SEEKING FOR PLAN

ed out that such action would result eventually in a complete victory for the president. If the B. & O. or the Southern, or both should agree to the president's plan, it would practically force eastern and southern roads at least to do likewise. Willard particularly is said to feel that rather than endanger the business and safety of the nation, the roads should yield, in toto to Wilson's demands.

Will Stick Together. Should he agree individually to do so, it would mean that every road in the anthracite field must follow. The great opposition to accepting the eight hour day proposal comes from the western chiefs. They claim that not only the manufacturers, but the agricultural communities in their country are against the principle of the eight hour day as applied to railroads, that shippers won't stand for rate increases and that they'll find plenty of public support in case they prefer a strike to yielding.

The full number of railroad presidents met at 11 o'clock to hear reports from the sub-committee of eight and the committee of three who called on the president last night. Neither committee, it was said, was prepared to report decision on an acceptable plan. "One thing sure," said one member of the smaller committee, "we do not desire to back up against the president on this matter. We represent property worth \$12,000,000,000 and must protect it. For that reason we are striving earnestly to work out a plan that will serve this purpose and at the same time meet the demands of the president."

He declared positively there would be no action by individual roads without agreement by all. "We'll stick together," he said.

A special request came by wire to the office of the state engineer yesterday that water rights on Jordan creek in Malheur county be adjusted. It is set forth that several parties are about to commence action at law and are going to ask for an injunction from the courts. It is suggested that the state engineer appoint a watermaster for this season to prevent rightful owners from being damaged. A reply has been wired to the petition, stating that no distribution of water can be made until water rights are determined, and inasmuch as the circuit court recently referred the adjudication of Hood river to the water board it appears doubtful whether the Jordan creek matter can be taken up next year. In the meantime the water-users over there will be compelled to fight the thing out against themselves.
