Another demonstration will be given this afternoon and evening from 5 until 9 o'clock by Dr. F. C. Hagel of his patented Cereal which he claims will prove a substitute for coffee and much better than a lot of the advertised substitutes. He has been working on this substitute for three years and feels that it all it needs now is a thorough test by those who are trying to get away from the coffee drinking habit. Dr. Hagel says his cereal is made from rye, barley, beans and vegetables in the hull. It does not stimulate, yet tastes so much like real coffee that after a few trials, it is preferred even by habit coffee drinkers. Anyhow, from 5 until 9 o'clock, at his office over the Weller grocery, the doctor will be glad to demonstrate.

"Ancient and Modern Usury" is the subject for discussion at the Men's Liberal club tonight. Mr. John Robertson, the speaker of the evening, has made a careful and painstaking study of this vital subject. Some time ago the public was informed that there is no money-trust, that there could be no such thing as a money-trust. There are still some Missourians about and these will be interested in the discussion of the evening. All men are invited to these meetings. The Men's Liberal club is on Open Forum for the discussion of public questions. Bring your friends.

W. A. Jones announced today that he would not under any circumstances enter the race for sheriff of Marion county. There has been considerable talk lately as to whether Mr. Jones would also throw his hat in the ring, but after considering the matter carefully he has decided that for the present, he is not after any political honors and that while he naturally feels grateful toward his friends who wanted him to enter the race, there is absolutely nothing doing. Mr. Jones states that while he is not a candidate for any office, this does not prevent him from taking an interest in Marion county, as he expects to make Salem his permanent home.

Astoria feels that it is entitled to a naval base of the first class and has several good reasons to show why Astoria instead of Seattle should be made one of the naval bases on the Pacific coast. The argument advanced by Astoria for securing the naval base, compared to Seattle, is that Astoria is the logical center, on the mouth of the Columbia, that it has an advantage over Seattle in the distance to the Orient and nearness to Alaska, that it is not on the same open water with a foreign power and that Astoria has protected approaches and also has quick approach to the open sea.
