

Perfect Health Is Every Woman's Birthright

A Prescription That from Girlhood to Old Age Has Been a Blessing to Womanhood.

When a girl becomes a woman, when a woman becomes a mother, when a woman passes through the changes of middle life, are the three periods of life when health and strength are most needed to withstand the pain and distress often caused by severe organic disturbances.

At these critical times women are best fortified by the use of Dr. Pierce's Favorite Prescription, an old remedy of proved worth that keeps the entire female system perfectly regulated and in excellent condition.

Mothers, if your daughters are weak, lack ambition, are troubled with headaches, lassitude and are pale and sickly, Dr. Pierce's Favorite Prescription is just what they need to surely bring the bloom of health to their cheeks and make them strong and healthy.

For all diseases peculiar to woman, Dr. Pierce's Favorite Prescription is a powerful restorative. During the last 50 years it has banished from the lives of tens of thousands of women the pain, worry, misery and distress caused by irregularities and diseases of a feminine character.

If you are a sufferer, if your daughter, mother, sister and help get Dr. Pierce's Favorite Prescription in liquid or tablet form from any medicine dealer to-day. Then address Doctor Pierce, Invalids' Hotel, Buffalo, N. Y., and get confidential medical advice entirely free. You can also obtain a book on woman's diseases, sent free.

Dr. Pierce's Pills regulate and invigorate stomach, liver and bowels. Keep the body clean inside as well as outside.

Fruitland News

(Capital Journal Special Service.) Fruitland, Ore., June 14.—Mrs. John V. Smith and son, Henry, went to Marion last week to stay with Mr. Smith, who was taken to his daughter, Mrs. Miller.

Miss Witha Stegmann, from Salem, is spending a few days with her friend, Miss Grace Bakers.

Harry Lundeen and wife are here for a few days visit with the Standifer family.

Mr. Flanagan and wife, from Salem, were Sunday visitors at the Hamner home.

A large crowd attended the dance last Saturday evening at the cheese factory.

Quite a number of Auburn people attended the Sunday school last Sunday at this place.

Mr. and Mrs. Colson are staying with their son here for a short time.

Mrs. Anna Girard attended the funeral of her father-in-law at Quincy last week.

FOREST SERVICE NOTES.

Portland, Or., June 14.—It is estimated that there is enough waste from the sawmills of the South alone to produce twenty thousand tons of paper a day.

Oiled paper has been found to be an excellent material for packing tree seedlings, when shipped in crates. When crates are not used, paper-lined burlap makes a particularly satisfactory wrapper.

The value of livestock dying from disease on the National Forest ranges in 1915 was less than \$200,000. A majority of the cattlemen are now vaccinating their stock for blackleg, one of the chief loss-causing cattle diseases of the West, and thus preventing the serious losses of the past.

Because of the heavy snowfall last winter, forest rangers found it necessary this spring to remove two feet of snow from the Beaver Creek Nursery in Utah, so that the young trees might be uncovered by the time they were needed for spring planting on the National Forests of that region. Part of the snow was taken off by use of shovel and pick. By spreading a thin layer of fine soil over another part, the natural melting of the snow was hastened sufficiently to make shoveling unnecessary.

ACCOUNTS FOR SALE

The Salem Business Men's League, as assignee, offers for sale to the highest bidder the following accounts. The right is reserved to reject any or all bids:

- Owned by. Address. For. Amount.
Mary, Ed., Salem R. 9, drugs, \$13.65
Monroe, J. F., 1374 North Capital, Salem, drugs, 7.60
Treasler, Dave, 1128 Norway, Salem, drugs, 3.35
Montgomery, C. H., Salem, R. 6, drugs, 4.95
Whitmore, Sam, Independence, Ore., groceries, 50.20
Frohmsder, Chester, Salem, R. 8, groceries, 3.43
Horsay W. E., Amity, Ore., R. 1, groceries, 10.15
Perry, Jos. A., Stayton, Ore., groceries, .70
Hess, John, alias John Romano, Chemung, Ore., groceries, 38.73
Hess, Luther, alias Luther, Romano, Salem, groceries, 2.90
Shaviland, Henry, North Liberty street, Salem, merchandise, 1.75
Tucker, Alvan, Amnsville, Ore., groceries, 1.75
Forrest J. M., Salem, Ore., groceries, 7.05
Paris, Mrs. J., R. 5, Salem, groceries, 9.54
Mason, Clarence, B. 3, Salem, groceries, 10.10
Miller J. Pay, Junction City, Ore., groceries, 18.53
Monroe R., North Fourth, Salem, groceries, 3.08
Lundeen, Elmer, North High, Salem, clothing, 2.00
Abbott, W. H., and Gust. Peterson, clothing, 3.63
Housley, J. B., Turner, Ore., twice, 5.35
Ward, M. M., Turner, Ore., twice 11.00

