## Automobile Expert Will Organize Clubs

Washington, D. C. June 10.—Jay Hall, associate executive of the Olds Motor Works, of Lansing, Michigan, and advocate of national automobile military preparedness, has been invited by Fred H. Phillips, secretary of the National Rifle association of America, an adjunct of the United States war department, to cooperate in the formation of civilian automobile rifle clubs throughout the United States.

The war department's national board for the promotion of rifle practice, acting through the National Rifle association has been fostering the formation of civilian rifle clubs for some time. Government equipment, consisting of standard army rifles and ammunition has been furnished to this end. To date, 1200 clubs have been organized. Phillips states, however, that a serious difficulty in the road of further progress lies in the relative inaccessibility of rifle ranges to centers of population. Through the formation of automobile rifle clubs, he believes this difficulty could be overcome.

Hall has expressed his willingness to become associated with the project and pledged his support to this end. In addition, there are approximately 1000 Oldsmobile dealers throughout the United States, many of whom may be expected to follow the lead of their chief, and act as nuclei for any organization plan that may be evolved.

Correspondence to establish a definite method of organization is now in progress, and it is hoped to be able to make arrangements shortly. Meanwhile, Hall is preparing for a business trip through the larger Oldsmobile distributing centers, during which he will investigate the local aspects of the problem.

In its eventual outcome, the enterprise promises to be of benefit to the preparedness of this country in two ways: First, it will provide for a large number of trained rifle men who can be converted into infantrymen on short notice; and, second, it will place at the disposal of the war department a large number of privately owned automobiles to act in conjunction with the United States army. The accomplishment of either of these objects, state military experts, would do much toward establishing the United States on the basis of preparedness she must reach to be safe against all encroachment.

**Lubrication Important In Keeping Motor Cool**  
The question of lubricating oil is directly connected with that of cooling, says Mechanical Bulletin No. 3 entitled "Engine Overheating," gotten out recently by the Standard Oil company.

Lubrication oil dissipates the heat of friction generated by the pistons in the cylinders. If the lubricating oil does not perform its duty correctly the heat of friction is added to that of the fuel, and the cooling medium will not be sufficient to keep the temperature of the motor at the point of efficiency.

## Auto Cars Engage In Hazardous Climb

Time and again Maxwell cars have demonstrated their superior powers as hill climbers, but the work of three stock touring cars in Mauritius, an island of the middle of the Indian ocean, is the most gratifying performance of its kind to be recorded.

News of the latest Maxwell feat, in which a trio of touring cars climbed the hazardous paths of Mount Chamarel, has just been received by the export department at Detroit. At the time the Maxwells successfully made the climb, two other cars of American make attempted the difficult ascent but both were stalled. One of these cars was a twenty horse power touring car and it was forced to abandon the climb when one-quarter of the way up. The other was a forty horse power seven passenger car and it failed to negotiate half the distance.

**A Difficult Climb**  
The following brief description of the mountain and its roads will give some conception of the difficulties that had to be overcome. Mount Chamarel rises from a flat plain a few feet above the sea level to an altitude of 1,200 feet. The road zigzags in a series of sharp curves at angles of about thirty-eight degrees.

The car attempting the climb has before it the difficulty of getting up speed after slowing down to a foot pace to negotiate the curves, which have to be taken with the utmost care, for the precipice is always at one side of the car.

**A Unique Sight**  
The performances of these Maxwells is all the more remarkable in view of the fact that heavy rains had fallen during the week preceding the trial, and during the run it rained so hard that water was running down the road.

Mount Chamarel is an object of wonder for all tourists. It has been a source of interest because it offers the unique spectacle of earth of no less than seventy-two distinct and separate colors on a small space of two acres of ground. This spot forms a series of mounds a few feet high, long and narrow and following one after another with startling regularity.

From a short distance, the various colors are easily discernible one from the other and the seventy-two colors may easily be pointed out. The great peculiarity of these mounds is that they can be levelled and the earth mixed so as to form a uniform color. A few weeks later they will have formed again and the earth will resume its primitive colors. Scientists have never been able to account for this phenomenon. The colors are attributed by some geologists to ferruginous exhalations from the earth, but this does not explain why the earth will not remain level.

**Dodge Dealer O. K.'s Western Motor Oil**  
H. O. Harrison Company, distributors of the Dodge Bros.' car, San Francisco, think so highly of motor oil made from western asphalt base crude, that they use nothing else in their demonstrating cars, and all the cars they sell go out filled with this oil.

"We have had a good opportunity of observing its action in the Dodge motor," says H. P. Huddleston, manager of the service department. "Both in the hands of our men and of our customers, and are entirely satisfied with the results. Our motors are free from carbon, compression is at its highest point of efficiency, and we are never troubled with over-heating and laboring of the motor on long, hard pulls."

**NEW WITNESS FOUND IN THE ORPET TRIAL**  
**Classmate of Orpet Says He Saw Girl In Laboratory Examining Poisons**

Courtroom, Waukegan, Ill. June 10. The theory that Marion Lambert, age 16 years old, Lake Forest high school girl, for whose murder William Orpet, University of Wisconsin student, is on trial, committed suicide as contended by Orpet, was strengthened today by the discovery of a witness, who, it is said, saw Marion in the high school laboratory examining various poisons the day before she was found dead in Helms woods.

North Howell, June 8.—Some clover is being cut at this time with heavy and being cut at this time will yield a nice crop of seed.

**DIES FROM HEART TROUBLE.**  
Matthew Wass, a farmer who has lived west of the city for a year past, died suddenly Saturday. Heart difficulty is supposed to have been the immediate cause of his death.

**PIONEER DEAD**  
K. Fournier, a well known citizen of this vicinity, died at his home near here Friday after a short illness. The funeral was conducted from the United Lutheran church Monday. He is survived by a wife and family of children.

**Dainty Marguerite Clark at Best**  
Superb as "Molly Make-Believe" in Famous Players' Adaptation

It is very easy for those who have seen Marguerite Clark on the screen in her previous Famous Players productions to imagine her teasing her indulgent grandmother, ordering her small brother around the house, keeping a whole family agog by her impudent refusal to stay home, finally running away from home with her diminutive brother, and commandeering a freight train in order to reach the city where she intends to search for a position.

These are some of the things which she does in the Famous Players-Paramount adaptation of Eleanor Hallowell Abbott's celebrated story and book, "Molly Make-Believe," in which she is to star next week at the Ye Liberty, Tuesday, Wednesday and Thursday. "Molly Make-Believe" created a sensation when it first appeared in one of the big national magazines and has ever since been one of the most popular gift-books at all times of the year. Those who have read the story will appreciate at once that Marguerite Clark is ideally suited to play the role of the delightful little Molly.
