What is the 7th Point?

From Maine to California, from Texas to Hudson Bay, millions of people have been asking "What is the 7th Point in Sterling Gum?"

In practically every town, city and village in the United States and Canada, the published six points of superiority have brought Sterling Gum fast-growing popularity.

But the seventh point still remains a riddle.

Point 7 What?

Now, we are offering liberal prizes to those who send us the best suggestions for the Sterling Gum Point 7.

Before you make your suggestion for the 7th Point, read the following:

The Following Story Unfolds the Secret of the Famous Point 7

To most people chewing gum is a mystery. They may know that different chewing gums are made from different ingredients. But that is about all. Here are facts which we believe you will be glad to know about Sterling Gum:

Your Sterling Gum is made from the following materials:

The basis is the pure sap of a tropical Sapota Tree—a natural gum.

This natural Sapota Tree sap is boiled, sweetened and flavored. The sweetening is simply pure cane sugar and pure corn syrup.

The flavoring is of two kinds—Peppermint (in red

wrappers), Cinnamon (in blue wrappers) some.

There are some twenty varieties of the mint plant. The Sterling Peppermint is a product of the choicest, smoothest-flavored of these many mint varieties.

The spicy Cinnamon flavor is extracted from Cassia bark which grows in the tropics.

The sap of the Sapota Tree, the Cane Sugar, the corn syrup, the Peppermint and Cinnamon flavors all come from the sap of some plant or tree. Nature herself supplies these delicious materials from which your Sterling Gum is made.

Requirements for Winning Phrase

When you read the above facts on the materials that Sterling Gum is made of, you will know all that is necessary for you to know in entering this contest.

The first prize will go to the one whose suggestion, based on the above story, most impressively presents the natural purity of Sterling Gum—in the opinion of the judges. Remember that your suggestion must be in six words or less.

The next best suggestion will win the second prize—and so on down.

It is understood that the Sterling Gum Company will have the right to use the 7 Point suggestions sent in by the prize winners.

The contest is easy to enter. Just think out your way of expressing the 7th Point. Then write it out in six words or less and send it in as directed in the conditions printed below. Even if you don't win the first prize of \$1,000, you stand a chance to win one of the 7,777 smaller prizes.

Contract Awarded For 1917 Auto Number Plates

The contract for supplying the automobile number plates for the year 1917 was today awarded by Secretary of State Elliott to the Irwin-Hodson company of Portland, for the lump sum of \$7,388.

Notwithstanding that another firm bidding on this contract was a trifle lower than the bid of Irwin-Hodson company, Secretary of State Elliott, talking into consideration the convenience to Oregon automobile owners by reason of the difference in service necessarily existing between a Seattle firm and a Portland firm, manufacturing the goods in the city of Portland, decided to award the main contract to the Oregon house.

A great many intricate and perplexing situations arise during the course of the year, in distributing duplicate motor vehicles, dealers and motoring number plates, and the fact that they can be made more quickly manufactured in Oregon, thus very greatly facilitating the delivery of these plates to the public, was taken into consideration in letting the contract.

The contract for the manufacture of badges for the year 1917 was awarded to the Pacific Coast Stamp Works of Seattle, in the sum of \$400.

Astoria's Fire Loss Placed At \$60,000

Astoria, Or., Mar. 21.—A revision of the figures places the total losses of Sunday night's fire at about \$60,000, approximately half of which is covered by insurance. The Young and McGowan buildings were so badly damaged they will have to be torn down.

As one of the direct results of Sunday night's fire, the council has instructed the city attorney to prepare an ordinance providing a building code. If this new code goes into effect, no wooden buildings will be allowed within the area bounded by Second and Twenty-third streets, the south side of the railroad tracks, and a varying boundary between Duane and Exchange streets. Every structure in this area must be built with fireproof walls. Brick, concrete, concrete, stone or any like non-inflammable material may be used.

In the railroad tracks, all future structures must be of mill construction sheathed with iron or asbestos materials, or any like substance of equal fire-resisting qualities.

NO TEMPORARY CHAIRMAN

Chicago, Mar. 21.—Without selecting a temporary chairman for the republican national convention to be held here in June, the sub-committee making arrangements for the gathering adjourned today. Selection of a temporary chairman is considered highly important, as he will deliver the keynote speech when the G. O. P. delegates meet to choose their presidential candidate. The temporary chairman will be named at the next session of the sub-committee, in April.

Nicholas Murray Butler telegraphed to Chairman Hiller from New York that commencement exercises of Columbia university, of which he is president, would require his attendance on the first day of the republican convention. With regard to the temporary chairmanship, Hiller said: "We have not elected anybody, upon the request of an absentee, who asked us to postpone the choice until April."

BACTERIA FRAUD ALLEGED

Eugene, Or., Mar. 21.—Two men selling bacteria for the inoculation of clover seed are victimizing farmers in the state of Oregon, according to J. M. Alcorn, Lane county agriculturist. He states that these men operated in Lane county last week selling bacteria at a rate amounting to \$29 an acre.

"These men are holding up the farmers," he said. "The bacteria which they are purchasing can be obtained from the Oregon Agricultural college in an amount sufficient to inoculate 13 acres for 60 cents."

In carrying on their traffic he said the peddlers are oversteering the necessity for inoculating, as the bacteria is sufficiently prevalent in most Lane county soil to eliminate the necessity for inoculation.

MINE GRANTS BY VILLA Will Revert to State

By H. C. Boehme, (United Press Staff Correspondent). Douglas, Ariz., March 21.—"God pity Villa if the Seventh and Tenth get within eight of him!"

This expression of the general idea was voiced today by an officer in the American camp. When Douglas was in danger during the battle of Agua Prieta, those regiments "stood by" on the border while Villista bullets rained on American soil.

A number of soldiers held victim to the bandit snipers. The citizens have quite a "warm feeling" for the Villista. During the fight and ever since, troops of the Tenth, a negro organization frequently expressed a desire to get after "that Villa man."

American mining interests are anxiously awaiting today the ruling of Senator Enrique Moreno, de facto secretary of state for Sonora, on the ruling of Governor Elias Calles that all American-owned mines secured under grants from Villa and the late Victoriano Huerta administration shall revert back to the state. Moreno is expected to issue a statement in a day or two from Hermosillo. Federal grants from Porfirio Diaz are not affected by the action.

Confirmation was received here today that Villa is retreating toward the Guerrero mountains, southwest of Namiquni.