These accounts will be advertised until sold, at some price. Bids will be considered for any account or for all of them. Parties owing the accounts advertised may settle the same by paying the amount owed to the secretary. SALEM BUSINESS MEN'S LEAGUE.

STATE'S ATTORNEY WILL TAKE STAND

Will Testify As To Statements Made by Josephine Davis to Him

Courtroom, Waukegan, Ill., June 14.—The contention of Will Orpet's defense that poison was found beneath the finger nails of Marion Lambert, indicating she had taken cyanide herself, was refuted on the witness stand in Orpet's trial for Marion's murder today.

Coroner J. L. Taylor, who conducted the inquest over Marion's body, testified that there was a flakey white powder in Marion's hair, that every little crevice of her right palm was filled with it, but that there was none beneath the finger nails.

"This powder," he said, "was apparently from the evaporation of a liquid form of cyanide. The stains were such that indicated they might have been received by Marion brushing her hand across her mouth when in agony of death."

Taylor declared his autopsy showed Marion, at the time of her death, was not in the condition she was said to have feared.

"There were no signs of it," he testified Taylor also revealed the fact that the glove from Marion's right hand when her body was found had been found and was in the state's possession.

Counsel for the defense today asked Taylor if he had examined the gloves for traces of this white powder and replied no.

Then Orpet's father was called to the stand for a minute to identify an "alibi letter" written by Will. James King, foreman of the coroner's jury that conducted the inquest, and William Marsball, who was with Frank Lambert, Marion's father, when her body was found, were other witnesses today.

Courtroom, Waukegan, Ill., June 14.—State's Attorney Ralph J. Dady, prosecutor of Will Orpet, will take the stand in Orpet's trial to refute the testimony of Josephine Davis, whom Dady considered the state's principal witness but whose story of Marion Lambert's suicide threat proved a boom-crang to the prosecution.

Dady said today he would be sworn as a witness before the end of the trial and repeat to the jury the story Josephine told him after Marion's body was found under the Three Oaks, in Helms woods. In that story, Dady declared today, Josephine said nothing of suicide threats but tried to fasten blame for Marion's death on Orpet.

Ralph Webster, Chicago chemist, was to be the principal witness today. Lewis was to lay before the jury the tangle of persons that figured in Marion's death and was said to be ready to testify that the cyanide of potassium found in her stomach could have been taken only in a liquid form. Several University of Wisconsin authorities are said to be ready to give the same testimony.

It was learned today that the prosecution had suffered another blow immediately following Josephine Davis' bomb shell testimony. A number of Madison witnesses counted on by the state to show that Orpet arranged a search alibi the day of Marion's death, will not come to Waukegan to testify, it was stated.

A noted agriculturist was traveling through one of the southern states on a lecture tour. One evening, after delivering his lecture, he approached a grizzled farmer with the intention of starting a conversation on the betterment of crop conditions.

"Good evening, sir," said the agriculturist.

The farmer regarded him doubtfully for a moment and then said abruptly, "You can't learn me nothin'. I've done 'wore out' two farms already."—Ex.

NEWPORT-NYE BEACH Automobile Passenger and Baggage Transfer Furnished Tents and Cottages Correspondence Promptly Answered L. D. PICKENS, Box 274

DENVER AND PROHIBITION

(Christian Science Monitor) Before Denver entered upon prohibition, on Jan. 1, 1916, many of the most important "interests" of the city were downcast. The gas and electric light company had predicted a drop of at least \$15,000 a month in receipts; instead, it showed a gain of \$10,000 in the very first month of dryness. The banks had feared the change, but the first month of prohibition saw 2000 names added to their list of depositors and a gain of deposits aggregating a \$750,000. So thorough a long list. It is true that certain lines of business were hurt. The pawnshops, for instance, never knew the times to be so dull.

