PICKING THE FUGGLES ALREADY UNDER WAY

General Picking Begins In Two Weeks; Reports Highly Favorable

Although hop picking will not become general throughout the state for two weeks, the picking of fuggles has already begun in some of the yards. It seems to be the general opinion of the growers that owing to the lateness of the season it is inadvisable to start picking much before the 5th of September.

Favorable reports continue to come in from all sides regarding the hop crop. Lice have been plentiful in some yards, but not nearly so much so as might have been expected when the long continued rains are taken into consideration, and active work with the sprayer has resulted in keeping the pest down.

Whether or not the English embargo will be lifted remains to be determined. Much depends on the English crop. If this is heavy it is not likely that the embargo will be lifted or even modified.

Chicago Is Cool But New York Is Cooking

Chicago, Aug. 23.—While New York City and Eastern states broiled and sweltered today with the mercury above the 100 mark, Chicago was comparatively an iceberg. The highest temperature here today was 73 at 2 o'clock.

New York Swelters. New York, Aug. 23.—Street thermometers registered 100 in the shade in New York today and as high as 118 in the sun, in mockery of the assertion of the weather man, high on top of White Hall building, that the official temperature at 2 o'clock was 90.

"Villa, in Hiding," Sounds Like Home

Washington, Aug. 24.—General Villa is now hiding in the mountains of Durango with only a small force. General Pershing reported to the war department today.

Pershing's message said: "My last report regarding Villa reported advancing on Parral, now reported incorrect. Villa had only small following. He avoided Parral and placed himself by Carranza troops. He was making his way down into Durango. Probably now hiding in the mountains. Until recently Villa had been riding since being driven to mountains of southern Chihuahua by our troops last April. His late attempt to obtain following reported as almost total failure."

"Opinion seems general that Villa prestige is gone and that he can never become serious factor in Mexican affairs."

THE TATTLER

There is a story told of a Salem man and his Ford which is subject to suspicion. It is related that while showing some Nebraska relatives the country south of town the Ford ran short of gasoline, and at the suggestion of the Nebraska man he went to a neighboring farm and bought two gallons of milk, which he put into the gasoline tank. The machine ran perfectly from then on until the party reached Salem. Here it was found that the carburetor was full of butter, but otherwise the experiment seems to have been a success.
