSES COLDS?

This question is asked every day. A cold is really a fever, not always caused by the weather but often due to disordered blood or lack of important food-elements. In changing seasons fatfoods are essential because they distribute heat by enriching the blood and so render the system better able to withstand the varying elements.

This is the important reason why Scott's Emulsion should always be taken for colds, and it does more—builds strength to prevent sickness.

Scott's Emulsion contains Nature's rare strength-building fats, so skillfully blended that the blood profits from every drop. It is free from harmful drugs or alcohol. Sold at drug stores—always get the genuine.