Start Tomorrow and Keep It Up Every Morning

Get in the habit of drinking a glass of hot water before breakfast.

We're not here long, so let's make our stay agreeable. Let us live well, eat well, digest well, work well, sleep well and look well. Want a glorious condition to attain, and yet, how very easy it is if one will only adopt the morning inside bath.

Folks who are accustomed to feel dull and heavy when they arise, spitting headache, stuffy from a cold, foul tongue, nasty breath, acid stomach, can, instead, feel as fresh as a daisy by opening the sluices of the system each morning and flushing out the whole of the internal poisonous stagnant matter.

Everyone, whether ailing, sick or well, should, each morning, before breakfast, drink a glass of real hot water with a teaspoonful of limestone phosphate in it to wash from the stomach, liver and bowels the previous day's indigestible waste, sour bile and poisonous toxins; thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach. The action of hot water and limestone phosphate on an empty stomach is wonderfully invigorating. It cleans out all the sour fermentations, gases, waste and acidity and gives one a splendid appetite for breakfast. While you are enjoying your breakfast the water and phosphate is quietly extracting a large volume of water from the blood and getting ready for a thorough flushing of all the inside organs.

The millions of people who are bothered with constipation, bilious spells, stomach trouble; others who have sallow skins, blood disorders and sickly complexions are urged to get a quarter pound of limestone phosphate from the drug store. This will cost very little, but is sufficient to make anyone a pronounced crank on the subject of inside-bathing before breakfast.

WILL CALL MILITIA IF TROOPS ARE NEEDED

Situation In Mexico Is Such That Militia May Be Called at Any Time

Washington, June 14.—A call for state militia will be the government's first step should there be need for more troops on the border. This was the statement made at the war department today by a member of the army general staff.

Outward of 10,000 men of the coast artillery corps not now on the border, there are only 1,500 available regulars in continental United States and 500 stationed in Alaska. The remainder of the United States regular army, about 40,000 men, is scattered at posts in Hawaii, the Philippines and the canal zone.

While officials insisted today no special instructions have been sent head of the national guard to be in readiness for a call, it was admitted that officers in the division of militia affairs at the war department have for some days been working overtime in an effort to get supplies and equipment up to schedule allotment.

Defy the Americans

Columbus, N. M., June 14.—Anti-American agitators have defied the expeditionary forces by appearing in the repair camps south of Las Palomas and threatening the Mexican laborers with death when the "gringos" are driven out. One agitator who worked in the ranks of the Mexicans has been arrested, according to information here today.

The rainy season has opened at Nantiquita but shipments of supplies to the punitive expedition has not been delayed.

Hurley New Head of Trade Commission

EDWARD N. HURLEY

The federal trade commission having decided to adopt the practice of the interstate commerce commission with regard to the chairman of the commission and observe annual rotation in the election of its chairman, Edward N. Hurley was selected by vote as chairman to succeed Joseph E. Davies. The commission did not formally announce its new procedure, but the fact became known after a conference at the white house between ex-chairman Davies and President Wilson. Edward N. Hurley has been a member of the federal trade commission, whose function is the prevention of unfair methods of competition in commerce, since its organization.

Very Effective Method for Banishing Hairs

At a very little cost any woman can rid her face of hairy growths if she will use the delicate treatment. This is made by mixing some water with a little powdered delatone. This paste is spread upon the hairy surface for 2 or 3 minutes, then rubbed off and the skin washed, when every trace of hair will have vanished. No harm results from this treatment, but care should be used to buy real delatone.

If you enjoy reading the Journal occasionally you will be pleased to get it regularly—only 45 cents per month at your door.

