### New Post Toasties are ready to eat direct from the package. They have a fine new flavour—self-developed by a new patented process. It's the rare, true flavour of prime, white Indian corn itself, and these New Toasties are the first corn flakes that do not depend on cream and sugar for palatability.

The proof of this superior flavour is found by eating some from the package dry. They're deliciously good that way, but of course are usually served with cream or good milk.

Examine the New Post Toasties flakes. The quick, fierce heat of the new process of manufacture, not only raises the distinguishing little bubbles on each flake, but gives a body and firmness that makes the New Toasties a more substantial food than ordinary "corn flakes."

New Post Toasties do not "chaff" or crumble in the package, and they don't mush down when cream is added. They come to you untouched by hand, and in moisture-proof packages that preserve their delightful oven-crispness until served at your table. Well worth trying—these

## Christy Mathewson by Walt Mason

When Christy's dead a hundred years, the fans will still discuss his play, and sigh, while shedding briny tears, "There are no men like him today! He used the brains behind his brow, and gave the foe a grievous jar; the chroniclers have told us how he was for years and years a star. Great pitchers came and cut some grass, and died, and then forgotten were; he saw them come, and saw them pass, and still kicked up a mighty stir." The chroniclers will also tell how Christy, when a game was played, filled up the pipe he loved so well, to soothe his nerves, all tired and frayed. He smoked Tuxedo every time, the critic's smoke, the mild and rare, Tuxedo fragrant and sublime, the cool, sweet smoke beyond compare.