STATE NEWS

Oregon City: Turning out between three and five tons of refined silica a day, Oregon's newest industry has started in business just beyond the city limits, and is furnishing a large share of the material with which the county is constructing a mile of hard surface road between this place and the Cheakamus river. The enterprise is entirely a home affair, only Oregon City men being employed at the plant and Oregon City capital being all that is invested in it. The industry is the outgrowth of the discovery last fall of a deposit of at least 400,000 cubic yards of almost pure silica on the property of Charles F. Terrill.

La Pine Inter-Mountain—A ledge of olive andite was discovered last week by Engineer Riddell. The deposit is of considerable commercial value as a building stone, and is the only known deposit of its kind in central Oregon. The Chamber of Commerce building in Portland is built of the same material.

WRIGLEY'S

is a happy companion. It adds to the joy of living for millions of people the world over. After dining or smoking it sweetens the mouth, soothes the throat—removes breath odors. Stimulate the flow of saliva help appetite and digestion—cleanse mouth—preserve teeth: this is the constant message of the Sprightly Sparmen.

Chew it after every meal

See how much better you will feel

The natural cement like qualities of the stone classes it among the best materials for crushed rock road construction.

Oregon City Enterprise: The third visit of the state fish and game commission's car, the Rainbow, to Oregon City within a week will be made today, and again 177,000 salmon fry will be planted in the Willamette below the falls. With the two shipments already received this week, and put in the river under the direction of Deputy Fish Warden Jewell, the total number of fry planted this week reaches 531,000. The salmon are from an inch to an inch and a half long. They are brought here in 10 gallon cans, packed in ice and supplied with air by a pump. Few die on the trip.

Oregon City Enterprise: The tenth annual Oregon City rose show, which was originally scheduled for May 27, was set for next Wednesday, June 14, at a meeting of the Rose society Thursday night. A postponement of the show was necessary because of the lack of roses on the date first set. The West Lane rose show, which, too, has been postponed a time or two, will be held next week. Saturday June 17, has been set as the date for the annual display across the river.

Medford Mail: A dredge that will handle 1000 yards of dirt a day—known as a dry land dredge—will soon be installed on the Applegate below Rock on the Ray property. It will be the first dry land dredge to be operated in this region. It may be packed up and carried to any district desired. Charles A. Hudson and sons, of Seattle have written to W. J. Hills in this city, that they will soon be ready to install it. They also ask Mr. Hills as to the facilities here for obtaining woodwork and ironwork, such as it will be necessary to find in a planing mill or foundry. They suggest the possibility that these may undertake to establish an important branch of their business in this city to handle the dredging operations in southern Oregon and northern California.

Oswego, Ore.: The first dam was built across the mouth of Oswego lake in 1850, by A. A. Dunham, who erected a sawmill near the site the same year. Mr. Dunham made quite a success in the lumber business the first year, but later lost heavily in that business.

his dam being carried away by water. He rebuilt the same immediately, continuing in the lumber business until about 1865, at which time he sold to J. C. Trullinger, who platted the town of Oswego in 1886. Trullinger sold water rights to the Oregon Iron company for the purpose of running an iron smelter at the outlet of the lake, on the bank of the Willamette river.

Medford Sun: Smudging was general and heavy throughout the Rogue River valley Thursday morning and the sky was hazy with smoke from thousands of smudge pots. The early sun was red, and the soot soon settled over the city, causing no harm to housewives and merchants. The smudging began about 2 o'clock, and by 3 it and settled over the city, dimming the street lights. As far as reports show, there was little damage to the fruit where crude oil was used to combat black frost.

An effort is being made by the Portland Rod and Gun club to do away with seining on the Willamette below Oregon City, in order to make rod and line fishing worth while and thus encourage sportsmen to come to Oregon.

Today's Aid To Beauty

An especially fine shampoo for this weather, one that dissolves and entirely removes all dandruff, excess oil and dirt, can easily be made at trifling expense by simply dissolving a teaspoonful of canthox in a cup of hot water. Pour slowly on scalp and massage briskly. This creates a soothing, cooling lather. Rinsing leaves the scalp spotlessly clean, soft and pliant, while the hair takes on the glossy richness of natural color, also a thickness which makes it seem much heavier than it is. After a canthox shampoo arranging the hair is a pleasure.

The Nation's Favorite Butter Nut There Is No Better
